Washington, 2008-01-08 NATIONAL BOOK CRITICS CIRCLE AWARD WINNER The first full history of Black America's shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment No one concerned with issues of public health and racial justice can afford not to read this masterful book Washington has unearthed a shocking amount of information and shaped it into a riveting carefully documented book New York Times From the era of slavery to the present day starting with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted Medical Apartheid details the ways both slaves and freedmen were used in hospitals for experiments conducted without their knowledge a tradition that continues today within some black populations It reveals how Blacks have historically been prey to grave robbing as well as unauthorized autopsies and dissections Moving into the twentieth century it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks Shocking new details about the government's notorious Tuskegee

experiment are revealed as are similar less well known medical atrocities conducted by the government the armed forces prisons and private institutions The product of years of prodigious research into medical journals and experimental reports long undisturbed Medical Apartheid reveals the hidden underbelly of scientific research and makes possible for the first time an understanding of the roots of the African American health deficit At last it provides the fullest possible context for comprehending the behavioral fallout that has caused Black Americans to view researchers and indeed the whole medical establishment with such deep distrust
