## **From Artifact To Habitat Studies In The Critical Engagement Of Technology:**

*From Artifact to Habitat* Gayle L. Ormiston, 1990 Bringing together philosophy literary criticism and textual theory social and political theory and the philosophy of language and cognitive science this collection intends to establish an interpretive framework for exploring the ubiquity and mediacy of technology American Philosophy of Technology Hans Achterhuis, 2001 Introduces contemporary American philosophy of technology through six of its leading figures The six American philosophers of technology whose work is profiled in this clear and concise introduction to the field Albert Borgmann Hubert Dreyfus Andrew Feenberg Donna Haraway Don Ihde and Langdon Winner represent a new empirical direction in the philosophical study of technology that has developed mainly in North America In place of the grand philosophical schemes of the classical generation of European philosophers of technology including Martin Heidegger Jacques Ellul and Hans Jonas the contemporary American generation addresses concrete technological practices and the co evolution of technology and society in modern culture Six Dutch philosophers associated with Twente University survey and critique the full scope and development of their American colleagues work often illustrating shifts from earlier to more recent interests Individual chapters focus on Borgmann's engagement with technology and everyday life Dreyfus's work on the limits of artificial intelligence Feenberg's perspectives on the cultural and social possibilities opened by technologies Haraway's conception of the cyborg and its attendant blurring of boundaries Ihde's explorations of the place of technology in the lifeworld and Winner's fascination with the moral and political implications of modern technologies American Philosophy of Technology offers an insightful and readable introduction to this new and distinctly American philosophical turn Contributors are Hans Achterhuis Philip Brey Ren Munnik Martijntje Smits Pieter Tijmes and Peter Paul Verbeek **New Waves in Philosophy of Technology** Jan Kyrre Berg Olsen, 2008-11-28 The volume advances research in the philosophy of technology by introducing contributors who have an acute sense of how to get beyond or reframe the epistemic ontological and normative limitations that currently limit the fields of philosophy of technology and science and technology studies

**Civic Engagement and Politics: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2019-01-04 Creating transparency between government and citizens through outreach and engagement initiatives is critical to promoting community development and is also an essential part of a democratic society This can be achieved through a number of methods including public policy urban development artistic endeavors and digital platforms Civic Engagement and Politics Concepts Methodologies Tools and Applications is a vital reference source that examines civic engagement practices in social political and non political contexts As the world is now undergoing a transformation interdisciplinary collaboration participation community based participatory research partnerships and co creation have become more common than focused domains Highlighting a range of topics such as social media and politics civic activism and public administration this multi volume book is geared toward government officials leaders practitioners

policymakers academicians and researchers interested in active citizen participation and politics

**Nature, Technology and the Sacred** Bronislaw Szerszynski, 2008-04-15 This provocative and timely book argues that contemporary ideas and practices concerning nature and technology remain closely bound up with religious ways of thinking and acting Using examples from North America Europe and elsewhere it reinterprets a range of secular phenomena in terms of their conditioning by a complex series of transformations of the sacred in Western history The contemporary practices of environmental politics technological risk behaviour alternative medicine vegetarianism and ethical consumption take on new significance as sites of struggle between different sacral orderings Nature Technology and the Sacred introduces a radically new direction for today's critical discourse concerning nature and technology one that reinstates it as a moment within the ongoing religious history of the West

***Thinking through Technology*** Carl Mitcham, 2024-05-31 What does it mean to think about technology philosophically Why try These are the issues that Carl Mitcham addresses in this work a comprehensive critical introduction to the philosophy of technology and a discussion of its sources and uses Tracing the changing meaning of technology from ancient times to our own Mitcham identifies the most important traditions of critical analysis of technology the engineering approach which assumes the centrality of technology in human life and the humanities approach which is concerned with its moral and cultural boundaries Mitcham bridges these two traditions through an analysis of discussions of engineering design of the distinction between tools and machines and of engineering science itself He looks at technology as it is experienced in everyday life as material objects from kitchenware to computers as knowledge including recipes rules theories and intuitive know how as activity design construction and use and as volition knowing how to use technology and understanding its consequences By elucidating these multiple aspects Mitcham establishes criteria for a more comprehensive analysis of ethical issues in applications of science and technology This book will guide anyone wanting to reflect on technology and its moral implications

**Technique, Discourse, and Consciousness** David Lovekin, 2022-05-19 This study examines the French thinker Jacques Ellul 1912 1994 and his historical biblical and social analyses of how technology manipulates and impoverishes modern thought culture and language In the spirit of Georg Hegel and Ernst Cassirer Ellul explores how technology begins in myths stories and religion advances to tools and then develops into data algorithms and abstract systems which are detached from human bodies and communities Efficiency then becomes an absolute in all areas of human life and the mentality of technique becomes lost in its creations These modern symbols posing as ultimate human goods and values are denigrated by technique leaving humanity awash in clichés in groundless social media and in blathering slogans that sustain the illusion that politics and culture have now become

**Philosophy of Technology** Robert C. Scharff, Val Dusek, 2013-12-02 The new edition of this authoritative introduction to the philosophy of technology includes recent developments in the subject while retaining the range and depth of its selection of seminal contributions and its much admired editorial commentary Remains the most comprehensive anthology on the philosophy of technology available

Includes editors insightful section introductions and critical summaries for each selection Revised and updated to reflect the latest developments in the field Combines difficult to find seminal essays with a judicious selection of contemporary material Examines the relationship between technology and the understanding of the nature of science that underlies technology studies

*Technology and Isolation* Clive Lawson, 2017-03-30 By reconsidering the theme of isolation in the philosophy of technology and by drawing upon recent developments in social ontology Lawson provides an account of technology that will be of interest and value to those working in a variety of different fields Technology and Isolation includes chapters on the philosophy history sociology and economics of technology and contributes to such diverse topics as the historical emergence of the term technology the sociality of technology the role of technology in social acceleration the relationship between Marx and Heidegger and the relationship between technology and those with autism The central contribution of the book is to provide a new ontology of technology In so doing Lawson argues that much of the distinct character of technology can be explained or understood in terms of the dynamic that emerges from technology's peculiar constitutional mix of isolatable and non isolatable components

**The Natural and the Artefactual** Keekok Lee, 1999-01-01 In this book philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism that if we could reduce or eliminate pollution we could save the planet without unduly disrupting our modern industrialized societies Lee argues instead that the process of modernization with its attendant emphasis on technological innovation has fundamentally transformed nature into just another manmade artefact Ultimately what needs to be determined is if nature has value above and beyond human considerations whether aesthetic spiritual or biological This provocative book attempts to reconfigure environmental ethics positing the existence of two separate ontological categories the natural and the artefactual Natural entities be they organisms or inert matter are morally considerable because they possess the ontological value of independence whereas artefacts are created by humans expressly to serve their own interests and ends

*Controlling Technology*, A Companion to the Philosophy of Technology Jan Kyrre Berg Olsen, Stig Andur Pedersen, Vincent F. Hendricks, 2012-10-01 Drawing on essays from leading international and multi disciplinary scholars A Companion to the Philosophy of Technology is the first comprehensive and authoritative reference source to cover the key issues of technology's impact on society and our lives Presents the first complete authoritative reference work in the field Organized thematically for use both as a full introduction to the field or an encyclopedic reference Draws on original essays from leading interdisciplinary scholars Features the most up to date and cutting edge research in the interdisciplinary fields of philosophy technology and their broader intellectual environments

**Narrative Experiments** Gayle L. Ormiston, Raphael Sassower, 1989-01-01 Attempts to show that traditional definitions of science and technology fail to capture the complex discursive construction of scientific knowledge Argues accompanied by many literary and philosophical examples that science technology and the humanities developed in concert with each other and that their reciprocal relationship transcends traditional disciplinary boundaries

Cloth edition unseen 35 Annotation copyrighted by Book News Inc Portland OR *Critical Rationalism, the Social Sciences and the Humanities* I.C. Jarvie, N. Laor, 1994-12-31 An outstanding feature of this book is the broad range of the contributors drawn from Europe the Middle East and North America testifying both to the range of Professor Agassi's interests and the geographical spread of his influence Most contributors use Agassi's ideas as a springboard to engage in debate on issues or offer a contribution in an area that interests him In this volume contributors consider such questions as Agassi's philosophy of education in practice as well as in theory the impact of psychologism in philosophy the origins of critical rationalism in the Bible the debates in economics stimulated by the work of Popper and Agassi and many other topics Besides the special topics the reader gains some sense of the fruitfulness of critical rationalism in the hands of Agassi's friends and colleagues

**Retooling** Rosalind Williams, 2003-08-11 A humanistic account of the changing role of technology in society by a historian and a former Dean of Students and Undergraduate Education at MIT When Warren Kendall Lewis left Spring Garden Farm in Delaware in 1901 to enter MIT he had no idea that he was becoming part of a profession that would bring untold good to his country but would also contribute to the death of his family's farm In this book written a century later Professor Lewis's granddaughter a cultural historian who has served in the administration of MIT uses her grandfather's and her own experience to make sense of the rapidly changing role of technology in contemporary life Rosalind Williams served as Dean of Students and Undergraduate Education at MIT from 1995 through 2000 From this vantage point she watched a wave of changes some planned and some unexpected transform many aspects of social and working life from how students are taught to how research and accounting are done at this major site of technological innovation In *Retooling* she uses this local knowledge to draw more general insights into contemporary society's obsession with technology Today technology driven change defines human desires anxieties memories imagination and experiences of time and space in unprecedented ways But technology and specifically information technology does not simply influence culture and society it is itself inherently cultural and social If there is to be any reconciliation between technological change and community Williams argues it will come from connecting technological and social innovation a connection demonstrated in the history that unfolds in this absorbing book Crossing the Postmodern Divide Albert Borgmann, 2013-11-22 In this eloquent guide to the meanings of the postmodern era Albert Borgmann charts the options before us as we seek alternatives to the joyless and artificial culture of consumption Borgmann connects the fundamental ideas driving his understanding of society's ills to every sphere of contemporary social life and goes beyond the language of postmodern discourse to offer a powerfully articulated vision of what this new era at its best has in store This thoughtful book is the first remotely realistic map out of the post modern labyrinth Joseph Coates The Chicago Tribune Rather astoundingly large minded vision of the nature of humanity civilization and science Kirkus Reviews Technoscience and Postphenomenology Jan Kyrre Berg Frier, Robert P. Crease, Chairman of the department of philosophy, Stony Brook Uni, 2015-10-30 Frier and Crease capture Postphenomenology a new

field that has attracted attention among scholars engaged in technology studies Contributors to this edited collection seek to analyze clarify and develop postphenomenological language and concepts expand the work of Don Ihde the field's founder and scout into fields that Ihde never tackled Many of the contributors to this collection had especially close ties to Ihde and have benefited from close work with him This combined with the distinctive diversity of the contributors 18 people from 10 different countries enables this volume to put on display the diversity of content and styles in this young movement

**Reimagining South African Higher Education** Danie de Klerk, Greig Krull, Tshepiso Maleswena, Fiona MacAlister, 2024-06-23 Reimagining South African Higher Education Towards a Student Centred Learning and Teaching Future provides progressive approaches and innovations that challenge readers to rethink student learning engagement support and teaching The book offers examples of evidence informed and scholarly approaches to centring students through enhanced learning and teaching practices that are relevant to the South African context and those Global South contexts similar to South Africa

Religion in the Anthropocene Celia Deane-Drummond, Sigurd Bergmann, Markus Vogt, 2018-01-01 Religion in the Anthropocene charts a new direction in humanities scholarship through serious engagement with the geopolitical concept of the Anthropocene Drawing on religious studies theology social science history philosophy and what can be broadly termed as environmental humanities this collection represents a groundbreaking critical analysis of diverse narratives on the Anthropocene The contributors to this volume recognize that the Anthropocene began as a geological concept the age of the humans but that its implications are much wider than this Does the Anthropocene idea challenge the possibility of a sacred Nature or is it a secularized theological anthropology more properly dealt with through traditional concepts from Roman Catholic social teaching on human ecology Not all contributors to this volume agree about the answers to these and many more different questions Readers will be challenged provoked and stimulated by this book
