Education In An Age Of Nihilism:

Education in an Age of Nihilism Nigel Blake, 2000 This book addresses concerns about educational and moral standards in a world increasingly characterised by nihilism On the one hand there is widespread anxiety that standards are falling on the other new machinery of accountability and inspection to show that they are not The authors in this book state that we cannot avoid nihilism if we are simply laissez faire about values neither can we reduce them to standards of performance nor must we return to traditional values They state that we need to create a new set of values based on a critical assessment of contemporary practice in the light of a number of philosophical texts that address the question of nihilism including the work of Nietzsche

Reclaiming Education in the Age of PISA Vasco d'Agnese, 2017-08-23 Reclaiming Education in the Age of PISA provides a critical analysis of the OECD's educational agenda and its main tool namely PISA Programme for International Student Assessment Based on an analysis of the OECD's public documents including publications webpages and videos d'Agnese argues that PISA is not just an assessment tool but rather an all encompassing framework that intends to govern education schooling living and society worldwide This creation of what d'Agnese calls a life brand raises concerns that education and learning are becoming wares and that consequently we run the risk of transforming schools into providers and teachers into agents of preconceived learning packages In pursuing only one concept of education and a very narrow one at that d'Agnese argues that OECD not only narrows down education to a mere reproductive process but that such an approach also erases the basic rules by which living develops and evolves In this sense PISA is but another form of authoritarian teaching authoritarian teaching being understood as any and every educational project which sets aims and purposes of education without giving the possibility to discuss and challenge such aims and purposes Reclaiming Education in the Age of PISA suggests a different educational logic emphasizing that schooling is not just a place to produce the correct skills but is also a matter of experimentation hesitation and wait one in which teachers and students attempt to dwell in pure potentiality for growth Providing a strong argument that a different way to conceive of schooling deserves our attention this book will be essential reading for academics researchers and postgraduates in the fields of educational philosophy and theory inclusive education and social justice It should also be of interest to policymakers and educational activists

Education and educational research according to the current fashion are supposed to be concerned with what works to the exclusion of all other considerations All over the world and particularly in the English speaking countries governments look for means of improving student achievement as measured by standardized test scores Although such improvements are often to be welcomed they do not answer all significant questions about what constitutes good education Also the research on

which they are based is not the only legitimate way to do educational research Social research and therefore educational research cannot ignore the distinctive nature of what it studies a social activity where questions of meaning and value cannot be eliminated and where interpretation and judgment play a crucial role In this book distinguished philosophers and historians of education from 6 countries focus on the problematical nature of the search for what works in educational contexts in practice as well as in theory Beginning with specific problems they move on to more general and theoretical considerations seeking to go beyond over simple ideas about cause and effect and the rhetoric of performativity that currently has educational thinking in its grip Freedom of inquiry in educational research can no longer be taken for granted Narrow definitions of what constitutes scientific research funding criteria that enforce particular research methods and policy decision processes that ignore any research that is not narrowly utilitarian create a context in many countries that discourages scholarship of a more speculative exploratory or critical sort This book brings together an exceptional combination of international and cross disciplinary scholars who bring the perspectives of history and philosophy of science to ask How did we arrive at this place and Where is educational research heading Thebook illuminates the anti intellectual consequences of a what works mentality in education and shows that the ostensibly scientific revolution in educational research in fact reflects an ahistorical and conceptually muddled understanding of what actually constitutes science This book could not be more timely and important Nicholas C Burbules Grayce Wicall Gauthier Professor University of Illinois With research increasingly tied to State policies with the instrumental purpose of guiding school reforms the volume provides an important historical and philosophical questioning of the possibilities limitations and challenges of education research Internationally leading scholars engage in a significant conversation that is sophisticated and nuanced for understanding contemporary debates Thomas S Popkewitz the University of Wisconsin Madison USA This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research *Why Still Education?* Gazela Pudar Draško, Predrag Krstić, Tamara Petrović-Trifunović, 2016-08-17 Why Still Education will appeal to researchers of education scholars and students alike in the fields of philosophy sociology pedagogy andragogy psychology political theory anthropology and history as well as experts in education management and educational practitioners such as teachers and textbook authors The question posed by the title is separated in the book into three more specific questions the first of which titled Education for What investigates the eternal issue the purpose of education The second section which examines the most appropriate approaches and expected outcomes for a child centred perspective is called Education for Whom and the third part Whose Education takes national gender and other subtle or self explanatory characteristics of education and looks at them from the standpoint of discrimination The volume offers nine different chapters which provide illuminating and interesting answers to these questions and thus allow them to be more thoroughly resolved and enable rational discourse

about them Taking Education Really Seriously Michael Fielding, 2004-08-02 Michael Fielding looks at what the Labour Government has achieved in the last four years with its policy of education education education There has been widespread disappointment in New Labour's education policies which on the whole have not steered too far wide of those put in place by Margaret Thatcher including issues of marketisation testing and performativity Michael Fielding has called on the key policy thinkers in education to offer their opinions on what has happened in education over the first three to four years of the New Labour Government Education policy is a controversial subject and with a General Election expected within the next few months this book will be read widely by people within education politicians and journalists and by others anxious to get to facts and avoid the spin The subject matter and the presence of so many high profile educationalists make this an essential read Humanizing Education in the 3rd Millennium R. Scott Webster, Timo Airaksinen, Poonam Batra, Margarita Kozhevnikova, 2022-06-20 This book proposes some insights and ideas into how education might be humanized The chapters inform provoke and guide further inquiries into imagining and actualizing human education It presents the view that education should be primarily understood as human education which offers universal good for the entire planet It centres around the significant values that make life in a holistic sense meaningful worthwhile and socially just It discusses the fundamental idea that human education is the key to peace individual and social freedoms social justice and harmony fraternity and happiness all over the world and how educational ideals and methods must be reconsidered to achieve this end This book originates from an international conference and round table Human Education in the 3rd Millennium in July 2019 in Dharamsala India **Nietzsche's Gods** Russell Re Manning, Carlotta Santini, 2022-10-24 The place or absence of God in Nietzsche's thought remains central and controversial Nietzsche's proclamation of the death of God is one of the most famous and parodied slogans in modern philosophy seeming to encapsulate the nineteenth century loss of religious faith in the affirmation that God has turned out to be our oldest lie and yet the nature of Nietzsche's own theology is far from clear This volume engages with Nietzsche's arguments about God theology and religion The volume extends the discussion to an engagement of Nietzsche with alternative models of God with ancient Greek religions and with discussions of diversity race class gender sex in dis conjunction with religion The chapters examine Nietzsche's genealogy of religion and his claims about the place of God and theology in the history of Western thought that faith of the Christians which was also Plato's faith as well as his engagements with alternative conceptions of God The volume also examines the historical and contemporary reception of Nietzsche's arguments about God by religious and non religious thinkers asking to what extent Nietzsche's philosophy of God speaks to the challenges of today's globalized philosophy and religion Ahuman Pedagogy Jessie L. Beier, Jan Jagodzinski, 2022-07-14 This book brings together a collection of multi disciplinary voices to discuss debate and devise a series of ahuman pedagogical proposals that aim to address the challenging ecological political social economic and aesthetic milieu within which education is situated today Attending to contemporary calls to decenter all too human

educational research and practice while also coming to terms with the limits and inheritances through which such calls are made possible in the first place this book aims to interrogate but also invent what we are calling an ahuman pedagogy Organized in three main sections Conjuring an Ahuman Pedagogy Machinic Re distributions and Non pedagogies for Unthought Futures this multi disciplinary experiment in ahuman pedagogies for the age of the Anthropocene offers an experimental albeit always speculative and incomplete series of pedagogical proposals that work to unthink and counter actualize educational futures as usual
