thoughts are sneaking into your consciousness then this is the time to resist temptation There is likely nothing wrong with either you or your child So how exactly are you supposed to potty train your child That is a question that might be running through your mind and it is a good one The fact is that there are many methods to potty training and the one that will work for you depends largely on your child It is easy to assume that a parent just automatically knows how to toilet train a child But it does not work that way As a parent it is important to learn how to do things properly Of course there are those who just intuitively know how to go about the potty training business and some children who just automatically start using the toilet by themselves However these are the exception and you probably do not know very many people like that In fact you probably don't know anyone like that What most people do is learn about the different methods of potty training and then pick the one that suits their child's temperament and personality What works for one child might not work for his sister So understanding your child is imperative for successful toilet training What does not work though is shaming and mocking your child whenever accidents happen This can have far reaching negative effects on your child The psychologist Erikson believed that potty training was one of the eight important stages in the psychosocial development of a person In particular that toilet training was the most important stage between the ages 1 and 2 He believed that it was an event that led to self confidence and self control in a child breeding greater freedom and the ability to do things on their own Autonomy Vs Shame and Doubt In order to achieve this autonomy in children it is important that parents let the children do things on their own This means not being too overprotective and certainly not shaming the child whenever there was a mistake The result of the way you react to your child during this stage has a great significance on the child's world view later on Whether your child goes on to become a confident and self assured person or views the world through a lens of shame and doubt about his or abilities will depend a lot on the way you handle things during the potty training stage Not to put pressure on you as a parent this is merely a call for lots of patience during the toilet training phase During any phase to be honest but your toddler is going to need you to be patient and encouraging as she navigates her way through the strange diaper less world Patience you say Yes asking you to be patient is easier said than done There are times when it is going to seem as though your little angel is on a mission to test the limits of your patience And there are times when mistakes are going to happen no matter how hard you try Frankly there is nothing as frustrating as placing your little one on the potty for what seems like endless hours and nothing happens Only for him to go just as soon as he gets up from the potty leaving you to clean up the mess Those days are going to happen There is not much you can do about that However this book seeks to share strategies and tips that can help you speed up the process and yes build up your reserve of patience

Oh Crap! Potty Training Jamie Glowacki,2015-06-16 From potty training expert and social worker Jamie Glowacki who s already helped over half a million families successfully

toilet train their preschoolers comes a newly revised and updated guide that's straight up parent tested and funny to boot. Amber Dusick, author of *Parenting Illustrated with Crappy Pictures*, worried about potty training. Let Jamie Glowacki, potty training expert, show you how it's done. Her six-step proven process to get your toddler out of diapers and onto the toilet has already worked for tens of thousands of kids and their parents. Here's the good news: your child is probably ready to be potty trained EARLIER than you think, ideally between 20-30 months, and it can be done FASTER than you expect. Most kids get the basics in a few days, but Jamie's got you covered even if it takes a little longer. If you've ever said to yourself, "How do I know if my kid is ready?" "Why won't my child poop in the potty?" "How do I avoid potty power struggles?" "How can I get their daycare provider on board?" "My kid was doing so well, why is he regressing?" And what about nighttime? Oh, Crap! Potty Training can solve all of these and other common issues. This isn't theory; you're not bribing with candy, and there are no gimmicks. This is real world from the trenches: potty training information, all the questions, and all the answers you need to do it once and be done with diapers for good.
