## **From Homer To Hypertext Studies In Narra:**

**From Homer to Hypertext** Hans Balling, Anders Klinkby Madsen, 2002 The articles in this anthology discuss the connection between the rhetorical and narrative manifestations of literature and the media and communicative structures in which they appear Background literature is described from antique Greece to the present The conception of literature is here a formal construction rather than an expression of a certain aesthetic perception The book is structured in three themes Tradition and Authority about the relations between the author and the tradition in post modern literature Narrative Technique about the role of the author and Textuality and Hypertext concentrating on the textuality of literature in modernistic lyrics and the digitalized hypertext [Voice, Text, Hypertext](#) Raimonda Modiano, Leroy F. Searle, Peter L. Shillingsburg, 2016-06-01 Voice Text Hypertext illustrates brilliantly why interest in textual studies has grown so dramatically in recent years For the distinguished authors of these essays a text is more than a document or material object It is a cultural event a matrix of decisions an intricate cultural practice that may focus on religious traditions modern underground literary movements poetic invention or the irreducible complexity of cultural politics Drawing from classical Roman and Indian to modern European traditions the volume makes clear that to study a text is to study a culture It also demonstrates the essential importance of heightened textual awareness for contemporary cultural studies and critical theory and indeed for any discipline that studies human culture
