## **From Charity To Social Work In England And The United States:**

**From Charity to Social Work in England and the United States** Kathleen Woodroffe, 1962 *Charity and Mutual Aid in Europe and North America since 1800* Bernard Harris, Paul Bridgen, 2012-04-06 International in perspective the essays in this volume are primarily concerned with two facets of the mixed economy of welfare charity and mutual aid Emphasizing the close relationship between these two elements and the often blurred boundaries between each of them and commercial provision contributors raise crucial questions about the relationship between rights and responsibilities within the mixed economy of welfare and the ties which bind both the donors and recipients of charity and the members of voluntary organisations The volume critically assesses the relationships between the statutory and voluntary sectors in a variety of national settings including Britain the United States the Netherlands Sweden Norway Canada and Germany during the last two hundred and fifty years making the book as topical as it is significant

**Christianity and Social Service in Modern Britain** Frank Prochaska, 2006-01-26 Few subjects bring out so well the differences between ourselves and our ancestors as the history of Christian charity In an increasingly mobile and materialist world in which culture has grown more national indeed global we no longer relate to the lost world of nineteenth century parish life Today we can hardly imagine a voluntary society that boasted millions of religious associations providing essential services in which the public rarely saw a government official apart from the post office clerk Against the background of the welfare state and the collapse of church membership the very idea of Christian social reform has a quaint Victorian air about it In this elegantly written study of shifting British values Frank Prochaska examines the importance of Christianity as an inspiration for political and social behaviour in the nineteenth century and the forces that undermined both religion and philanthropy in the twentieth The waning of religion and the growth of government responsibility for social provision were closely intertwined Prochaska shows how the creation of the modern British state undermined religious belief and customs of associational citizenship In unravelling some of the complexities in the evolving relationship between voluntarism and the state the book presents a challenging new interpretation of Christian decline and democratic traditions in Britain

[Bibliography of the History of Medicine](#) , [Social Justice Isn't What You Think It Is](#) Michael Novak, Paul

Adams,2015-11-03 What is social justice For Friedrich Hayek it was a mirage a meaningless ideological incoherent vacuous cliché He believed the term should be avoided abandoned and allowed to die a natural death For its proponents social justice is a catchall term that can be used to justify any progressive sounding government program It endures because it venerates its champions and brands its opponents as supporters of social injustice and thus as enemies of humankind As an ideological marker social justice always works best when it is not too sharply defined In *Social Justice Isn't What You Think It Is* Michael Novak and Paul Adams seek to clarify the true meaning of social justice and to rescue it from its ideological captors In examining figures ranging from Antonio Rosmini Abraham Lincoln and Hayek to Popes Leo XIII John Paul II and Francis the authors reveal that social justice is not a synonym for progressive government as we have come to believe Rather it is a virtue rooted in Catholic social teaching and developed as an alternative to the unchecked power of the state Almost all social workers see themselves as progressives not conservatives Yet many of their best practices aim to empower families and local communities They stress not individual or state but the vast social space between them Left and right surprisingly meet In this surprising reintroduction of its original intention social justice represents an immensely powerful virtue for nurturing personal responsibility and building the human communities that can counter the widespread surrender to an ever growing state

*Women and the Work of Benevolence* Lori D. Ginzberg, 1990-01-01 Nineteenth century middle class Protestant women were fervent in their efforts to do good Rhetoric especially in the antebellum years proclaimed that virtue was more pronounced in women than in men and praised women for their benevolent influence moral excellence and religious faith In this book Lori D Ginzberg examines a broad spectrum of benevolent work performed by middle and upper middle class women from the 1820s to 185 and offers a new interpretation of the shifting political contexts and meanings of this long tradition of women s reform activism During the antebellum period says Ginzberg the idea of female moral superiority and the benevolent work it supported contained both radical and conservative possibilities encouraging an analysis of femininity that could undermine male dominance as well as guard against impropriety At the same time benevolent work and rhetoric were vehicles for the emergence of a new middle class identity one which asserts virtue not wealth determined status Ginzberg shows how a new generation that came of age during the 1850s and the Civil War developed new analyses of benevolence and reform By post bellum decades the heirs of antebellum benevolence referred less to a mission of moral regeneration and far more to a responsibility to control the poor and vagrant signaling the refashioning of the ideology of benevolence from one of gender to one of class According to Ginzberg these changing interpretations of benevolent work throughout the century not only signal an important transformation in women s activists culture and politics but also illuminate the historical development of American class identity and of women s role in constructing social and political authority

**Social Professional Activities and the State** Peter Herrmann, 2007 The guiding question of this work is the following In which way if at all can we define a framework that allows a comparative view on social professional activity in an international perspective Going beyond positivist research usually means to look for qualitative standards however remaining caught by taking individual professions in a national setting from one country for granted and looking from what we know for counterparts and or partners in other countries To avoid the subsequent shortcoming of an underlying professional rigidity we face the need of developing a functional perspective focusing on the societies in which Social Professional Activities SPA emerge in their respective particular national patterns This means however to start by defining the social as determining societies in general looking from there at different national patterns pragmatically but as well structurally the nation state will be taken as point of reference In such a perspective several current concepts have to be fundamentally questioned as far as the mainstream consensus is concerned Terms in question are in particular the social professions and social problems this is especially necessary when it comes to developing an international perspective Despite the need of looking for a general definition of the social there is in particular a more specific need for debating the understanding of different strands of activities that are in the widest sense captured as social professions for example social work community youth work nursing and care professions but as well social management and social action especially the latter pointing on the problematique of professionalisation in strictu sensu International comparative research of social professional activities does not fail primarily because of the huge variety of national regimes and regulations The actual reason is the fundamentally different point of departure expressing various national traditions of the reasoning on the state a reasoning being at the end a practical reasoning In other words we have to recur on the different national understanding of social contracts This approach allows taking a dialectical perspective in order to revisit the actual character of social professional activities It is the practical confrontation of the individual with his her environment that constitutes processes of socialisation
