From Empire To International Commonwealth:

From Empire to International Commonwealth Deborah Lavin, 1995 Lionel Curtis C H once counted among the great and the good working behind the scenes of international politics and honoured as the pioneer of a great idea international federation as the natural successor to empire He advocated federation as the way to create a new South Africa after the Boer War he called for self government in India in 1912 in 1921 he was instrumental in attempting to pacify the Irish Troubles by treating Eire as if it were a self governing Commonwealth Dominion He went on to preach the conversion of the Empire Commonwealth into a multinational federation which in association with the United States would serve as a model for a united Europe and even for world government He founded the Round Table think tank the Royal Institute of International Affairs at Chatham House and the Oxford Society He lobbied indefatigably for his vision of the Commonwealth as a new world order to be more effective than the League of Nations in making wars obsolete In the process he exasperated nationalists and imperialists alike as a prophet of apparently lost causes He deserves to be remembered not only for what he achieved but for what he was the bore who never lost a friend the optimist who stuck to his belief when all was lost the third class scholar who became a Fellow of All Souls the visionary riding his hobby horse into the drawing rooms of high political society and yet invited affectionately to return The remarkable character of the man and the influence he exerted on the history of the Empire and Commonwealth are explored in this authoritative biography

Building the Kingdom of God on Earth Martin Erdmann, 2005-03-31 In his book *Building the Kingdom of God on Earth* Dr Erdmann deals primarily with John Foster Dulles participation in the ecumenical movement from 1919 to 1945 Dulles role in shaping the religious economic and political policies of the Federal Council of Churches in its support of world order and peace especially in his function as chairman of the Commission on a Just and Durable Peace was crowned with success in the founding of the United Nations Organisation in 1945 His personal friends Philip Kerr Lord Lothian and Lionel Curtis the principal leaders of the Round Table Group come into the pictures at various times By and large they pursued the same objectives as those of Dulles The book shows the detailed influence of the Round Table Group and its affiliated organisations such as the Royal Institute of International Affairs London and the Council for Foreign Relations New York City on the ecumenical movement using it successfully for their purpose of creating an international community of nations

South Africa, Race and the Making of International Relations Vineet Thakur, Peter Vale, 2020-01-17 This book offers readers an alternative history of the origins of the discipline of International Relations Conventional western histories of the discipline point to 1919 as the year of the birth of the discipline with two seminal initiatives setting up of the first Chair of IR at Aberystwyth and the founding of the Institute of International Relations on the side lines of the Paris Peace Conference From these events International Relations is argued to have been established as a path to create peace in the post War era and facilitated through a scientific study of international affairs International Relations was therefore both a field of study and knowledge production and a plan of action

This pathbreaking book challenges these claims by presenting an alternative narrative of International Relations In this book we make three interconnected arguments First we argue that the natal moment in the founding of IR is not World War I as is generally believed but the Anglo Boer War Second we argue that the ideas methods and institutions that led to the making of IR were first thrashed out in South Africa in Johannesburg in fact Finally this South African genealogy of IR we show in the book allows us to properly investigate the emergence of academic IR at the interstices of race Empire and science

Empires Without Imperialism Jeanne Morefield, 2014 *Sovereignty, International Law, and the Princely States of Colonial South Asia* Priyasha Saksena, 2023-05-11 What constitutes a sovereign state in the international legal sphere This question has been central to international law for centuries Sovereignty International Law and the Princely States of Colonial South Asia provides a compelling exploration of the history of sovereignty through an analysis of the jurisdictional politics involving a specific set of historical legal entities Governed by local rulers the princely states of colonial South Asia were subject to British paramountcy whilst remaining legally distinct from directly ruled British India Their legal status and the extent of their rights remained the subject of feverish debates through the entirety of British colonial rule This book traces the ways in which the language of sovereignty shaped the discourse surrounding the legal status of the princely states to illustrate how the doctrine of sovereignty came to structure political imagination in colonial South Asia and the framework of the modern Indian state Opening with a survey of the place of the princely states in the colonial structures of South Asia Sovereignty International Law and the Princely States of Colonial South Asia goes on to illustrate how international lawyers British politicians colonial officials rulers and bureaucrats of princely states and anti colonial nationalists in British India used definitions of sovereignty to construct political orders in line with their interests and aspirations By invoking the vernacular of sovereignty in contrasting ways to support their differing visions of imperial and world order these actors also attempted to reconfigure the boundaries among the spheres of the national the imperial and the international Throughout the eighteenth nineteenth and early twentieth centuries debates and disputes over the princely states continually defined and redefined the concept of sovereignty and international legitimacy in South Asia Using rich material from the colonial archives Sovereignty International Law and the Princely States of Colonial South Asia conveys an understanding of the history of sovereignty and the construction of the modern Indian nation state that is still relevant today A riveting read this book will be of considerable interest and importance to scholars of international law and South Asia legal historians and political scientists

The Architects of International Relations Jan Stöckmann, 2022-03-03 Based on extensive archival research this book provides a new and stimulating history of International Relations IR as an academic discipline Contrary to traditional accounts it argues that IR was not invented by Anglo American men after the First World War Nor was it divided into neat theoretical camps To appreciate the twists and turns of early IR scholarship the book follows a diverse group of men and women from across Europe and beyond who pioneered the field since 1914 Like architects they built a set of institutions university departments journals libraries etc but they also designed plans for a new world order draft treaties petitions political commentary etc To achieve these goals they interacted closely with the League of Nations and its bodies for intellectual cooperation until the Second World War put an end to their endeavour Their story raises broader questions about the status of IR well beyond the inter war period

Middle Powers and International Organisations Aynsley Kellow, Peter Carroll, 2017-05-26 This book provides a unique examination of how a middle power uses international organisations to achieve greater global influence The authors focus on the OECD the rich man's club of most of the world's wealthiest nations It demonstrates how the decision by Australia to apply for membership was a long drawn out process delayed by political factors Eventually agreement was reached with assurances that membership would provide access to valuable and timely policy related information especially in relation to international trade and finance In addition membership would potentially increase influence by providing greater access to its powerful member states at an earlier stage in their policy discussions and agreements

Memories of Empire and Entry into International Society Filip Ejdus, 2017-06-14 What is the role of memories for the expansion of

international society By drawing on the English School approach to International Relations this edited volume argues that the memories of empire and suzerainty are key to understanding sociological aspects of the expansion of anarchical society The expert contributors adopt a socio historic conceptualization of entry into international society aiming to move beyond the legalist analysis and also explore the impact of identity constructions and collective memories on the expansion of international society Empirically the volume investigates the entry into international society of Belarus Bulgaria Greece Poland Serbia Slovakia and Romania and studies memories that they activated along the way While these memoirs of bygone polities were used by state builders to make sense of international society and legitimise claims of the new entrants they inadvertently also generated tensions and anxieties which in many ways persist until this day Both the theoretical angle and the empirical material presented in this volume are novel additions to the growing body of knowledge in historical International Relations Exploring how memories and experiences of the past still complicate the entrants positions in international society and to what degree ensuing tensions remain today this volume will be of interest to students and scholars of European International Relations particularly those with a focus on Eastern Europe

British Idealism and International Thought Nazli Pinar Kaymaz, 2020-07-09 This book gives a comprehensive account of the British Idealist approach to international relations from the 1880s to 1930s In an attempt to historically contextualise the shifts in several British Idealists approaches to the nature of international relations and human rights it focuses on their reflections on the Second Boer War the Great War and the League of Nations The ensuing discussion offers valuable insights into British Idealists evolving approaches to the topics of imperialism cosmopolitanism internationalism multiculturalism and human rights While the pioneering Idealists like T H Green and Bernard Bosanquet are acknowledged as those who set the tone of discussion on these central issues works by minor British Idealists such as J S Mackenzie J H Muirhead Henry Jones R B Haldane and H J W Hetherington reveal British Idealism s capacity for adaptation to novel ideational positions under adverse international conditions

Partitions Arie M. Dubnov, Laura Robson, 2019-01-29 Partition the physical division of territory along ethno religious lines into separate nation states is often presented as a successful political solution to ethnic conflict In the twentieth century at least three new political entities the Irish Free State the Dominions later Republics of India and Pakistan and the State of Israel emerged as results of partition This volume offers the first collective history of the concept of partition tracing its emergence in the aftermath of the First World War and locating its genealogy in the politics of twentieth century empire and decolonization Making use of the transnational framework of the British Empire which presided over the three major partitions of the twentieth century contributors draw out concrete connections among the cases of Ireland Pakistan and Israel the mutual influences shared personnel economic justifications and material interests that propelled the idea of partition forward and resulted in the violent creation of new post colonial political spaces In so doing the volume seeks to move beyond the nationalist frameworks that served in the first instance to promote partition as a natural

White, 2016-03-03 This book reconsiders the nature and formation of Asia's economic order during the 1930s and 1950s in light of the new historiographical developments in Britain and Japan Recently several Japanese economic historians have offered a new perspective on Asian history arguing that economic growth was fuelled by the phenomenon of intra Asian trade which began to grow rapidly around the turn of the 19th 20th centuries On the other side British imperial historians P J Cain and A G Hopkins have presented their own interpretation of gentlemanly capitalism in which they emphasize the leading role of the service sector rather than that of British industry in assessing the nature of the British presence overseas In order to assess and test these new perspectives this volume addresses three key issues The first is to reconsider the metropolitan peripheral relationship in Asia focusing particularly on the role of the sterling area and its implications for Asian economic development The second is to examine the formation of inter regional trade relations within Asia in the 1930s and their revival and transformation in the 1950s The final issue is the comparison of the international order of Asia of the 1930s with the 1950s and the degree to which the Second World War represented a break point in Asia's economic development Dealing with issues of trade economy nationalism and imperialism this book provides fresh insights into the development of Asia during the mid twentieth century Drawing on the latest scholarship it will prove invaluable to all who wish to better understand the position of countries such as Japan China India Singapore Malaysia and Korea within the wider international order **Public International Law** Alina Kaczorowska-Ireland, 2010-07-12 The fourth edition of Public International Law provides a very readable lively detailed and easily understood introduction to the fundamental principles and structures of international law without compromising on analysis and depth of coverage Whilst the traditional topics of public international law are central to this book new developments including the impact of Kosovo's unilateral declaration of independence from Serbia the fight against terrorism the implications of cases currently pending before the International Court of Justice on State immunity and the exercise of universal jurisdiction by States are also detailed In addition new actors on the international stage such as non
