## **From Apocalypse To Way Of Life Environmental Crisis In The American Century:**

From Apocalypse to Way of Life Frederick Buell, 2004-03 *From Apocalypse to Way of Life* is a comprehensive and in depth survey of environmental crisis as it has been understood for the last four decades Buell recounts the growing number of ecological and social problems critical for the environment and the impact that the growing experience with and understanding of them has had on American politics society and culture *From Apocalypse to Way of Life* Frederick Buell, 2003 In recent years the growing complexity of environmental devastation has produced suffocating political and cultural forces that only blunt our responses to it While the situation is bad we have in too many ways come to accept the deterioration of the planet Buell challenges the complacency of those who will dismiss the bearers of contemporary environmental warnings as mere Chicken Littles book cover *From Apocalypse to Way of Life* Frederick Buell, 2003

**DDT and the American Century** David Kinkela, 2011 *DDT and the American Century* Global Fictions and Environmental Disaster Martin Premoli, 2025-08-07 Examining contemporary literary depictions of environmental disasters through a North South axis this book explores the resonances and dissonances between environmentalisms of marginalized communities in the U S and the global South Pairing anti colonial texts from the United States with examples from the Global South it interrogates the complexity of global precarity and particular forms of environmental violence Each pairing is linked to a specific manifestation of environmental disaster such as hurricane drought species extinction and agricultural collapse Featuring texts from authors such as Jesmyn Ward Monique Roffey Paolo Bacigalupi Alexis Wright Linda Hogan Henrietta Rose Innes Ruth Ozeki and Sonora Jha this book models how a comparative global North global South approach to literary studies can help us untangle the complex power dynamics and differentials of the Anthropocene **The Oxford Handbook**

**of Millennialism** Catherine Wessinger, 2016-07 Seventh Day Adventists Melanesian cargo cults David Koresh s Branch Davidians and the Raelian UFO religion would seem to have little in common What these groups share however is a millennial orientation the audacious human hope for a collective salvation which may be either heavenly or earthly The Oxford Handbook of Millennialism offers readers an in depth look at both the theoretical underpinnings of the study of millennialism and its many manifestations across history and cultures **Environmental Sociology** John

Hannigan, 2014-03-26 The third edition of John Hannigan s classic undergraduate text has been fully updated and revised to highlight contemporary trends and controversies within global environmental sociology Environmental Sociology offers a distinctive balanced treatment of environmental issues reconciling Hannigan s much cited model of the social construction of environmental problems and controversies with an environmental justice perspective that stresses inequality and toxic threats to local communities **The Environment** Mohan K. Wali, Fatih Evrendilek, M. Siobhan Fennessy, 2009-07-30

Strongly grounded in the scientific method and evidence The Environment Science Issues and Solutions presents an organized accessible building block approach that introduces the principles of ecology This book examines the effects of

technology use and the unprecedented economic growth and development that has tipped the natural balance of the environment resulting in serious local regional and global environmental problems This comprehensive text explores the need for interrelated long term solutions for the prevention and mitigation of environmental problems **Class Divide** Howard Gillette, Jr., 2015-05-21 Members of the Yale College class of 1964 the first class to matriculate in the 1960s were poised to take up the positions of leadership that typically followed an Ivy League education Their mission gained special urgency from the inspiration of John F Kennedy s presidency and the civil rights movement as it moved north Ultimately these men proved successful in traditional terms in the professions in politics and in philanthropy and yet something was different Challenged by the issues that would define a new era their lives took a number of unexpected turns Instead of confirming the triumphal perspective they grew up with in the years after World War II they embraced new and often conflicting ideas In the process the group splintered In **Class Divide** Howard Gillette Jr draws particularly on more than one hundred interviews with representative members of the Yale class of 64 to examine how they were challenged by the issues that would define the 1960s civil rights the power of the state at home and abroad sexual mores and personal liberty religious faith and social responsibility Among those whose life courses Gillette follows from their formative years in college through the years after graduation are the politicians Joe Lieberman and John Ashcroft the Harvard humanities professor Stephen Greenblatt the environmental leader Gus Speth and the civil rights activist Stephen Bingham Although their Ivy League education gave them access to positions in the national elite the members of Yale 64 nonetheless were too divided to be part of a unified leadership class Try as they might they found it impossible to shape a new consensus to replace the one that was undone in their college years and early adulthood **Public Space and the Ideology of Place in American Culture** ,2009-01-01 We typically take public space for granted as if it has continuously been there yet public space has always been the expression of the will of some agency person or institution who names the space gives it purpose and monitors its existence And often its use has been contested These new essays written for this volume approach public space through several key questions Who has the right to define public space How do such places generate and sustain symbolic meaning Is public space unchanging or is it subject to our subjective perception Do we given the public nature of public space have the right to subvert it These eighteen essays including several case studies offer convincing evidence of a spatial turn in American studies They argue for a re visioning of American culture as a history of place making and the instantiation of meaning in structures boundaries and spatial configurations Chronologically the subjects range from Pierre L Enfant s initial majestic conceptualization of Washington D C to the post modern realization that public space in the U S is increasingly a matter of waste Topics range from parks to cities to small towns from open air museums to airports encompassing the commercial marketing of place as well as the subversion and re possession of public space by the disenfranchised Ultimately public space is variously imagined as the site of social and political contestation and of aesthetic

change     *Anticipatory Environmental (Hi)Stories from Antiquity to the Anthropocene* Christopher Schliephake, Evi Zemanek, 2023-02-06 *Anticipatory Environmental Hi Stories from Antiquity to the Anthropocene* studies the interplay of environmental perception and the way societies throughout history have imagined the future state of nature and the environments in which coming generations would live What sorts of knowledge were and are involved in outlining future environments What kinds of texts and narrative strategies were and are developed and modified over time How did and do scenarios and narratives of the past shape hi stories of the future This book answers these questions from a diachronic as well as a cross cultural perspective By looking at a diverse range of historical evidence that transcends stereotypical utopian and dystopian visions and allows for nuanced insights beyond the dichotomous reservoir of pastoral motifs and apocalyptic narratives the contributors illustrate the multifaceted character of environmental anticipation across the ages

*Ecoambiguity* Karen Thornber, 2012-03-02 Delving into the complex contradictory relationships between humans and the environment in Asian literatures     **Recomposing Ecopoetics** Lynn Keller, 2018-01-16 In the first book devoted exclusively to the ecopoetics of the twenty first century Lynn Keller examines poetry of what she terms the self conscious Anthropocene a period in which there is widespread awareness of the scale and severity of human effects on the planet *Recomposing Ecopoetics* analyzes work written since the year 2000 by thirteen North American poets including Evelyn Reilly Juliana Spahr Ed Roberson and Jena Osman all of whom push the bounds of literary convention as they seek forms and language adequate to complex environmental problems Drawing as often on linguistic experimentalism as on traditional literary resources these poets respond to environments transformed by people and take nature to be a far more inclusive and culturally imbricated category than conventional nature poetry does This interdisciplinary study not only brings cutting edge work in ecocriticism to bear on a diverse archive of contemporary environmental poetry it also offers the environmental humanities new ways to understand the cultural and affective dimensions of the Anthropocene     *Against Life* Alastair Hunt, Stephanie Youngblood, 2016-03-15 The contributors to *Against Life* think critically about the turn to life in recent theory and culture Editors Alastair Hunt and Stephanie Youngblood shape their collection to provocatively challenge the assumption rife throughout the humanities that life needs to be cultivated affirmed and redeemed The editors and their contributors explore how we might be better off daring to think ethics and politics as well as the project of the humanities in more radical terms as a refusal to choose life What forms of equality and freedom might emerge if we did not organize being together under signs of life Taken together the essays in *Against Life* mark an important turn in the ethico political work of the humanities

*Placing the Future* Johannes Glückler, Matthias Garschagen, Robert Panitz, 2025-06-07 This open access book offers a fresh perspective on the uncertainties of the future that humanity faces Leading scholars from the fields of future studies planning geography history sociology design and the humanities sensitize for the intricate role of geography in building knowledge to anticipate probable to imagine alternative and to enact desirable futures Part I knowing the future explores

strategies for anticipating possible futures such as foresight methods scenarios and guiding images This section underscores the importance of cultivating future consciousness to confront societal denial of looming threats like environmental crises Part II envisioning the future delves into various ways societies imagine their futures exploring topics like the future of food post growth economies extra terrestrial futures and even human self extinction to reveal how futurist scenarios can inform decision making and proactive planning Part III enacting the future focuses on the performative aspects of futuring The authors in this section examine practices such as designing performing advising and governing that are aimed at transforming desired futures into present realities As part of a series on the interdisciplinary nexus between knowledge and space this book is an essential resource for researchers policy makers planners students and practitioners in the fields of sustainability future studies regional development and governance

**Barry Commoner and the Science of Survival** Michael Egan, 2009-01-23 Chronicles the activist career of Barry Commoner one of the most influential American environmental thinkers and his role in recasting the environmental movement after World War II For over half a century the biologist Barry Commoner has been one of the most prominent and charismatic defenders of the American environment appearing on the cover of Time magazine in 1970 as the standard bearer of the emerging science of survival In Barry Commoner and the Science of Survival Michael Egan examines Commoner's social and scientific activism and charts an important shift in American environmental values since World War II Throughout his career Commoner believed that scientists had a social responsibility and that one of their most important obligations was to provide citizens with accessible scientific information so they could be included in public debates that concerned them Egan shows how Commoner moved naturally from calling attention to the hazards of nuclear fallout to raising public awareness of the environmental dangers posed by the petrochemical industry He argues that Commoner's belief in the importance of dissent the dissemination of scientific information and the need for citizen empowerment were critical planks in the remaking of American environmentalism Commoner's activist career can be defined as an attempt to weave together a larger vision of social justice Since the 1960s he has called attention to parallels between the environmental civil rights labor and peace movements and connected environmental decline with poverty injustice exploitation and war arguing that the root cause of environmental problems was the American economic system and its manifestations He was instrumental in pointing out that there was a direct association between socioeconomic standing and exposure to environmental pollutants and that economics not social responsibility was guiding technological decision making Egan argues that careful study of Commoner's career could help reinvigorate the contemporary environmental movement at a point when the environmental stakes have never been so high

**The Politics of Unsustainability** Ingolfur Bluhdorn, Ian Welsh, 2013-10-18 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer

societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of Environmental Politics      **Real Green** Dr Manuel

Arias-Maldonado,2013-04-28 What would a sustainable society look like How could it be achieved By challenging conventional wisdom about the ecological crisis and reframing the traditional values of green politics Real Green Sustainability after the End of Nature offers new answers to the key questions of the environmental debate In this ground breaking and challenging work Manuel Arias Maldonado convincingly argues that since nature has now been transformed into a part of the human environment it can be seen to no longer exist Ecological problems thus become an inevitable and normal feature of our relationship with nature Hence a post natural environmentalism realistic and liberal while remaining green is advocated In this framework sustainability democracy and liberalism become mutually reinforcing elements rather than conflicting ones Only by combining them can a green society be realised      *No Other Planet* Mathias

Thaler,2022-09-22 Investigates the role of hope and fear in our climate changed world by focusing on various expressions of the utopian imagination      *Citizen Environmentalists* James Longhurst,2012-06-22 A telling look at the lives and strategies of women environmental activists in the long 1960s solidly grounded in a national context
