Desistance is one of the big news stories of the criminological world Research suggests that as offenders turn their backs on crime they often change their identities as well as their behaviour Yet we know much less about how reforming or transforming identity might be affected by gender age or ethnicity This book focuses on diversity and showcases research from a wide range of authors in the field It considers the similarities and differences between desisting from crime and recovering from addiction Taking the desistance and recovery debates in unfamiliar directions it examines the experiences of change for individuals seeking healthier and more successful futures

Ebook: Urban Economics O'SULLIVAN, 2012-01-16 Ebook Urban Economics **From Mafia to Organised Crime** Anna Sergi, 2017-07-19

This book presents primary research conducted in Italy USA Australia and the UK on countering strategies and institutional perceptions of Italian mafias and local organized crime groups Through interviews and interpretation of original documents this study firstly demonstrates the interaction between institutional understanding of the criminal threats and historical events that have shaped these perceptions Secondly it combines analysis of policies and criminal law provisions to identify how policing models which combat mafia and organised crime activities are organized and constructed in each country within a comparative perspective After presenting the similarities between the four differing policing models Sergi pushes the comparison further by identifying both conceptual and procedural convergences and divergences across both the four models and within international frameworks By looking at topics as varied as mafia mobility money laundering drug networks and gang violence this book ultimately seeks to reconsider the conceptualizations of both mafia and organized crime from a socio behavioural and cultural perspective

Highlights from 20 Years of Surveying Crime Victims Marianne W. Zawitz, United States. Bureau of Justice Statistics, 1993 Graphs *The New And Complete Dictionary Of The English Language* John Ash, 1775 **Understanding Penal Practice** Ioan Durnescu, Fergus

McNeill, 2013-10-30 Criminological and penological scholarship has in recent years explored how and why institutions and systems of punishment change and how and why these changes differ in different contexts. Important though these analyses are, this book focuses not so much on the changing nature of institutions and systems but rather the changing nature of penal practice and practitioners. Bringing together leading researchers from around the world, this collection unites studies that aim to describe and critically analyse penal practice with studies that investigate its effectiveness and prescribe its future development. Reversing penology's usual preoccupation with the prison, the book focuses mainly on penal practice in the community, i.e. on probation, parole, offender supervision and community corrections. The first part of the book focuses on understanding practice and practitioners, exploring how changing social, cultural, political and organisational contexts influence practice and how training, development, professional socialisation and other factors influence practitioners. The second part is concerned with how practitioners can be best supported to develop the skills and approaches that seem most likely to generate positive impacts. It contains accounts of new practice models and approaches as well as reports of research projects seeking both to discover and to encourage effective practices. This book explores internationally significant and cutting edge theoretical and empirical work on the cultures, practices, roles and impacts of frontline practitioners in delivering penal sanctions. As such, it will be of interest to researchers in criminology, social work and social policy as well as correctional policy makers and those involved in community supervision.

Routledge International Handbook of Critical Policing Studies Nicole L. Asquith, Jess Rodgers, James Clover, Gary Cordner, Angela Dwyer, Rishweena Ahmed, 2025-06-06 Critical analyses of policing have accompanied accounts of the police since the early days of modern police organisations. More so than ever, police and policing are subject to close and critical scrutiny from governments and the public. It is timely therefore to consider what is critical about police and policing. The Routledge International Handbook of Critical Policing Studies brings together scholars and practitioners to critically explore the full continuum of safety governance from police reforms to the redistribution of policing resources to the replacement of state police. In offering the three Rs of policing: reform, redistribute, replace, we provide a conceptualisation of critical policing studies that acknowledges a continuum of policing that mirrors the different trajectories, priorities and possibilities that exist across different cultural and historical contexts. This collection is composed of 65 scholars and practitioners across 39 chapters, edited by a team of police academics and policing scholars to showcase accounts of policing from outside the Anglo-European metropole, privileging works from First Nations people and from the Global South and presenting contextualised solutions to the problems facing police and communities. This Handbook identifies the key issues facing the police and safety governance across the globe and offers insights into the implications for policing theory and practice, proposing solutions to some of the most intransigent problems facing contemporary societies. Individually and as a collection, this Handbook will be an essential read for scholars, practitioners and activists alike.

Desistance Transitions and the Impact of Probation Sam

King,2013-10-01 Moving away from criminal behaviour can be fraught with difficulties Often it can involve leaving behind old habits customs and even friends while at the same time adopting a new way of life How do individuals go about making a decision to give up crime How do they plan to sustain this decision And in what ways does probation help This book explores these questions Based on in depth interviews with a group of men under probation supervision Sam King investigates the factors associated with making a decision to desist from crime The book examines strategies for desistance and explores the factors that individuals consider when they are thinking about how they will desist In doing so the book sheds new light on existing understandings of desistance from crime and helps to develop our understandings of the role that individuals play in constructing their own desistance journeys This book also highlights the role of probation in this process offering a timely and critical review of the nature of probation under the New Labour government in the UK between 1997 2010 The findings indicate that we should allow Probation Officers greater autonomy and discretion within their roles and that we should free them from the bureaucracy of risk assessment and targets Moreover the book warns against the potential fragmentation of community supervision As such the book will be of interest to criminology students researchers academics policymakers and practitioners particularly those who work with ex offenders in the community
