Benton Mackaye, 1950      *The Appalachian Trail* Philip D'Anieri, 2021 The conception and building of the Appalachian Trail is a story of the unforgettable characters who explored it defined it and captured national attention by hiking it D Anieri provides backstories for the dreamers and builders who helped bring the Trail to life over the past century A must read for anyone who wonders about our relationship with the great outdoors adapted from jacket      From Biotechnology to Genomes Philippe Goujon, 2001-01-01 Aimed at scientists and non specialised readers alike this book retraces the source of national and international biotechnology programmes by examining the origins of biotechnology and its political and economic interpretation by large nations With a foreword by Andr r Goffeau who initiated the European Yeast Genome Project the book describes the achievements of the first genetic and physical maps as well as the political and scientific genesis of the American Human Genome Project Following these advances the author discusses the European biotechnology strategy the birth and implementation of European biotechnology programmes and the yeast genome project      From Fundamentals to Applications in Geotechnics D. Manzanal, A.O. Sfriso, 2015-12-11 The work of geotechnical engineers contributes to the creation of safe economic and pleasant spaces to live work and relax all over the world Advances are constantly being made and the expertise of the profession becomes ever more important with the increased pressure on space and resources This book presents the proceedings of the 15th Pan American Conference on Soil Mechanics and Geotechnical Engineering XV PCSMGE held in Buenos Aires Argentina in November 2015 This conference held every four years is an important opportunity for international experts researchers academics professionals and geo engineering companies to meet and exchange ideas and research findings in the areas of soil mechanics rock mechanics and their applications in civil mining and environmental engineering The articles are divided into nine sections transportation geotechnics in situ testing geo engineering for energy and sustainability numerical modeling in geotechnics foundations and ground improvement unsaturated soil behavior embankments dams and tailings excavations and tunnels and geo risks and cover a wide spectrum of issues from fundamentals to applications in geotechnics This book will undoubtedly represent an essential reference for academics researchers and practitioners in the field of soil mechanics and geotechnical engineering In this proceedings approximately 65% of the contributions are in English and 35% of the contributions are in Spanish or Portuguese

**Geography and Cartography** Clara Beatrice Muriel Lock, 1976      **Research Developments in Geotechnics, Geo-Informatics and Remote Sensing** Hesham El-Askary, Zeynal Abiddin Erguler, Murat Karakus, Helder I. Chaminé, 2022-02-21 This book contains the best peer reviewed papers accepted for presentation at the 2nd Springer Conference of the Arabian Journal of Geosciences CAJG 2 organized in Sousse Tunisia in November 2019 The short papers cover various topics from the fields of 1 geological and geotechnical engineering 2 geomechanical studies based on

numerical and analytical methods and 3 geo informatics and remote sensing The content of these papers provides new scientific knowledge for further understanding on landslides new stabilization techniques importance of geophysics for engineering geology investigations as well as new empirical approaches for easily predicting some physical and hydrogeomechanical properties of geomaterials The book is of interest to all researchers practitioners and students in the fields of geological and mining engineering geotechnical engineering hydrogeomechanics engineering geology geotechnologies and natural hazards *Geotechnical and Environmental Applications of Karst Geology and Hydrology* B.F. Beck,J.G. Herring,2001-01-01 This text covers topics such as sinkhole formation and regional studies of sinkholes and karst Issues addressed are taken from the 8th multidisciplinary conference on this subject and chart the characteristics of sinkholes and karst as well as their environmental repercussions Selected Studies in Geotechnics, Geo-informatics and Remote Sensing Zeynal Abiddin Ergüler,Riheb Hadji,Helder I. Chaminé,Jesús Rodrigo-Comino,Amjad Kallel,Broder Merkel,Mehdi Eshagh,Haroun Chenchouni,Stefan Grab,Murat Karakus,Sami Khomsi,Jasper Knight,Mourad Bezzeghoud,Maurizio Barbieri,Sandeep Panda,Ali Cemal Benim,Hesham El-Askary,2023-12-09 This book contains the best papers accepted for presentation at the 3rd Springer Conference of the Arabian Journal of Geosciences CAJG 3 The book is divided into three parts to distinguish research studies from the fields of 1 geological and geotechnical engineering 2 geomechanical studies based on numerical and analytical methods and 3 geo informatics and remote sensing The content of these papers provides new scientific knowledge for further understanding on landslides new stabilization techniques importance of geophysics for engineering geology investigations as well as new empirical approaches for easily predicting some physical and hydrogeomechanical properties of geomaterials It also sheds the light on usage of different remote sensing technologies mapping techniques in a geographic information systems environment along with some advanced signal processing and deep learning approaches The book is of interest to all researchers practitioners and students in the fields of geological and mining engineering geotechnical engineering hydrogeomechanics engineering geology geotechnologies groundwater and natural hazards and analyses of some emerging earth processes and environmental variabilities *Developments in Engineering Geology* M.J. Eggers,J.S. Griffiths,S. Parry ,M.G. Culshaw ,2016-10-12 *Developments in Engineering Geology* is a showcase of the diversity in the science and practice of engineering geology All branches of geology are applicable to solving engineering problems and this presents a wide frontier of scientific opportunity to engineering geology In practice diversity represents a different set of challenges with the distinctive character of the profession derived from the crossover between the disciplines of geology and engineering This book emphasizes the importance of understanding the geological science behind the engineering behaviour of a soil or rock It also highlights a continuing expansion in the practice areas of engineering geology and illustrates how this is opening new frontiers to the profession thereby introducing new knowledge and technology across a range of applications This is initiating an evolution in the way geology is modelled in engineering geohazard and

environmental studies in modern and traditional areas of engineering geology      *Regional Visionaries and Metropolitan Boosters* Matthew Dalbey, 2012-12-06 This book is an examination of two conflicting regional planning ideologies and the impact of this conflict on the development of two regional parkways I hypothesize that regional parkways of the 1920s and 1930s emerged out of these two visions of regional planning regionalism and metropolitanism The regional view coalesced around the work of Benton MacKaye Lewis Mumford and the Regional Planning Association of America The metropolitan viewpoint while less definable grew out of the market oriented economic boosterism efforts associated with early twentieth century planning This view found literal and philosophical support with Thomas Adams and the Regional Plan of New York and Its Environs In an effort to flesh out the competing theories and the development of the regional parkway I discuss the history of the Skyline Drive and the proposed Green Mountain Parkway In addition to supplementing the planning history and theory literature I try to inform on issues important to the contemporary planning profession The regional visionaries viewed their regional work as a social reform effort The metropolitanists wanted to tweak the market so as to provide for a minimized congestion and economic hardship for the greatest number of citizens This vision versus reality still troubles the profession today especially in the areas of sustainable development growth management and smart growth Matthew Dalbey Jackson Mississippi March 2002 Chapter 1 Decentralization and Regional Planning Practical and Ideological Problems 1

**Organization Space** Keller Easterling, 2001-08-24 Bridging the gap between architecture and infrastructure Easterling views architecture as part of an ecology of interrelationships and linkages and she treats the expression of organizational character as part of the architectural endeavor The dominant architectures in our culture of development consist of generic protocols for building offices airports houses and highways For Keller Easterling these organizational formats are not merely the context of design efforts they are the design Bridging the gap between architecture and infrastructure Easterling views architecture as part of an ecology of interrelationships and linkages and she treats the expression of organizational character as part of the architectural endeavor Easterling also makes the case that these organizational formats are improvisational and responsive to circumstantial change to mistakes anomalies and seemingly illogical market forces By treating these irregularities opportunistically she offers architects working within the customary development protocols new sites for making and altering space By showing the reciprocal relations between systems of thinking and modes of designing Easterling establishes unexpected congruencies between natural and built environments virtual and physical systems highway and communication networks and corporate and spatial organizations She frames her unconventional notion of site not in terms of singular entities but in terms of relationships between multiple sites that are both individually and collectively adjustable      **Geographers** Hayden Lorimer, 2014-09-25 Volume 33 of Geographers Biobibliographical Studies adds significantly to the corpus of scholarship on geography s multiple histories and biographies with six essays on individuals who have made major contributions to the development of geography in the twentieth century This volume focuses on
