Einstein In 90 Minutes:

Einstein (1879-1955) in 90 Minutes John R. Gribbin, Mary Gribbin, 1997 **Wings Of Fire - Abridged (Student Edition)** Aruntiwari With, **The Essential Galileo** John Gribbin, Mary Gribbin, 2014-04-01 Galileo Galilei 1564 1642 was the first scientist in the modern use of the term. Instead of relying on the works of Aristotle he actually carried out experiments to test theories. Legend has it that one of his experiments involved throwing weights off the Leaning Tower of Pisa. His astronomical observations with the telescope shattered the idea that the Earth was at the centre of the Universe and led to his trial for heresy. He had a great lust for life, three children by a woman he never married, a biting sarcastic wit and the friendship of princes and in spite of his run in with Pope Urban VIII, cardinals. An introduction, afterword and clear chronological table place Galileo's work in the context of the development of scientific knowledge. *Space, Time and Einstein* J.B. Kennedy, 2014-12-18 This introduction to one of the liveliest and most popular fields in philosophy is written specifically for a beginning readership with no background in philosophy or science. Step by step analyses of the key arguments are provided and the philosophical heart of the issues is revealed without recourse to jargon, maths or logical formulas. The book introduces Einstein's revolutionary ideas in a clear and simple way along with the concepts and arguments of philosophers both ancient and modern that have proved of lasting value. Specifically the theories of the ancient Greek philosophers Zeno, Euclid and Parmenides are considered alongside the ideas of Newton, Leibniz and Kant as well as the giants of twentieth century physics, Einstein and Lorentz. The problems at the heart of the philosophy of space and time such as change, motion, infinity, shape and inflation are examined and the seismic impact made by relativity theory and quantum theory is assessed in the light of the latest research. The writing is lucid and entertaining, allowing a beginning readership to grasp some difficult concepts while offering the more experienced reader a succinct and illuminating presentation of the state of the debate. *Space, Time and Einstein* shows the reader the excitement of scientific discovery and the beauty of theory in the search for answers to these fundamental questions. **Bang to Eternity and Betwixt** John Hussey, 2014-07-31 Covering the Cosmos from before the Big Bang through to the creation of our universe and up to but not including our arrival on stage, our will is not yet imposed, we had no hand, act nor part in its provisions beyond investigating to understand what has been delivered us. The many aspects of the Cosmos are melded in a headline driven style to paint a cohesive picture as well as allowing the reader choose to delve further where they may choose to paint their personal picture.
