From Bauhaus T Our:

From Bauhaus to Our House Tom Wolfe, Heberto Padilla, 1981 The strange saga of American architecture in the 20th century makes for both comedy and intellectual excitement as Wolfe debunks the Euro gods of modern and postmodern architecture and their American counterparts

From Bauhaus to Our House Tom Wolfe, 2025-02-04 Wolfe takes European architects and Bauhaus art school founder Walter Gropius to task for their glass and steel box buildings which have influenced American cities

From Bauhaus to Our House Tom Wolfe, 1981 The strange saga of American architecture in the 20th century makes for both comedy and intellectual excitement as Wolfe debunks the Euro gods of modern and postmodern architecture and their American counterparts

From Bauhaus to Our House Tom Wolfe, 1981

From Bauhaus to Our House Tom Wolfe, 1981 *New York Magazine*, 1981-11-02 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea

From Bauhaus to Our House Tom Wolfe, Paul

Theroux, 1981 *The Postmodernist Turn* J. David Hoeveler, 2004 During the 1970s the United States became the world's preeminent postindustrial society The new conditions changed the way Americans lived and worked and even their perceptions of reality Americans struggled to find their place in a world where symbol became more important than fact appearance more important than reality where image supplanted essence In this reassessment of a little studied decade J David Hoeveler Jr finds that the sense of detachment and dislocation that characterizes the postindustrial society serves as a paradigm for American thought and culture in the 1970s The book examines major developments in literary theory philosophy architecture and painting as expressions of a 1970s consciousness Hoeveler also explores the rival political readings of these subjects and considers the postmodernist phenomenon as it became an ideological battleground in the decade Clear and engaging the work will be of great interest to historians theorists and everyone who wants to further explore the 1970s

Lehmann-Haupt, 1981 The Theory of Architecture Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts

Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible

format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopian thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text

Rethinking the Arts after Hegel

Richard Dien Winfield, 2023-10-18 In this book Richard Dien Winfield builds upon Hegel's Aesthetics to provide a comprehensive and systematic analysis of the individual fine arts which remedies Hegel's inconsistencies and major omissions In addition to conceiving the general aesthetics and particular stylistic forms of architecture sculpture painting music and literature Winfield determines the fundamental character of the new arts of photography and cinema that the master thinkers of aesthetics never had the opportunity to consider Winfield's analysis covers a wide ranging array of artistic creations from diverse periods and cultures while engaging in debate with the most important aesthetic theorists of the past and present

The

Geography of Hope Chris Turner, 2010-04-30 After the fierce warnings and grim predictions of *The Weather Makers* and *An Inconvenient Truth* acclaimed journalist and national bestselling author Chris Turner finds hope in the search for a sustainable future Point of no return The chilling phrase has become the ubiquitous mantra of ecological doomsayers a troubling headline above stories of melting permafrost and receding ice caps visions of catastrophe and fears of a problem with no solution Daring to step beyond the rhetoric of panic and despair *The Geography of Hope* points to the bright light at the end of this very dark tunnel With a mix of front line reporting analysis and passionate argument Chris Turner pieces together the glimmers of optimism amid the gloom and the solutions already at work around the world from Canada's largest wind farm to Asia's greenest building and Europe's most eco friendly communities But *The Geography of Hope* goes far beyond mere technology Turner seeks out the next generation of political economic social and spiritual institutions that could provide the global foundations for a sustainable future from the green hills of northern Thailand to the parliament houses of

Scandinavia from the villages of southern India where microcredit finance has remade the social fabric to America's most forward thinking think tanks In this compelling first person exploration punctuated by the wonder and angst of a writer discovering the world's beacons of possibility Chris Turner pieces together a dazzling map of the disparate landmarks in a geography of hope While most of the world has been spinning in stagnant circles of recrimination and debate on the subject of climate change paralyzed by visions of apocalypse both natural if nothing of our way of life changes and economic if too much does Denmark has simply marched off with steadfast resolve into the sustainable future reaching the zenith of its pioneering trek on the island of Sams And so if there's an encircled star on this patchwork map indicating hope's modest capital then it should be properly placed on this island Perhaps for the sake of precision at the geographic centre of Jrgen Tranberg's dairy farm There are I'm sure any number of images called to mind by talk of ecological revolution and renewable energy and sustainable living but I'm pretty certain they don't generally include a hearty fiftysomething Dane in rubber boots spotted with mud and cow shit Which is why Sams's transformation is not just revolutionary but inspiring not just a huge change but a tantalizingly attainable one And it was a change that seemed at its most workaday near effortless no more remarkable than the cool October wind gusting across the island down on Tranberg's farm from *The Geography of Hope*

God and Enchantment of Place David Brown, 2004-10-15 David Brown argues for the importance of experience of God as mediated through place in all its variety He explores the various ways in which such experiences once formed an essential element in making religion integral to human life and argues for their reinstatement at the centre of theological discussions about the existence of God In effect the discussion continues the theme of Brown's two much praised earlier volumes *Tradition and Imagination* and *Discipleship and Imagination* in its advocacy of the need for Christian theology to take much more seriously its relationship with the various wider cultures in which it has been set In its challenge to conventional philosophy of religion the book will be of interest to theologians and philosophers and also to historians of art and culture generally
