trade policies and mercantilism *Spain and the Irish Mission, 1609-1707* Cristina Bravo Lozano, 2018-10-26 Spain and the Irish Mission 1609 1707 examines Spanish confessional policy in 17th century Ireland Cristina Bravo Lozano provides an innovative perspective on Spanish Irish relations during a crucial period for Early Modern European history Key historical actors and events are brought to the fore in her account of the missionary networks created around the Irish Catholic exile in the Iberian Peninsula She presents a comprehensive study of this form of royal patronage the changes and challenges Irish Catholicism had to face after the peace of London 1604 and the role that Irish missionaries played in preserving its place within the framework of Anglo Spanish relations *Historias de raza y nación en América Latina* Claudia Leal, Carl Henrik Langebaek, 2010-10-01 El tema de raza en América Latina ha tomado fuerza en los últimos años Se trata de reconocer que las clasificaciones raciales han moldeado la forma de ordenar las sociedades de la región de percibir a sus miembros y de entender cómo lo han hecho El asunto no había recibido la atención que merece por varias razones La evidente importancia de las divisiones de clase en la región hizo que esta categoría tomara preeminencia en las décadas de 1960 y 1970 cuando las ciencias sociales adquirieron mucha fuerza académica Además la idea muy arraigada de que las relaciones entre diferentes grupos raciales es armónica hacen a ver el tema como insignificante Por otra parte el convencimiento al que se llegó en la segunda mitad del siglo xx de que las supuestas razas no corresponden a realidades objetivas aunque las clasificaciones raciales sean muy reales hacen a su estudio primero poco válido y luego indeseable pues podía tener el efecto de reforzar categorías que enfatizan desigualdades Pero el nuevo peso académico de las perspectivas culturales sumado a la atención internacional que el tema ha recibido como en el caso de la Conferencia Mundial contra el Racismo celebrada en Durban en 2001 y la tradición de la influyente academia estadounidense le han dado un nuevo vuelo a la preocupación por comprender cómo el concepto raza ayuda a comprender el pasado y presente latinoamericanos *Historia de la educación española* Javier Vergara Ciordia, Olegario Negrín Fajardo, Fermín Sánchez Barea, Beatriz Comella Gutiérrez, 2021-08-10 El presente manual se presenta como base y guía para el estudio de los principales hitos de la Historia de la Educación en España Una asignatura que consta de seis créditos se ubica en el segundo curso del grado de Pedagogía de la Universidad Nacional de Educación a Distancia UNED y se configura para mostrar y dar a conocer los principales hechos contextos y referentes más significativos que explican el devenir de la educación en España desde la llamada Hispania romana hasta la actualidad Un propósito que por la propia naturaleza didáctica de los manuales demanda un discurso conclusivo plantear ideas sintéticas e invitar en la medida de lo posible al estudio y análisis de otras fuentes que puedan completar lo aquí sugerido y planteado En paralelo el manual exige un esquema conceptual marco que a modo de hilo conductor pedagógico guíe el análisis histórico para no derivar en puros análisis sociológicos culturales o generalistas que poco o nada tienen que ver con la educación En este sentido y dentro del amplio marco de la estructura temática de la educación se ha optado por un esquema conceptual guía basado en el análisis de cinco unidades pedagógicas los modelos educativos las instituciones escolares los contenidos curriculares las innovaciones

docentes y las personas que reflexionaron y abrieron brecha en el campo de la educación. Un planteamiento que da lugar a ocho unidades didácticas. Comienza con la educación en la Hispania romana, sigue con la aportación visigoda, musulmana y cristiana de la Edad Media, continúa con los hitos humanistas y barrocos de la España Moderna y concluye con una contemporaneidad donde la Ilustración, la didáctica pedagógica de los siglos XIX y XX y las leyes educativas más recientes de la democracia española sustancian el devenir de la pedagogía hispana. El primer tema elaborado por el profesor Rafael Sánchez Barea comienza planteando cómo la Hispania romana al trasladar a la península ibérica los valores culturales del Imperio inserta en su ethos el sentimiento propio de la civilización romana. La gramática, la retórica, la oratoria, el ideal tico, la jurisprudencia, la técnica, la filosofía y la ciencia fueron categorías culturales que se resumieron en el ideal de perfección del *vir bonus dicendi peritus*. Expresión que descansaba en tres exigencias: marco en primer lugar en el *bene sapere* o saber, un pilar intelectual que se conquistaba a través de la filosofía y la moral; en segundo lugar, el *bene dicere* o decir, una exigencia filológica que se adquiría a través de la gramática y la retórica; y finalmente, en el *bene vivere* o vivir, era el elemento tico-técnico que se presentaba como meta y expresión de una vida humana, típicamente valiosa y de una dedicación profesional técnicamente eficaz. Trilogía que de una u otra manera fue magistralmente representada por dos hispanorromanos insignes: Séneca y Quintiliano. La segunda unidad temática elaborada por el profesor Javier Vergara aborda la cultura pedagógica de la Hispania medieval. Miles de historias resumidos en tres frentes sucesivos: en primer lugar, la Temprana Edad Media representada por las aportaciones de la pedagogía visigoda, donde el *scholasticus* de san Isidoro consiguió actualizar el saber clásico y transmitirlo a la europeidad de su tiempo; en segundo lugar, la Alta Edad Media simbolizada en la pedagogía musulmana, donde la inspiración divina del islam recogida en los libros sagrados de El Corán y la Sunna impregnó todos los resortes de la vida política, social y cultural; finalmente, la pedagogía de la Baja Edad Media se nos muestra quintaesenciada en las aportaciones de los reinos cristianos. Las migraciones intelectuales, las escuelas de gramática, el nacimiento de las universidades, las escuelas gremiales y la reivindicación de la mujer como productora de cultura formal, son algunos de sus signos más representativos. La pedagogía de la España Moderna que abarca la tercera y cuarta unidades didácticas ha sido elaborada por la profesora Beatriz Comella Gutiérrez. Representantes del humanismo como Nebrija, Palmireno, Vives, Ignacio de Loyola, Juan Bonifacio, José de Calasanz, etc.; políticos del Barroco pedagógico como Diego Saavedra Fajardo y Baltasar Gracián; y diversos enfoques sobre la educación de la mujer, tanto en España como en América, condensan una de las etapas más creativas y dinámicas de la historia de la Educación española. Una etapa donde la síntesis virtud-letras y doctrina se ve aderezada con un progresivo funcionalismo y secularización de la cultura, que las centurias posteriores no conseguirán integrar. Los hitos pedagógicos de los siglos XVIII, XIX, XX y primeros años del siglo XXI que ocupan las unidades didácticas restantes han sido resumidos por el profesor Olegario Negrín Fajardo. El siglo XVIII es el siglo de la Ilustración. Una centuria donde los Feijoo, Jovellanos, Campomanes, Olavide, Cabarrús, etc., asientan las bases de un sistema nacional de educación basado en los principios de la secularización docente, del economicismo político y

de la utilidad pública bajo la dirección de un nuevo demiurgo pedagógico llamado Estado. El siglo XIX es un periodo de grandes y numerosas leyes educativas de decepciones notables y de creaciones pedagógicas reformistas: la Ley Moyano, el catolicismo social pedagógico y la Institución Libre de Enseñanza. ILE son algunos de sus hitos más representativos. El siglo XX viene marcado por el pedagogismo de cuatro marcos sociopolíticos muy diferentes: Alfonso XIII, la II República, el franquismo y la transición democrática. Periodos convulsos y nada fáciles donde la legislación educativa se convierte en un prurito en una casus belli y en una obsesión de las administraciones públicas y partidos políticos. Praxis que el bipartidismo político de los primeros años del siglo XXI reflejar con crudeza. La Ley Orgánica para la Mejora de la Calidad Educativa 2013 del Partido Popular junto con el Proyecto de Ley Orgánica de 2019 para la reforma de la Ley Orgánica de Educación del Partido Socialista son solo dos ejemplos de una cuestión recurrente y abierta difícil de resolver que sirven de colofón y cierre a la presente obra. El manual contiene una serie de exigencias metodológicas emanadas de diferentes directrices del Instituto Universitario de Educación a Distancia IUED de la UNED. Cada uno de los temas contiene un resumen y sus objetivos, su contenido propio, una bibliografía básica, ejercicios de autoevaluación, actividades complementarias para ampliar los contenidos y un glosario donde se condensan temas clave de cada unidad.

Historia Universal David García Hernán, 2013-11-10. Esta Historia Universal es una síntesis que ofrece al lector los acontecimientos más señalados de la Humanidad de una forma gil directa y bien documentada. Le acerca además a los últimos resultados de la investigación en los temas cruciales de la Historia. No solamente se atiende al innegable protagonismo europeo sino también a los principales hitos históricos de los espacios americano y asiático que tanta trascendencia han adquirido en los últimos tiempos. En sus páginas encontraremos los rasgos más destacados de cada periodo de la Historia como los inicios del hombre en la Prehistoria, las primeras civilizaciones de Egipto y Próximo Oriente, el periodo clásico de Grecia y Roma, o el inicio expansivo y consolidación de las grandes religiones: el cristianismo, el budismo o el islam, entre otros. Asimismo tienen también cabida el confuso periodo de las grandes invasiones de los pueblos bárbaros, la larga permanencia del Imperio Bizantino, la oscura y bella Edad Media, el brillo del Renacimiento, las luces de la Ilustración, las turbulencias de la Revolución Francesa y el progreso de la Revolución Industrial hasta desembocar en los extremos contrastes del siglo XX y en las incertidumbres de nuestros días. Todo ello subrayando tanto los aspectos puramente políticos como los contextos tanto sociales, económicos y culturales desde una perspectiva de Historia global.

Spanish Literature David William Foster, Daniel Altamiranda, Carmen Urioste-Azcorra, 2001. This anthology examines *Love's Labours Lost* from a variety of perspectives and through a wide range of materials. Selections discuss the play in terms of historical context, dating and sources, character analysis, comic elements and verbal conceits, evidence of authorship, performance analysis and feminist interpretations. Alongside theater reviews, production photographs and critical commentary, the volume also includes essays written by practicing theater artists who have worked on the play. An index by name, literary work and concept rounds out this valuable resource.

the process he sheds light on the local factors contributing to the emergence of tensions between the conquerors and Granada's formerly Muslim native morisco community in the decades leading up to the crown mandated expulsion of most of the city's moriscos in 1569-1570. Despite the failure to assimilate the moriscos, Granada's status as a frontier Christian community under construction fostered among much of the immigrant community innovative religious reform ideas and programs that shaped in direct ways a variety of church-wide reform movements in the era of the ecumenical Council of Trent 1545-1563. Coleman concludes that the process by which reforms of largely Granadan origin contributed significantly to transformations in the Church as a whole forces a reconsideration of traditional top-down conceptions of sixteenth-century Catholic reform.

Everyday Magic in Early Modern Europe Kathryn A. Edwards, 2016-03-09 While pre-modern Europe is often seen as having an enchanted or magical worldview, the full implications of such labels remain inconsistently explored. Witchcraft, demonology, and debates over pious practices have provided the main avenues for treating those themes, but integrating them with other activities and ideas seen as forming an enchanted Europe has proven to be a much more difficult task. This collection offers one method of demystifying this world of everyday magic. Integrating case studies and more theoretical responses to the magical and preternatural, the authors here demonstrate that what we think of as extraordinary was often accepted as legitimate if unusual occurrences or practices. In their treatment of and attitudes towards spirit-assisted treasure hunting, magical recipes, trials for sanctity, and visits by guardian angels, early modern Europeans showed more acceptance of and comfort with the extraordinary than modern scholars frequently acknowledge. Even witchcraft could be more pervasive and less threatening than many modern interpretations suggest. Magic was both mundane and mysterious in early modern Europe, and the witches who practiced it could in many ways be quite ordinary members of their communities. The vivid cases described in this volume should make the reader question how to distinguish the ordinary and extraordinary and the extent to which those terms need to be redefined for an early modern context. They should also make more immediate a world in which magic was an everyday occurrence.

Roots of Sustainability in the Iberian Empires Koldo Trapaga Monchet, Álvaro Aragón-Ruano, Cristina Joanaz de Melo, 2023-06-05 This book sheds light on the roots of sustainability in the Iberian Peninsula that lie in the interrelations between shipbuilding and forestry from the 14th to the 19th centuries, combining various geographical scales: local, regional, and national, and different timespans: short-term and long-term studies. Three main themes are discussed in depth here: firstly, the roots of current conservationism in the Iberian Peninsula; the evolution of the forest policies set in motion at local, regional, and national levels to meet the demand for wood and timber; and the long-standing impact of naval empirical forestry on the conservation and transformation of the forest landscape. Therefore, the book attempts on the one hand to unravel the forest policies and empirical forestry implemented in the Iberian Peninsula as the roots or origins of what we refer to nowadays as sustainability, and to assess the contribution of imperial forestry to landscape planning and the conservation of forest resources on the other, and finally to break away from

the prevailing theological narrative that shipbuilding was the main agent of forest destruction in the early modern Iberian Peninsula for which both quantitative and qualitative analyses will be conducted This book will be of key interest to environmental and social historians and researchers and to anyone devoted to conducting research on the emergence and evolution of the concept of sustainability with respect to the governance and the historical transformation of woodlands around the world
