From Here To Free Trade Essays In Post Uruguay Round Trade Strategy:

From Here to Free Trade Ernest H. Preeg, 1998-05-13 In his new book Ernest Preeg analyzes international trade and investment in the 1990s and lays out a comprehensive U S trade strategy for the uncertain period ahead He examines the influence of the World Trade Organization WTO and argues that economic globalization is beneficial to the U S economy in the short to medium term while raising important questions about national sovereignty and security over the longer term Preeg believes regional free trade agreements will soon encompass the majority of world trade but they can conflict with the WTO s multilateral objectives The central challenge for U S trade strategy then is to integrate the now largely separate multilateral and regional tracks of the world trading system The first essay assesses U S interests in economic globalization the second examines recent steps toward free trade at the multilateral and regional levels and the next three offer an in depth critique of U S regional free trade objectives in the Americas across the Pacific and possibly with Europe The final essay presents a multilateral regional synthesis for going from here to free trade over the coming decade

The United States, the European Union, and the Globalization of World Trade Thomas C. Fischer,2000-04-30 Professor Fischer presents a comprehensive overview of global trade at the start of a new century from a national regional and international viewpoint He looks closely at the four dominant and competing economic systems the United States the European Union Japan and China and argues that the traditional we win you lose national trade paradigm has been replaced by one that is more collaborative one that is leaning toward de facto world governance He compares foreigners attitudes toward trade and markets with our own using four economic models that typify world trade today He examines the interface between national regional and international trading systems and between business and government then at the prospect of global trade management in different trade sectors under the GATT WTO and other organizations The result is a provocative discussion of global trade today Professor Fischer makes it clear that the United States needs allies Though its influence in the world trade arena will continue America s hegemony has ended The European Union is America s most obvious ally but it has many problems and ambitions of its own The North American Free Trade Agreement has solidified the North American market but it may isolate and lose South America while Japan China Russia and others are left to develop alliances of their own All these factors raise important global questions among them Can American capitalism prevail Should the United States proceed unilaterally as it has so often Or are regional and multinational arrangements preferable If there is further globalization as seems inevitable and if American influence is on the wane what group or organization will lead To explore these questions and provide the beginnings of answers Professor Fischer uses his four competing economic systems and handicaps the process country by country sector by sector with particular attention to transatlantic relations

Import Propensities of Industrialized Countries J. Lutz,2016-04-30 This volume analyzes the import patterns of selected countries to determine which nations are active importers and which ones import much less than expected The majority of the work focuses on the industrialized countries which are at the center of the international trading system determining which are very active importers and which are not Controls for wealth size and membership in customs areas are included Countries importing at levels below predicted ones are the countries likely to be most effective at protecting domestic industries from foreign competition For example the results permit an evaluation of the arguments that Japan has

consistently imported less than would be expected due to the presence of barriers protecting the domestic market

Agents of Neoliberal Globalization Michael C. Dreiling, Derek Y. Darves, 2016-09-26 Depictions of globalization commonly recite a story of a market unleashed bringing Big Macs and iPhones to all corners of the world. Human society appears as a passive observer to a busy revolution of an invisible global market paradoxically unfolding by its own energy. Sometimes this market is thought to be unleashed by politicians working on the surface of an autonomous state. This book rejects both perspectives and provides an analytically rich alternative to conventional approaches to globalization. By the 1980s an enduring corporate coalition advanced in nearly synonymous terms free trade, tax cuts and deregulation. Highly networked corporate leaders and state officials worked in concert to produce the trade policy framework for neoliberal globalization. Marshalling original network data and a historical narrative, this book shows that the globalizing corporate titans of the late 1960s aligned with economic conservatives to set into motion this vision of a global free market.

Reluctant Partners Andrew Gardner Brown, 2009-12-21 Examines how and why nations have succeeded in forming cooperative trade arrangements. *Korea's Economic Prospects* O. Yul Kwon, William Shepherd, 2001-01-01 very well presented academic book in Korea's Economic Prospects a valuable source of research material on the economy and its prospects. It will help one to understand the factors leading to the Korean recovery which has recently been recognised by the credit rating agency Marie Aim e Tourres. The Journal of Development Studies. This book examines the major issues arising from the Korean financial crisis of 1997. It considers the strong prospects for rapid economic recovery and the emerging changes in Korea's international economic relations and business environment. The authors investigate the causes of the financial crisis and provide an evaluation of remedial measures and reforms currently being introduced in both private and public sectors of the Korean economy. The book identifies a paradigm shift in Korean economic policy and discusses Korea's new role in both the regional and global economy. It also examines the major developments reshaping Korea's international business environment through fundamental policy shifts in trade, foreign direct investment, labor relations, management practices and the emerging trends in e-commerce.

The Challenge of Global Capitalism Robert G. Gilpin, 2018-06-05 Many individuals proclaim that global capitalism is here to stay. Unfettered markets, they argue, now drive the world and all countries must adjust, no matter how painful this may be for some. Robert Gilpin, author of the widely acclaimed *Political Economy of International Relations* (Princeton, 1987), urges us, however, not to take an open and integrated global economy for granted. Rather, we must consider the political circumstances that have enabled global markets to function and the probability that these conditions will continue. Gilpin's new book amounts to a magisterial inquiry into all major aspects of the contemporary world political economy. Beginning with the 1989 end of the Cold War and the subsequent collapse of communism, it focuses on globalization and rapid technological change and covers a broad sweep of economic developments and political cultures. Gilpin demonstrates the fragility of a global and integrated economy and recommends

what can be done to strengthen it The international community has another chance to solidify the global market economy that collapsed with the outbreak of World War I Yet writes Gilpin the full implications of this historic development for international affairs are not yet clear Will socialist economies make a successful transition to market type economies What role will a dynamic China play in the world economy Will the United States continue to exercise leadership or gravitate toward self centered policies Gilpin explores such questions along with problems in the areas of trade liberalization multinational corporations and destabilizing financial flows He also investigates the struggles of less developed countries and the spread of economic regionalism particularly in Europe North America and Pacific Asia which directly threatens an open world economy The author maintains that global capitalism and economic globalization have rested and must continue to rest on a secure political foundation However this foundation has eroded since the end of the Soviet threat To ensure survival of the global economy Gilpin concludes the United States and other major powers must recommit themselves to working together to rebuild its weakened political foundations
