Educating Character Through the Arts Laura D'Olimpio, Panos Paris, Aidan P. Thompson, 2022-11-18 This volume investigates the role of the arts in character education. Bringing together insights from esteemed philosophers and educationalists, it looks to the arts for insight into human character and explores the arts' relationship to human flourishing and the development of the virtues. Focusing on the moral value of art and considering questions of whether there can be educational value in imaginative and non-narrative art, the nine chapters herein critically examine whether poetry, music, literature, films, television series, videogames, and even gardening may improve our understanding of human character, sharpen our moral judgement, inculcate or refine certain skills required for virtue, or perhaps cultivate certain virtues or vices themselves. Bringing together research on aesthetics, ethics, moral and character education, this book will appeal to students, researchers, and academics of philosophy, arts, and education, as well as philosophers of education, morality, aesthetics, and teachers of the arts.

Educating with Purpose: The heart of what matters Stephen Tierney, 2020-08-04 If the last decade focused on what works, the decade ahead must focus on what matters. In his second book, Tierney argues that the purpose of education must move to the heart of the educational debate. Purpose will significantly influence what schools and the education system as a whole will do next. Why we educate is a question from which all other aspects evolve. A question for all times, it will resonate with those who have experienced the Great Pause. Using four main philosophies of education: personal empowerment, cultural transmission, preparation for work, and preparation for citizenship, he provides the underpinning theory and seminal works alongside a powerful critique. Using the impact of these different philosophies on a school's curriculum, he challenges the current orthodoxy, allowing the reader to consider alternative views and approaches. Proposing that the telos of education must be a life well lived, he argues for a re-purposing of education with a preferential option for the poor at its heart. Educative and challenging, this will be read by all those interested and involved in education.
