Multi-dimensional Transitions of International Students to Higher Education Divya Jindal-Snape, Bart Rienties, 2016-02-12. International students experience multiple and multi-dimensional educational and life transitions: moving to a new country, moving to a new educational system and moving to higher educational degree programmes. Within these transitions they experience differences in the social and organisational cultures, languages and interpersonal expectations, realities and relationships. Their transitions also lead to and interact with transitions of professionals, home students and their families. Multi-dimensional Transitions of International Students to Higher Education provides up-to-date literature, research and theoretical constructs that underpin international students' transitions to Higher Education. This book will help you to understand the opportunities, issues, social, emotional, psychological dimensions and evidence-based interventions that are vital to support an individual through these educational and life transitions. Split into four sections, topics include: Theoretical Underpinning, Research in Different Contexts, Impact of Educational Practice and Social Systems, Interventions and Strategies Used to Enhance International Students' Affective, Behavioural and Cognitive Transition Experiences. This book is essential reading for professionals, students and policy makers and provides significant research insights to academics and researchers in the area of education, psychology and sociology.

HLP 120 - Overlooked and Left Behind: Improving the Transition from School to Work for the Majority of Young People The Stationery Office, 2016. The transition from school into work is a vital point in the lives of young people. Making a successful transition through a high quality and valued pathway can mean a successful career. Becoming trapped in poor quality and under-valued alternatives can mean a lifetime of poverty. This report is about young people and social mobility and focuses on how to ensure that all young people are offered a high quality career path after they leave school. We have found that the current policy structure means a large number of young people do not have good options and are not supported to make a choice which works for them and is successful. An increasing number of young people leave school and go on to A Levels and university. Of the others, a small minority are at risk of dropping out of education, employment or training: the NEETS. Successive governments have focused on these two groups for a long time. But the majority of young people in the UK do not fall into either group. They do not go to university, they find jobs or they continue with some form of vocational education. Despite making up the majority of the emerging workforce, they have received much less attention. It is these young people who are the focus of this report. The current system for young people who do not follow an academic route is complex and incoherent, with confusing incentives for young people and employers. Careers advice and education are being delivered in a way which means that too many young people simply drift into further studies or their first job, which often has no real prospect of progression.
