*The Edge of Chaos* Bernice Cohen, 1997-03-27 Historical treatment of significant financial crises      **Financial Market Bubbles and Crashes** Harold L. Vogel, 2009-12-14 Despite the thousands of articles and the millions of times that the word bubble has been used in the business press there still does not appear to be a cohesive theory or persuasive empirical approach with which to study bubble and crash conditions This book presents a plausible and accessible descriptive theory and empirical approach to the analysis of such financial market conditions It advances such a framework through application of standard econometric methods to its central idea which is that financial bubbles reflect urgent short side rationed demand From this basic idea an elasticity of variance concept is developed It is further shown that a behavioral risk premium can probably be measured and related to the standard equity risk premium models in a way that is consistent with conventional theory      **Financial Market Bubbles and Crashes, Second Edition** Harold L. Vogel, 2018-08-16 Economists broadly define financial asset price bubbles as episodes in which prices rise with notable rapidity and depart from historically established asset valuation multiples and relationships Financial economists have for decades attempted to study and interpret bubbles through the prisms of rational expectations efficient markets and equilibrium arbitrage and capital asset pricing models but they have not made much if any progress toward a consistent and reliable theory that explains how and why bubbles and crashes evolve and can also be defined measured and compared This book develops a new and different approach that is based on the central notion that bubbles and crashes reflect urgent short side rationing which means that as such extreme conditions unfold considerations of quantities owned or not owned begin to displace considerations of price

*Explorations in Financial Ethics* Luc van Liedekerke, Jozef M. L. van Gerwen, Danny Cassimon, 2000 The breakdown of Bretton Woods liberalised financial markets from extensive government control Increasing deregulation and technological innovation created truly global financial markets the perfect companions for global business and shareholder philosophy But this swift evolution did not occur without specific risks or accidents Financial crises surged at the slightest provocation causing havoc around the globe They were the painful reminders that the increasingly virtual abstract and remote world of finance still exerts a serious impact on our everyday life Is it because of their abstract nature that there hardly exists any systematic ethical reflection on the functioning of financial markets The present volume makes an attempt to fill this gap The authors question the efficiency of the financial system the present state of financial regulation the role of central bankers and the functioning of exchange and derivative markets This collection of essays represents the outcome of a three year research project at the Center for Ethics of the University of Antwerp UFSIA which has been executed by a multi disciplinary team of philosophers and economists      Trust in Troubled Times Brett Sheehan, 2003 This timely book traces the development of banking and paper money in republican Tianjin in order to explore the creation of social trust in financial institutions Framing the study around Bian Baimei a conscientious branch manager of the Bank of China Brett Sheehan analyzes the

actions of bankers officials and local elites as they tried to overcome political and financial crises and instill trust in the banking system After early failures in promoting trust government authority as a regulator of the financial system gradually increased peaking in 1935 when the state unified the money supply for the first time in several hundred years Concurrently when local elites proved unable to develop successful strategies to make people trust the system their influence declined The need for trust in increasingly complex financial arrangements redefined state society relations simultaneously enhancing state power and creating new constraints on the actions of both elites and governments Trust in Troubled Times is a valuable new perspective on the economic social and political history of modern China **Nostradamus: Modern Methods of**

of Investment Bubbles Paul Sheeran, 2017-11-28 Providing a historical appraisal of bubble investments and blending theory with field observations this insightful work will benefit academics researchers and professionals observing the nexus of relationships between speculation states and markets The book presents an analysis of the development and decline of investment bubbles and helps develop the models that inform the risk assessment of bubble behaviour By identifying particular trends and consequences the book presents insight into the operation of speculative activity and its social economic and political repercussions Economic Compulsion and Christian Ethics

Albino Barrera, 2005-09-08 Markets can often be harsh in compelling people to make unpalatable economic choices any reasonable person would not take under normal conditions Thus workers laid off in mid career accept lower paid jobs that are beneath their professional experience for want of better alternatives Economic migrants leave their families and cross borders legally or illegally in search of a livelihood These are examples of economic compulsion These economic ripple effects have been virtually ignored in ethical discourse because they are generally accepted to be the very mechanisms that generate the market's much touted allocative efficiency Albino Barrera argues that Christian thought on economic security offers an effective framework within which to address the consequences of economic compulsion Meta-Heuristics Optimization Algorithms in Engineering, Business, Economics, and Finance

The book gives straightforward guidance to students of business ethics and encourages the application of theory through the use of topical exercises and case studies.

**Extraordinary Popular Delusions and the Madness of Crowds** Charles Mackay, 2004-08-12 Today as in the time of the South Sea Bubble human nature is drawn like a moth to flame by the speculative fads of the marketplace. The excitement of new glamour issues in electronics or medical technology, the general euphoria over a rising market, these lure even many experienced investors. Their optimism overcomes their better judgment. They abandon critical analysis of the investment's fundamental value. Like gamblers in a casino they play against the odds, paying inflated prices and dreaming of quick profit. From the foreword by John Marks Templeton Mackay's classic first published in 1841 studies the psychology of crowds and mass mania throughout history including accounts of classic scams, grand scale madness and deceptions. Some of these include the Mississippi scheme that swept France in 1720, the South Sea Bubble that ruined thousands in England at the same time and the tulip mania of Holland when fortunes were made and lost on single tulip bulbs. Other chapters deal with fads and delusions that often spring from valid ideas of causes, many of which still have their followers today: alchemy and the philosopher's stone, the prophecies of Nostradamus, the coming of comets and judgment day, the Rosicrucians and astrology. Time and again we can avoid disastrous pitfalls and learn to profit by seeing the ways that history repeats itself. Fascinating, mesmerizing, strikingly strange and amazingly shrewd, this book will never be forgotten and cannot be ignored.
