Philosophers Speak for Themselves Thomas Vernor Smith, 1957 *From Descartes to Locke* Marjorie Grene, Thomas Vernor Smith, 1940 The Epistemology of Descartes and Locke. A Comparative Analysis of the Fundamentals of the Theories, 2020-10-27 Seminar paper from the year 2020 in the subject Philosophy Philosophy of the 17th and 18th Centuries grade 1 0 Aristotle University of Thessaloniki language English abstract In this paper the author would like to compare the epistemology of Rene Descartes and John Locke Insofar as both lived and practiced during the Enlightenment she considers it an interesting object of analysis In her opinion the elaboration of the two philosophical currents of empiricism as well as rationalism can be seen particularly well in these two philosophers To this end she will focus particular on the first two meditations of Descartes more precisely the methodological doubt and the Cogito argument as well as the Essay concerning Humane Understanding by John Locke In the first step she will explain Descartes with particular reference to the concept of his own existence and his mathematical approach Furthermore she will try to work out the meaning of logical thinking as well as the meaning of deduction by means of his text and examples taken from it In the following Locke s views will be presented in more detail whereby she will focus particular on the meaning of experience and the development of ideas through that sensory experience Also shortly in contrast to the explanation of deduction in Descartes sense the induction will be also examined This is followed by an analytical comparison of the two theories and their classification in the philosophical currents as well as a critical illumination of the two approaches in order to work out the weaknesses and strengths of both theories which will finally be summarized in a short conclusion **Philosophers Speak for Themselves** Thomas Vernor Smith, Marjorie Grene, 1957 Modern thought and modes of living have been immeasurably influenced by the philosophers of the Enlightenment men such as Descartes Hobbes Spinoza Newton Leibniz and Locke Gathered together in this book and preceded by valuable biographical sketches are selections from the basic and most significant writings of each of these men

HUNT, 2025-05-22 The Relations Between Descartes and Locke explores the intricate philosophical connections between Ren Descartes and John Locke two towering figures of the 17th century DeRay Louis Hunt delves into their contrasting yet intertwined ideas on metaphysics epistemology and the nature of human understanding This study provides valuable insights into the development of modern philosophy and the ongoing debate between rationalism and

The Science of Modern Virtue Peter Lawler, Marc Guerra, 2013-11-01 The Science of Modern Virtue examines the influence that the philosopher Rene Descartes the political theorist John Locke and the biologist Charles Darwin have had on our modern understanding of human beings and human virtue Written by leading thinkers from a variety of fields the volume is a study of the complex relation between modern science and modern virtue between a kind of modern thought and a kind of modern action Offering more than a series of substantive introductions to Descartes Locke's and Darwin's accounts of who we are and the kind of virtue to which we can aspire the book invites readers to think about the ways in which the writings of these seminal thinkers shaped the democratic and technological world in which modern human beings live Thirteen scholars in this volume learnedly explore questions drawn from the diverse disciplines of political science philosophy theology biology and metaphysics Let the reader be warned The authors of these essays are anything but consensual in their analysis Considered together the chapters in this volume carry on a lively internal debate that mirrors theoretical modernity's ongoing discussion about the true nature of human beings and the science of virtue Some authors powerfully argue that Locke's and Darwin's thought is amenable to the claims made about human beings and human virtue by classical philosophers such as Aristotle and classical Christian theologians such as Thomas Aquinas Others make the opposite case drawing attention to the ways in which Descartes Locke and Darwin knowingly and dialectically depart from central teachings of both classical philosophy and classical Christian theology [The Locke Reader](#) John W.

Graciela De Pierris, 2015-04-30 Graciela De Pierris presents a novel interpretation of the relationship between skepticism and naturalism in Hume's epistemology and a new appraisal of Hume's place within early modern thought. Whereas a dominant trend in recent Hume scholarship maintains that there are no skeptical arguments concerning causation and induction in Book I Part III of the *Treatise*, Graciela De Pierris presents a detailed reading of the skeptical argument she finds there and how this argument initiates a train of skeptical reasoning that begins in Part III and culminates in Part IV. This reasoning is framed by Hume's version of the modern theory of ideas developed by Descartes and Locke. The skeptical implications of this theory, however, do not arise as in traditional interpretations of Hume's skepticism from the veil of perception. They arise from Hume's elaboration of a presentational phenomenological model of ultimate evidence according to which there is always a justificatory gap between what is or has been immediately presented to the mind and any ideas that go beyond it. This happens paradigmatically in the causal inductive inference and, as De Pierris argues, in demonstrative inference as well. Yet in spite of his firm commitment to radical skepticism, Hume also accepts the naturalistic standpoint of science and common life, and he does so on the novel interpretation presented here because of an equally firm commitment to Newtonian science in general and the Newtonian inductive method in particular. Hume defends the Newtonian method against the mechanical philosophy while simultaneously rejecting all attempts, including those of the Newtonians, to find a place for the supernatural within our understanding of nature.
