management texts do not do enough to encourage school leaders and teachers to challenge social inequality or the market and managerial reforms of the last decade They demonstrate this problem through detailed analyses of texts in the areas of educational marketing school improvement development planning and strategic human resource management school leadership and school change For academics and students Education Management in Managerialist Times offers a critical guide to existing educational management texts and makes a strong case for redefining educational management along more socially and politically informed lines The book also offers practitioners alternative management strategies intended to contest rather than support managerialism while being realistic about the context within which those who lead and manage schools currently have to work This controversial new title brings a new insight to the educational management debate
