From Civilian Power To Superpower The International Identity Of The European Union:

From Civilian Power to Superpower? R. Whitman, 1998-04-30 From Civilian Power to Superpower asserts that a new distinctive and significant actor has entered the international system The text explores how the European Union has become a significant international actor without transforming itself into a nation state The international context within which the Union now operates and the instruments now available at its disposal have undergone a convergence to create circumstances in which the relative significance of the Union and its uniqueness in the international system has been enhanced The European Union in the Security of Europe Steve Marsh, Wyn Rees, 2012-03-12 This book examines the European Union's contribution to providing security in Europe amidst an increasingly complex and challenging environment In this new and comprehensive guide to the EU's role in security since the end of the Cold War the authors offer an explanation of EU internal and external security regimes and argue that the Union has become an important exporter of security within its region However the Union's rhetorical ambitions and commitments continue to outstrip its capabilities and it lacks both a common conceptualisation of security and a meaningful shared strategic culture Drawing extensively on primary sources the book examines the Union's relations with the US and Russia in a time of shifting geostrategic calculations and priorities With the EU capacity for enlargement slowing this text presents a detailed assessment of EU security policies towards Central Europe the Mediterranean the Western Balkans Eastern Europe and South Caucasus European Union Security will be of interest to students and scholars of the EU security studies and international relations *The EU as a 'Global Player' in Human Rights?* Jan Wetzels, 2012-02-20 The Treaty of Lisbon has endowed the EU with a normative human rights framework that confirms recognition as a fully fledged regional mechanism for the protection of human rights The aim of this book is to contribute to the growing discussion of the external human rights dimension of the European Union Its theme sits at the crossroads between International and EU law Human Rights and Political Science In moving beyond well covered topics such as the protection of human rights within the EU or their relevance for the accession of new Member States this book asks the broader question of whether EU human rights law has any real relevance on a global scale In total The EU as a Global Player in Human Rights gives an overview of the international relevance of EU human rights law by means of exemplary case studies of the EU's institutional and substantive protection of human rights whilst consideration of non European perspectives from China and Japan underline its global focus This book will be of particular interest to researchers students and practitioners in International and European law Human Rights Law European studies and International Relations **International Relations and the European Union** Christopher Hill, Michael Smith, 2011-02-03 This text explores the ways in which the European Union frames and conducts its international relations Each chapter deals with the three key themes of the volume the EU as a sub system of international relations the EU and the processes of international relations and the EU as a power **The European Union's Roles in International Politics** Ole Elgström, Michael

Smith,2006-08-21 This volume sets out explicitly and systematically to bring together the two strands of political science the study of the EU s international activities and IR theory and thus to make a significant original contribution to a developing literature It provides both a conceptual and empirical argument the volume provides an innovative perspective on the analysis of the European Union as an international actor and on the ways in which EU actions are formed and have impact The volume deals with a number of topical issues in such areas as human rights global governance and the roles of international organizations It offers a research agenda based on rigorous development of the framework for role analysis and demonstrates the ways in which this agenda might be furthered *The Routledge Handbook of European Security* Sven

Biscop,Richard G. Whitman,2013 This new Handbook brings together key experts on European security from the academic and policy worlds to examine the European Union EU as an international security actor In the two decades since the end of the Cold War the EU has gradually emerged as an autonomous actor in the field of security aiming to safeguard European security by improving global security However the EU s development as a security actor has certainly not remained uncontested either by academics or by policy makers some of whom see the rise of the EU as a threat to their national and or transatlantic policy outlook While the focus of this volume is on the politico military dimension security will also be put into the context of the holistic approach advocated by the EU The book is organised into four key sections Part I The EU as an International Security Actor Part II Institutions Instruments and Means Part III Policies Part IV Partners This Handbook will be essential reading for all students of European Security the EU European Politics security studies and IR in general

European Union Peacebuilding and Policing Michael Merlingen,Rasa Ostrauskaite,2006-09-27 This new book provides an in depth analysis of the projects of improvement carried out by the civilian peacebuilding missions in Bosnia and Macedonia drawing on the work of Michel Foucault to make the case that the EU s self image as a model peacebuilder conceals another side of the European Security and Defence Policy The authors explore the double sided nature of peacebuilding missions on the one hand as a way to pacify democratize humanize and improve life in societies emerging from crisis or violence and on the other hand as a kind of political pastorate that limits the range of acceptable heterogeneity by refashioning repositioning and reorganizing subjects in line with transcendentalized notions of good governance The authors develop a limited reform agenda for how EU police missions can fold an agonistic generosity more deeply into their civilizing ethos in order to ensure they have a light expatriate footprint in their host countries The prescriptive part of the book also discusses generic problems in the implementation of EU police reforms and suggests ways to overcome these challenges This book will be of great interest to students of European politics sociology political science and theory **The European Union's Foreign Policy in Comparative Perspective** Ingo Peters,2015-11-19 This ground breaking volume provides a new perspective on the EU s foreign policy and offers a reconstruction of EU research that extends beyond narrow minded concepts of power and actorness Focusing on two intertwined research questions it presents a more sustainable base for studying EU foreign policy

What is the EU's foreign policy quality in terms of actorness and power compared to other types of actors in international relations and global politics? What factors influence the EU's foreign policy performance in comparison to states and international organizations? This guiding principle and application of a grounded theory or heuristic case study approach allows the book to deliver a structured comparative analysis of EU foreign policy comparing findings across policy fields, different legal foundations and respective policy modes of governance. This book will be of key interest to students and scholars of European Union studies, European Union foreign policy studies, international relations and security policy studies.

The Neighbours of the European Union's Neighbours Sieglinde Gstöhl, Erwan Lannon, 2016-02-24. Should the European Neighbourhood Policy stop at the borders of the European Union's immediate neighbouring countries? This book is the first full-length study of the EU's neighbours, a concept originally introduced by the European Commission with reference to Saharan Africa, the Middle East and Central Asia. These regions in the EU's broader neighbourhood are often perceived as an arc of crisis from which manifold challenges emanate for Europe. This timely book takes stock of the state of the EU's cooperation with the neighbours of its neighbours and explores how the concept might help promote security, stability and prosperity beyond the countries which are formally part of the European Neighbourhood Policy. How can the EU create bridges between these regions? What instruments does the EU have at its disposal and how can it link them in order to respond to the challenges and overcome the current fragmentation? One of the conclusions is the suggestion to consider a pragmatic EU Strategy for the Neighbours of its Neighbours which addresses the needs of the broader EU neighbourhood in a more systematic and consistent manner and helps transform in the long run the arc of crisis into another ring of friends.

The European Union and Global Development Johanne Døhlie Saltnes, 2021-08-19. This book systematically analyses the EU's commitment to a human rights-based approach to development through the lens of global justice theory. It identifies limits to the EU's approach and discusses how standardised policies, particularly in the case of human rights sanctions, may be perceived as neo-colonially intrusive and can come at the cost of recognizing the experiences and interests of vulnerable groups and allowing for partner countries' democratic ownership of their own development trajectory. Engaging with primary sources including official documents, reports and 45 semi-structured interviews with EU and member state officials, the book also presents a novel explanation for why the EU at times steps out of its commitment to rights-based development and chooses differentiated foreign policy responses to similar situations. This book will be of key interest to scholars and students of EU foreign policy, EU development policy, human rights and international relations, as well as policy practitioners working in the fields of development, human rights and democracy promotion.

European Union and New Regionalism Mario Telò, 2018-02-06. This title was first published in 2001. This is a collection of papers that look at the structure of the global economy and its changing paradigms over the years. The contributors look at how the classic concept of state autonomous, sovereign and freed of all constraint never really reflected the reality of the international scene despite the role it has played.

in realist and neo realist theory for many decades Instead they consider that the political social and economic characteristics originally attributed to states seem increasingly to be expressed through regional constructs The papers in this volume show that even within regionalism there are a variety of different models that exist and examine five of those models the European Union Mercosul Mercosur the North American Free Trade Area NAFTA the Association of South East Asian Nations ASEAN and the South African Development Community SADC

The Actors of Postnational Rule-Making Elaine

Fahey,2015-07-16 Despite its centrality to academic discussions of power and influence there is little consensus in legal scholarship over what constitutes an actor in rule making This book explores the range of actors involved in rule making within European Union law and Public International law and focuses especially on actors that are often overlooked by formative and doctrinal approaches Drawing together contributions from many scholars in various fields the book examines such issues as the accommodation of new actors in the process of postnational rule making the visibility or covertness of actors within the process and the role of social acceptance and legitimacy in postnational rule making In its endeavour to render and examine the work and effect of actors often side lined in the study of postnational rule making this book will be of great use and interest to students and scholars of EU law international law and socio legal studies

The European Union and Emerging Powers in the 21st Century Sven Biscop,2016-02-11

The emergence of new powers fundamentally questions the traditional views on international relations multilateralism or security as a range of countries now competes for regional and global leadership economically politically technologically and militarily As the focus of international attention shifts from the Atlantic to the Pacific the European states in particular are seen to lose influence relative to the emerging economic powerhouses of China Russia India and Brazil European nations find themselves too small to engage meaningfully with these continent sized powers and in an increasingly multipolar world are concerned their influence can only continue to decline This book analyses the shifts in the structure of global power and examines the threats and opportunities they bring to Europe Leading European Contributors reflect on how the EU can utilise collective strength to engage and compete with rapidly developing nations They examine perceptions of the EU among the emerging powers and the true meaning and nature of any strategic

partnerships negotiated Finally they explore the shape and structure of the international system in the 21st century and how the EU can contribute to and shape it **European Union and New Regionalism** Professor Mario Telò,2014-08-28
