Ejidos And Regions Of Refuge In Northwestern Mexico:

Ejidos and Regions of Refuge in Northwestern Mexico N. Ross Crumrine, 1987 The ten essays in this volume present case studies of different cultural groups in northwestern Mexico analyzed through the concepts of enclaves and regions of refugee initially proposed by Edward Spicer and Gonzalo Aguirre Beltran **Ejidos and Regions of Refuge in Northwestern Mexico** N. Ross Crumrine, 1987 The ten essays in this volume present case studies of different cultural groups in northwestern Mexico analyzed through the concepts of enclaves and regions of refugee initially proposed by Edward Spicer and Gonzalo Aguirre Beltran *Correspondence Analysis and West Mexico Archaeology* C. Roger Nance, Jan de Leeuw, Phil C. Weigand, Kathleen Prado, 2013-12-15 Because the archaeology of West Mexico has received little attention from researchers large segments of the region's prehistoric ceramic sequences have long remained incomplete This book goes far toward filling that gap by analyzing a collection of potsherds excavated in the 1960s and housed since then though heretofore unanalyzed at UCLA The authors employ the rarely used statistical technique known as correspondence analysis to sequence the Long Glassow collection of artifacts The book explains how correspondence analysis works and how it can be applied in archaeology In addition to describing the archaeological sites in north central Jalisco where the collection comes from the authors provide an ethnohistorical overview including information on the earliest Spanish explorers to reach the sites They sequence more than seventy ceramic types and derive a master sequence from more than ten thousand potsherds In addition to Mesoamerican archaeologists the audience will also include other archaeologists concerned with ceramic analysis or the application of statistics to archaeology **Rituals of Rule, Rituals of Resistance** William H. Beezley, Cheryl English Martin, William E. French, 1994 Presents readers with scholarship on public celebrations and popular culture throughout Mexican history This book discusses aspects of Mexico's popular culture from the seventeenth century onwards It examines a range of Mexican expression including Corpus Christi celebrations New Spain stone murals and folk theater **Ceramic Commodities and Common Containers** Daniela Triadan, 2016-12-15 For more than a century the study of ceramics has been a fundamental base for archaeological research and anthropological interpretation in the American Southwest The widely distributed White Mountain Red Ware has frequently been used by archaeologists to reconstruct late 13th and 14th century Western Pueblo sociopolitical and socioeconomic organization Relying primarily on stylistic analyses and the relative abundance of this ceramic ware in site assemblages most scholars have assumed that it was manufactured within a restricted area on the southeastern edge of the Colorado Plateau and distributed via trade and exchange networks that may have involved controlled access to these ceramics This monograph critically evaluates these traditional interpretations utilizing large scale compositional and petrographic analyses that established multiple production zones for White Mountain Red Ware including one in the Grasshopper region during Pueblo IV times The compositional data combined with settlement data and an analysis of archaeological contexts demonstrates that White Mountain Red Ware vessels were readily accessible and

widely used household goods and that migration and subsequent local production in the destination areas were important factors in their wide distribution during the 14th century Ceramic Commodities and Common Containers provides new insights into the organization of ceramic production and distribution in the northern Southwest and into the processes of social reorganization that characterized the late 13th and 14th century Western Pueblo world As one of the few studies that integrate materials analysis into archaeological research Triadan's monograph marks a crucial contribution to the reconstruction of these prehistoric societies

As If Jesus Walked on Earth Adrian A. Bantjes, 1998 Yet many Latin Americanists believe that the popularity of this controversial figure has clouded understanding of Mexico's history This sweeping and detailed study debunks many of the established interpretations of Cardenismo and sheds new light on the historical process that created Mexico's postrevolutionary political culture

We Will Dance Our Truth David Delgado Shorter, 2009 In this innovative performative approach to the expressive culture of the Yaqui Yoeme peoples of the Sonora and Arizona borderlands David Delgado Shorter provides an altogether fresh understanding of Yoeme worldviews Based on extensive field study Shorter's interpretation of the community's ceremonies and oral traditions as forms of historical inscription reveals new meanings of their legends of the Talking Tree their narrative of myth and history known as the Testamento their fabled deer dances funerary rites and church processions

Salado Archaeology of the Upper Gila, New Mexico Stephen H. Lekson, 2002-03 Salado is an enigma of the past One of the most spectacular cultures of the ancient Southwest its brilliant polychrome pottery has been subjected to varied interpretations from religious cult to artistic horizon Stephen Lekson now uses data from two Salado sites a large pueblo and a small farmstead to clarify long standing misconceptions about this culture By combining analysis of the large whole vessel collection at Dutch Ruin with the scientific excavation of Villareal II a picture of Salado emerges that enables Lekson to evaluate previous competing theories and propose that Salado represents a major fourteenth century migration of Pueblo peoples into the Chihuahuan deserts Lekson demonstrates that late short lived Salado farmsteads difficult to identify archaeologically in areas with larger Mimbres concentrations coexisted with larger Salado towns and he argues that Salado in the Upper Gila region appears as a substantial migration of Mogollon Uplands populations into what was a vacant river valley Throughout the fourteenth century Salado communities in the Upper Gila were integrated into the larger Salado horizon and were closely connected to Casas Grandes as indicated by the export of serpentine to the city of Paquim and the occurrence of Casas Grandes pottery at Upper Gila Salado sites The book includes illustrations of 71 vessels from Dutch Ruin plus a full color frontispiece Through analysis of these two sites Lekson has taken a large step toward clearing up the mystery of Salado His work will be welcomed by all who study the movements of peoples in the prehispanic Southwest

Are We Not Foreigners Here? Jeffrey M. Schulze, 2018-04-12 Since its inception the U S Mexico border has invited the creation of cultural economic and political networks that often function in defiance of surrounding nation states It has also produced individual and group identities that

are as subversive as they are dynamic In *Are We Not Foreigners Here* Jeffrey M Schulze explores how the U S Mexico border shaped the concepts of nationhood and survival strategies of three Indigenous tribes who live in this borderland the Yaqui Kickapoo and Tohono O odham These tribes have historically fought against nation state interference employing strategies that draw on their transnational orientation to survive and thrive Schulze details the complexities of the tribes claims to nationhood in the context of the border from the nineteenth century to the present He shows that in spreading themselves across two powerful omnipresent nation states these tribes managed to maintain separation from currents of federal Indian policy in both countries at the same time it could also leave them culturally and politically vulnerable especially as surrounding powers stepped up their efforts to control transborder traffic Schulze underlines these tribes efforts to reconcile their commitment to preserving their identities asserting their nationhood and creating transnational links of resistance with an increasingly formidable international boundary

Reframing the Northern Rio Grande Pueblo Economy Scott Ortman, 2019-04-30 Rio Grande pueblo societies took shape in the aftermath of significant turmoil and migration in the thirteenth century In the centuries that followed the size of Pueblo settlements level of aggregation degree of productive specialization extent of interethnic exchange and overall social harmony increased to unprecedented levels Economists recognize scale agglomeration the division of labor international trade and control over violence as important determinants of socioeconomic development in the modern world But is a development framework appropriate for understanding Rio Grande archaeology What do we learn about contemporary Pueblo culture and its resiliency when Pueblo history is viewed through this lens What does the exercise teach us about the determinants of economic growth more generally The contributors in this volume argue that ideas from economics and complexity science when suitably adapted provide a compelling approach to the archaeological record Contributors consider what we can learn about socioeconomic development through archaeology and explore how Pueblo culture and institutions supported improvements in the material conditions of life over time They examine demographic patterns the production and exchange of food cotton textiles pottery and stone tools and institutional structures reflected in village plans rock art and ritual artifacts that promoted peaceful exchange They also document change through time in various economic measures and consider their implications for theories of socioeconomic development The archaeological record of the Northern Rio Grande exhibits the hallmarks of economic development but Pueblo economies were organized in radically different ways than modern industrialized and capitalist economies This volume explores the patterns and determinants of economic development in pre Hispanic Rio Grande Pueblo society building a platform for more broadly informed research on this critical process
