The WTO and the Regulation of International Trade Nicholas Perdikis, Robert Read, International Economics Study Group, 2005-01-01 The book is an excellent introduction to understanding the principal trade disputes between the United States and EU over the last decade and a half International Trade Law and Regulation This book provides a critical overview and assessment of the WTO's dispute settlement procedures in the context of several recent trade related disputes between the EU and the US *Doha Development Round: Why did it fail?* Anna E. Richter, 2014-09-01 The Doha Development Agenda may go down in history as the slowest development round of all times Starting in 2001 negotiations have been going on for 13 years and collapsed on several occasions in the meantime With regards to its goal to ensure developing countries and especially the least developed among them a share in the growth of world trade barely any progress was made To the extent that one may question how legitimate it is to call the Doha Round a Development Round at all Especially the notorious point of trade liberalization in agriculture has delayed the negotiations While the WTO member states agreed on cutting tariffs and reducing agricultural subsidies opinions differ sharply on exemptions for certain products from these broad rules In another critical point services negotiations have hardly progressed The WTO negotiators have missed every deadline agreed upon and various observers suggested to drop the entire venture The aim of this paper is to find the reasons for the slow progress in order to see if the obstacles may be overcome and the Doha Round might be completed successfully

**From Doha to Cancún** Ivan Mbirimi, Bridget Chilala, Roman Grynberg, 2003 This paper brings together articles relating to key issues of trade liberalisation under negotiation in the Doha Development Round The focus is on the likely direction and outcome of negotiations on each issue and how the proposed outcomes could affect developing countries Published as part of the Secretariat's efforts to prepare developing countries for multilateral trade negotiations this title aims to bring fresh perspectives to the negotiations in Geneva *Staying Together* Nicholas Bayne, 2017-11-28 Following on from *Hanging In There* this comprehensive volume empirically covers the summits from the UK meeting in Birmingham in 1998 to the UK meeting in 2005 In essence this study reviews a full G8 cycle The analytical framework rests on three general summit objectives political leadership reconciling international domestic and collective management and six subject specific performance indicators leadership effectiveness solidarity durability acceptability consistency Including a detailed look at summits pre Birmingham it reviews developments from 1998 by examining each summit from the subsequent summit performances such as financial issues and debt trade issues and development to the most recent discussion on Africa terrorism and weapons of mass destruction Moreover it covers the development of the G8 apparatus the impact of Russia's membership and links with non G8 governments and non state actors It concludes with an assessment as to whether the G8 achieves its three general summit objectives **Fisheries Subsidies under International Law** Chen-Ju Chen, 2010-09-17 Subsidies to fisheries have been in existence for centuries However these remained outside the spotlight of the international

community until the turn of this century when the negative effects that fisheries subsidies have on international trade the environment and sustainable development became increasingly clear As a result the Doha Round Negotiations set the parameters for an effective fisheries subsidies regime WTO Members thus embarked in intensive negotiations with the collaboration of various international organizations These negotiations culminated with publication of the legal text of the Chairman of the Negotiating Group on Rules in 2007 which reflects to a large extent the mandates of the Ministerial Conferences and reconciles the diverse interests of the negotiators The EU as a major WTO Member and with its own Common Fisheries Policy which has been in effect for a number of years can serve as the basis for comparison and improvement of the proposed regulations

*The Power to Persuade* Angela Geck, 2024-06-03 The Power to Persuade provides an innovative and eye opening analysis of strategic arguing as a means of power in global politics Based on an empirical case study of arguing processes in the World Trade Organization WTO the book shows how discursive contexts institutional norms and procedures and unequal human resources condition who has the power to persuade While accounts of arguing in international relations are typically based on a notion of arguing as a power free mode of interaction oriented towards understanding Angela Geck shows how such an approach precludes the question of persuasive power Drawing on in depth interviews with Geneva diplomats and a document based analysis of the negotiations on two Doha Round issues the book examines the practices governing strategic arguing in the WTO and uncovers two sources of persuasive power firstly prevalent discourses and connected regime norms empower some actors over others secondly their ability to debate is conditioned by exclusionary procedures and unequal human resources Offering a grounded theory of strategic arguing in trade politics The Power to Persuade presents a novel analysis of the relationship between arguing and power

International Economic Law and the Digital Divide Rohan Kariyawasam, 2008-01-01 In this well researched book the author explains the digital divide and its repercussions for developed and developing nations In his view the overzealous disciplining at the WTO level of instruments affecting trade notwithstanding developing countries still have important tools in their hands intellectual property protection competition policies tax regimes that can help them attract foreign direct investment a crucial ingredient in reducing the current divide Borrowing from the institutions that we have seen developed in international economic relations is highly recommended as well In short whether the divide will continue to persist or conversely whether it will gradually become a historical feature of international relations critically depends on the political will on both sides of the divide The author makes a persuasive argument to support his thesis empirically researched and with strong foundations in theory Petros C Mavroidis Columbia Law School US and University of Neuchâtel Switzerland This path breaking book focuses on the WTO e commerce and information communications technologies It sheds light on how international economic law can be used as a

tool in the application of technological processes to facilitate development in developing countries Rohan Kariyawasam begins by looking predominantly at the rise of international digital networks He offers an introduction to the networks used in the delivery of electronic products and network based transactions and the application of WTO law to the sector He then suggests how developing countries can use economic law and technology to tap digital markets in the developed world The book also argues that the advance of basic living standards in some developing countries can be achieved through technological processes but that this cannot happen without such states paying greater attention to the enforcement of economic social and cultural rights at home Picking up the property rights debate including through bilateral trade the author argues that ensuring beneficial technology transfer will require balancing foreign investor rights to protect intellectual property It will also involve restrictions imposed by competition law and WTO surveillance to check the possible misuse of market power by multinational companies The proposed mixture of measures should he argues provide incentives for Foreign Direct Investment Providing a thorough review of the application of WTO law to the telecommunications sector and the regulation of international digital networks this book will be of great interest to postgraduate students in international economic law and international development law as well as those interested in human rights law and technology It will also appeal to government regulators NGOs and technologists interested in ICTs and development

**State Agency and the Patenting of Life in International Law** Bitu Amani, 2016-12-05 How should a state respond to competing international obligations where the patenting of life is concerned Following the institutionalization of Intellectual Property in the world trading system under the Agreement on Trade Related Aspects of Intellectual Property Rights TRIPS states face differing challenges and restraints on their freedom to develop biopatenting programmes Through a comparative review of patenting in two key but diverging jurisdictions Canada and the US this book considers how states might exercise the right of self determination in their domestic law and policy over biopatenting to promote objectives of human welfare and fair competition Departing from existing studies this timely and important volume offers a pragmatic two step approach to state agency to resolve apparent conflicts between the regulatory options afforded by economic globalization and the need to forge domestic laws that reflect community values In this approach rich and poor countries alike are invited to assert the primacy of human rights in their industrial and cultural policies World Trade Organization P. K. Vasudeva, 2005
