Post-Galilean Epistemology Danilo Capecchi, 2017-07-08 This book casts new light on the process that in the sixteenth and seventeenth centuries led to a profound transformation in the study of nature with the emergence of mechanistic philosophy the new mixed mathematics and the establishment of the experimental approach It is argued that modern European science originated from Hellenistic mathematics not so much because of rediscovery of the latter but rather because its applied components namely mechanics optics harmonics and astronomy and their methodologies continued to be transmitted throughout the Middle Ages without serious interruption Furthermore it is proposed that these applied components played a role in their entirety thus for example new mechanics derived not only from old mechanics but also from harmonics optics and astronomy Unlike other texts on the subject the role of mathematicians is stressed over that of philosophers of nature and the focus is particularly on epistemological aspects In exploring Galilean and post Galilean epistemology attention is paid to the contributions of Galileo's disciples and also the impact of his enemies The book will appeal to both historians of science and scientists The History and Use of Our Earth's Chemical Elements Robert E. Ancient Wisdom in the Age of the New Science Dmitri Levitin, 2015-09-15

Seventeenth century England has long been heralded as the birthplace of a so called new philosophy Yet what contemporaries might have understood by old philosophy has been little appreciated In this book Dmitri Levitin examines English attitudes to ancient philosophy in unprecedented depth demonstrating the centrality of engagement with the history of philosophy to almost all educated persons whether scholars clerics or philosophers themselves and aligning English intellectual culture closely to that of continental Europe Drawing on a vast array of sources Levitin challenges the assumption that interest in ancient ideas was limited to out of date ancients or was in some sense pre enlightened indeed much of the intellectual justification for the new philosophy came from re writing its history At the same time the deep investment of English scholars in pioneering forms of late humanist erudition led them to develop some of the most innovative narratives of ancient philosophy in early modern Europe
