From Land To Mouth Understanding The Food System:

From Land to Mouth Brewster Kneen, 1993 Tells the story of how the global food system functions Enables readers to begin to create localized sustainable food systems built on justice and community

From Land to Mouth Brewster Kneen, 1989 *Concentration and Power in the Food System* Philip H. Howard, 2021-09-09 Who controls what we eat This book reveals how dominant corporations from the supermarket to the seed industry exert control over contemporary food systems It analyzes the strategies these firms are using to reshape society in order to further increase their power particularly in terms of their bearing upon the more vulnerable sections of society such as recent immigrants ethnic minorities and those of lower socioeconomic status Yet this study also shows that these trends are not inevitable Opposed by numerous efforts from microbreweries to seed saving networks it explores how opposition to this has encouraged even the most powerful firms to make small but positive changes This revised edition has been updated to reflect recent developments in the food system as well as the broad political economic forces that shape them It also examines the rapidly changing technologies such as Big Data and automation which have the potential to reinforce as well as to challenge the power of the largest firms

Civil Society and Social Movements in Food System Governance Peter Andrée, Jill K. Clark, Charles Z. Levkoe, Kristen Lowitt, 2019-01-30 This book offers insights into the governance of contemporary food systems and their ongoing transformation by social movements As global food systems face multiple threats and challenges there is an opportunity for social movements and civil society to play a more active role in building social justice and ecological sustainability Drawing on case studies from Canada the United States Europe and New Zealand this edited collection showcases promising ways forward for civil society actors to engage in governance The authors address topics including the variety of forms that governance engagement takes from multi stakeholderism to co governance to polycentrism self governance the values and power dynamics that underpin these different types of governance processes effective approaches for achieving desired values and goals and the broader relationships and networks that may be activated to support change By examining and comparing a variety of governance innovations at a range of scales the book offers insights for those considering contemporary food systems and their ongoing transformation It is suitable for food studies students and researchers within geography environmental studies anthropology policy studies planning health sciences and sociology and will also be of interest to policy makers and civil society organisations with a focus on food systems The Open Access version of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9780429503597> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Remaking the North American Food System C. Clare Hinrichs, Thomas A. Lyson, 2007 Examines the resurgence of interest in rebuilding the links between agricultural production and food consumption With examples from Puerto Rico to Oregon to Quebec this work offers a North American perspective attuned to trends toward globalization at the level of markets and governance and shows how

globalization affects specific localities **Food, Farms, and Community** Lisa Chase, Vern Grubinger, 2014-12-02

Throughout the United States people are increasingly concerned about where their food comes from how it is produced and how its production affects individuals and their communities The answers to these questions reveal a complex web of interactions While large distant farms and multinational companies dominate at national and global levels innovative programs including farmers markets farm to school initiatives and agritourism are forging stronger connections between people and food at local and regional levels At all levels of the food system energy use climate change food safety and the maintenance of farmland for the future are critical considerations The need to understand food systems what they are who s involved and how they work or don t has never been greater Food Farms and Community Exploring Food Systems takes an in depth look at critical issues successful programs and challenges for improving food systems spanning a few miles to a few thousand miles Case studies that delve into the values that drive farmers food advocates and food entrepreneurs are interwoven with analysis supported by the latest research Examples of entrepreneurial farms and organizations working together to build sustainable food systems are relevant to the entire country and reveal results that are about much more than fresh food Healing God's Earth S. Roy Kaufman, 2013-08-02 Rural communities and traditional cultures throughout

North America and around the world are being systematically dismantled by the forces of urban civilization It is no new phenomenon For over four millennia the powers of urban civilization have been playing God oppressing people and exploiting the earth This long history has brought us to the brink of disaster in the current economic ecological and energy crises confronting the dominant global culture This book reads the Bible through the lenses of rural communities The Bible has something to say about the origin and character of urban civilization and the dynamic of its relationship to rural communities Both Israel in the Old Testament and Jesus in the New Testament were engaged in the formation of rural communities of faith living as alternatives to the dominant cultures of the urban civilizations in which they lived It turns out that local face to face communities both rural and urban along with traditional cultures of all stripes are God s chosen instruments for the subversive nonviolent disarming of urban civilization and the healing of God s earth *Writing Off the Rural West* Parkland

Institute, 2001-09 This collection reveals the situation in rural Canada in a new light but more than that it shows us that the ability to renew our rural communities remains within our grasp if we have the will to do so BOOK JACKET **A Handbook**

of Food Crime Allison Gray, Ronald Hinch, 2019-10-09 Food today is over corporatized and under regulated It is involved in many immoral harmful and illegal practices along production distribution and consumption systems These problematic conditions have significant consequences on public health and well being nonhuman animals and the environment often simultaneously In this insightful book Gray and Hinch explore the phenomenon of food crime Through discussions of food safety food fraud food insecurity agricultural labour livestock welfare genetically modified foods food sustainability food waste food policy and food democracy they problematize current food systems and criticize their underlying ideologies

Bringing together the best contemporary research in this area they argue for the importance of thinking criminologically about food and propose radical solutions to the realities of unjust food systems

New Directions in Agrarian Political Economy Ryan Isakson, 2017-10-02 How relevant are the classic theories of agrarian change in the contemporary context This volume explores this question by focusing upon the defining features of agrarian transformation in the 21st century the financialization of food and agriculture the blurring of rural and urban livelihoods through migration and other economic activities forest transition climate change rural indebtedness the co evolution of social policy and moral economies and changing property relations Combined the eleven contributions to this collection provide a broad overview of agrarian studies over the past four decades and identify the contemporary frontiers of agrarian political economy In this path breaking collection the authors show how new iterations of long evident processes continue to catch peasants and smallholders in the crosshairs of crises and how many manage to face these challenges developing new sources and sites of livelihood production This volume was published as part one of the special double issue celebrating the 40th anniversary of the Journal of Peasant Studies

Soy, Globalization, and Environmental Politics in South America Gustavo de L. T. Oliveira, Susanna B. Hecht, 2017-10-24 Soy in South America constitutes one of the most spectacular booms of agro industrial commodity production in the world It is the pinnacle of modernist agro industrial practices serving as a key nexus in food feed fuel production that underpins the agribusiness conservationist discourse of land sparing through intensification Yet soy production is implicated in multiple problems beyond deforestation ranging from pesticide drift and contamination to social exclusion and conflicts in frontier zones to concentration of wealth and income among the largest landowners and corporations This book explores in depth the complex dynamics of soy production from its diverse social settings to its transnational connections examining the politics of commodity and knowledge production the role of the state and the reach of corporate power in everyday life across soy landscapes in South America Ultimately the collection encourages us to search and struggle for agroecological alternatives through which we may overcome the pitfalls of this massive transnational capitalist agro industry This book was originally published as a special issue of The Journal of Peasant Studies

Good Crop/Bad Crop Devlin Kuyek, 2007-11-01 In recent years Canadians have become more and more concerned about the origins of their food and the environmental impacts of pesticides in agriculture What is less well known is that pesticide corporations such as Monsanto and DuPont have bought their way into the seed industry and are taking control of what was once the exclusive domain of farmers In Good Crop Bad Crop Devlin Kuyek deftly examines the economic and environmental background of the modern seed trade from a Canadian perspective Historically seeds were viewed more as public goods than as commodities and plant breeding objectives were widely shared by scientists governments and farmers Now that approach is changing seeds have become increasingly commodified and plant breeding has become subject to corporate priorities Farmers and citizens in Canada Kuyek points out need to heed the hard won lessons from the developing world where

farmers greatly damaged by the much heralded approaches of the Green Revolution are now taking steps to reclaim control over seed supplies food security and their futures
