Carozza, Clemens Sedmak, 2020-10-31 Although deeply contested in many ways the concept of human dignity has emerged as a key idea in fields such as bioethics and human rights It has been largely absent however from literature on development studies The essays contained in The Practice of Human Development and Dignity fill this gap by showing the implications of human dignity for international development theory policy and practice Pushing against ideas of development that privilege the efficiency of systems that accelerate economic growth at the expense of human persons and their agency the essays in this volume show how development work that lacks sensitivity to human dignity is blind Instead genuine development must advance human flourishing and not merely promote economic betterment At the same time the essays in this book also demonstrate that human dignity must be assessed in the context of real human experiences and practices This volume therefore considers the meaning of human dignity inductively in light of development practice rather than simply providing a theory or philosophy of human dignity in the abstract It asks not only what is dignity but also how can dignity be done Through a unique multidisciplinary dialogue The Practice of Human Development and Dignity offers a dialectical and systematic examination of human dignity that moves beyond the current impasse in thinking

about the theory and practice of human dignity It will appeal to scholars in the social sciences philosophy and legal and development theory and also to those who work in development around the globe Contributors Paolo G Carozza Clemens Sedmak S verine Deneulin Simona Beretta Dominic Burbidge Matt Bloom Deirdre Guthrie Robert A Dowd Bruce Wydick Travis J Lybbert Paul Perrin Martin Schlag Luigino Bruni Lorenza Violini Giada Ragone Steve Reifenberg Elizabeth Hlabse Catherine E Bolten Ilaria Schnyder von Wartensee Tania Groppi Maria Sophia Aguirre and Martha Cruz Zuniga *Paradox in the Contrivance of Human Development* Robert Kowalski,2014-10-25 *Paradox in the Contrivance of Human Development* This book crosses disciplinary boundaries in a way that few books on human development do Its strengths come from the fresh perspectives which emerge from the diverse fields that the author draws upon e g Central Banking Child Protection Environment Extension Food Security SMEs Water and Sanitation to name a few It is an anthology of the authors recently published works with a leavening of contemporary material The objective is to draw this rich material into a coherent whole that will meet the needs and interests of professionals students and lay enthusiasts alike The authors insights come from his extensive experience juxtaposed with an academic perspective and educative engagement This experience has been gained over many years working with various international development agencies from multilateral and bilateral donors to International Financial Institutions UN agencies non government organisations national and local institutions The supportive underpinning scholarship is both eclectic and thoroughgoing augmenting essays on anthropology economics environment management philosophy psychology and sociology The end result is a unique exploration of the issues that confront the theory and practice of human development [Humanitarianism and the Quantification of Human Needs](#) Joël Glasman,2020-01-06 This book provides a historical inquiry into the quantification of needs in humanitarian assistance Needs are increasingly seen as the lowest common denominator of humanity Standard definitions of basic needs however set a minimalist version of humanity both in the sense that they are narrow in what they compare and that they set a low bar for satisfaction The book argues that we cannot understand humanitarian governance if we do not understand how humanitarian agencies made human suffering commensurable across borders in the first place The book identifies four basic elements of needs As a concept as a system of classification and triage as a material apparatus and as a set of standards Drawing on a range of archival sources including the United Nations Refugee Agency UNHCR M decins sans Fronti res MSF and the Sphere Project the book traces the concept of needs from its emergence in the 1960s right through to the present day and United Nations Secretary General Ban Ki moon s call for evidence based humanitarianism Finally the book assesses how the international governmentality of needs has played out in a recent humanitarian crisis drawing on field research on Central African refugees in the Cameroonian borderland in 2014 2016 This important historical inquiry into the universal nature of human suffering will be an important read for humanitarian researchers and practitioners as well as readers with an interest in international history and development **Human Development Report 1994** United Nations Development

dependence represents an intuitively contradictory and an immensely complex situation This scenario requires that national governments whose primary responsibility is towards their citizenry must relinquish a degree of control over state borders to constantly developing trans and multinational regimes and institutions Once state borders become permeable all sorts of issues related to rights earned or accrued due to membership of a national community come into question Given that neither individuals nor states can eschew the influence of the growing interdependence this new milieu is often described in terms of shrinking of the world into a global village This reshaping of the world requires us to broaden our horizons and re evaluate the manner in which we theorize human personhood within communal boundaries It also demands us to acknowledge that the relative decline of Euro American economic and political influence and the rise of Asian and Latin American states at the global level have created spaces in which a de territorialized and a de historicized notion of citizenship and state can now be explored The essays in this volume represent diverse disciplinary analytical and methodological approaches to understand what the implications are of being a citizen of both a nation state and the world simultaneously In sum Deconstructing Global Citizenship explores the question of whether a synthesis of contradictory national and global tendencies in the term global citizenship is even possible or if we are better served by fundamentally reconsidering our ideas of citizenship community and politics

People Forced to Flee Ninette Kelley, 2022

There are today some 60 million people who have fled their homes because of persecution and conflict. This is the highest number ever recorded. These people suffer exile that will likely last for years and even whole lifetimes, both present and future. The unprecedented scale and duration of forced displacement provide unsettling points of departure for the 2016 edition of *The State of the World's Refugees*. Covering the years since 2012, this volume is the seventh in a series of flagship publications by the Office of the United Nations High Commissioner for Refugees (UNHCR). This book draws upon expert analysis as well as UNHCR's direct experience to shed light on the root causes and consequences of the current humanitarian and development crisis. Its eleven chapters examine the world's evolving efforts to finance, plan and implement basic human rights protections amidst a recent spate of complex emergencies. Updated data, maps and case studies examine persistent challenges such as limited access to asylum abroad, protection gaps at home for internally displaced persons, the devastating consequences of statelessness and the troubling elusiveness of durable solutions. This book also highlights the widespread impact of climate change as well as innovations in how humanitarian operations are designed and conducted. Over 65 years after UNHCR was established, *A World in Turmoil* reveals why its work remains more relevant and urgent than ever.

People Forced to Flee United Nations High Commissioner for Refugees, 2022-02-16

People in danger have received protection in communities beyond their own from the earliest times of recorded history. The causes—war, conflict, violence, persecution, natural disasters and climate change—are as familiar to readers of the news as to students of the past. It is 70 years since nations in the wake of World War II drew up the landmark 1951 Convention relating to the Status of Refugees. *People Forced to Flee* marks this milestone. It is the latest in a long line of publications stretching back to 1993 that were previously entitled *The State of the World's Refugees*. The book traces the historic path that led to the 1951 Convention, showing how history was made by taking the centuries-old ideals of safety and solutions for refugees to global practice. It maps its progress during which international protection has reached a much broader group of people than initially envisaged. It examines international responses to forced displacement within borders as well as beyond them and the protection principles that apply to both. It reviews where they have been used with consistency and success and where they have not. At times the strength and resolve of the international community seems strong, yet solutions and meaningful solidarity are often elusive. Taking stock today at this important anniversary is all the more crucial as the world faces increasing forced displacement. Most is experienced in low and middle income countries and persists for generations. People forced to flee face barriers to improving their lives, contributing to the communities in which they live and realizing solutions. Everywhere an effective response depends on the commitment to international cooperation set down in the 1951 Convention, a vision often compromised by efforts to minimize responsibilities. There is growing recognition that doing better is a global imperative. Humanitarian and development action has the potential to be transformational, especially when grounded in the local context. *People Forced to Flee* examines how and where increased development investments in education, health and economic

inclusion are helping to improve socioeconomic opportunities both for forcibly displaced persons and their hosts In 2018 the international community reached a Global Compact on Refugees for more equitable and sustainable responses It is receiving deeper support People Forced to Flee looks at whether that is enough for what could and should help define the next 70 years
