Sindhu, 2012 Educational Administration and Management is a comprehensive textbook for students pursuing B Ed and B El Ed courses Educational Administration and Management aims at helping students understand the theories and processes of this subject and thereby become effective leaders and managers of the educational system tomorrow This book provides the historical perspective of educational Administration and explains the concept of Educational management in detail which will help the student to understand various educational aspects It also describes the basic characteristics of educational planning and implementation The host of student friendly features such as exercises and questions will help students in their study and exam preparations *State School Administration* Ellwood P. Cubberley, 1927 International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, Judith Chapman, P. Corson, P. Hallinger, Ann Hart, 2012-12-06 EDITORS This introduction to the International Handbook of Educational Leadership and Administration describes some of the motivation for developing the book and several assumptions on which is based much of the work represented in its 31 chapters A synopsis of the contents of those chapters is also provided SOME KEY ASSUMPTIONS It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail After all there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years Such a view is captured for example in Bennis observation that Of all the hazy and confounding areas in social psychology leadership theory undoubtedly contends for top nomination Probably more has been written and less is known about leadership than any other topic in the behavioural sciences 1959 page 259 We do not find this state of affairs discouraging nor entirely accurate and of course it did not prevent Bennis from proceeding either One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general theory a theory which applies to all or most domains of organized human activity This aspiration inevitably produces decontextualized and therefore abstract

categories of practice Howard Gardner's 1995 depiction of leadership as story telling is a case in point *Mastering Theories of Educational Leadership and Management* Donnie Adams, 2018-10-08 The field of Educational Leadership and Management originated and grew to maturity in the Western societies of the USA UK and Australia However since the mid 1990s scholars in east Asia have asserted the need to ground leadership theories and practices in the local contexts in which school leaders practice *Mastering Theories of Educational Leadership and Management* is one of the first volumes published which seeks to do this The edited chapters illustrate and elaborate how perspectives on key concepts and theories of educational leadership are being interpreted and enacted in East Asian societies By doing so the book makes a valuable contribution which will hopefully reduce the gap between theories as explained by Western scholars and practices as enacted in East Asian societies Professor Dr Philip Hallinger **Handbook of Research on the Education of School Leaders , Initiation of Educators into Educational Management Secrets** Christos Saitis, Anna Saiti, 2017-08-18 This book provides a comprehensive method for learning modern management processes and applying those methods to improve leadership in educational settings The authors include case studies and techniques to solve a variety of managerial problems so that members of the educational community may improve their abilities and skills in a range of related disciplines including strategic planning effective decision making time management management conflict strategies oral communication management strategies for school crises and the development of good relations and a cooperative spirit Educational Administration George Drayton Strayer, Edward Lee Thorndike, 1913 In this volume Professors Strayer and Thorndike present materials of essential value that relate to educational administration from various articles and monographs in such a compact form that every educational administrator can have a copy for his desk It permits also an effective use of these materials for class discussion since the book can be in the hands of the students as a reference text The volume does not attempt to show the relations of the various topics discussed to the field of education in general or to show general administrative perspective It is expected that the educational administrator is already familiar with these matters and that where the book is used as a text comment and perspective will be supplied by lectures and readings from other books already in the field **Emotion Management and Feelings in Teaching and Educational Leadership** Izhar Oplatka, Khalid Arar, 2019-05-28 This book highlights the connection between culture and emotion management in teaching and educational leadership and allows researchers from different parts of the world to demonstrate how national and local culture influence the way educational leaders and teachers express their feelings display their emotion or suppress emotion publically *Ethical Foundations for Educational Administration* Eugenie Samier, 2003-12-16 Christopher Hodgkinson is one of the most important contributors to the field of educational administration This collection of essays open up the philosophical foundations of ethical educational administration by reviewing his writings and exploring the ethical theories of major philosophers as they apply to administration and leadership *Ethical Foundations of Educational Administration* is published in honour of the work of

Christopher Hodgkinson It is divided into two sections The first comprises biographical essays and a critical evaluation of Professor Hodgkinson s work focusing on his personal and intellectual contributions to a moral theory of educational administration and leadership The second section looks at how his moral philosophy can inform administrative practice The work of a broad range of philosophers is discussed from the pre 20th century theories of Aquinas Adam Smith and Kant to the pragmatists Peirce James and Dewey Heidegger MacIntyre Bourdieu Churchland and Thagard Christopher Hodgkinson s definition of administration as philosophy in action is now famous within the field This collection illustrates the essential truth of that maxim showing that moral philosophy approached in the spirit promoted by Hodgkinson has both practical and critical purpose when brought to bear upon educational administration and leadership *The School Principal* Theodore J. Kowalski,2010-08-14 Over the past two decades efforts to improve schools have significantly modified role expectations for principals Today school level administrators are expected to be both visionary leaders and competent managers Based on the conviction that administration is an amalgam of leadership and management The School Principal emphasizes the need for practitioners to apply conceptual skills to make what to do decisions to apply technical skills to make how to do decisions and to apply relational skills to engage in democratic decision making Kowalski frames the book with a discussion of the nature of schools the roles of principals and their need to improve schools The book then provides a balanced treatment of leadership and management covering issues of personal behavior instructional leadership relationship building issues finances facilities personnel management pupil services and maintaining safe schools The text closes with discussion of the vital aspects of practice for contemporary principals addressing problem solving collaborative change strategies and personal commitment to being a principal Special Features Vignettes introduce the subject matter in the context of common challenges faced by practitioners Knowledge Based Questions and Skill Based Activities prompt readers to engage with and reflect on the chapter content The School Principal aligns with the Educational Leadership Consortium Council ELCC Standards Treating principals as concurrently visionary leaders and competent managers this excellent text addresses the needs of aspiring and practicing principals providing the tools to build effective and efficient schools *Resources in Education* ,1990 **California.
