Educating For Freedom The Paradox Of Pedagogy:

Educating for Freedom Donald L. Finkel, William Ray Arney, 1995 The very notion of teaching freedom suggests a paradox Ever since Rousseau the project of liberal education has been situated in the matrix of the teacher student relationship Some theorists have even seen this relationship as erotic Part one of this book explores the educational philosophies of Rousseau Freud Paolo Freire Ivan Illich and Michel Foucault All these thinkers wrestle with the paradox How can such a mutually dependent relationship foster independence The primary vehicle necessary to a liberating education the personal relationship is also the fundamental obstacle to the achievement of genuine liberation After reaching this conclusion the authors turn away from the student teacher relationship and the paradox of pedagogy to examine another type of teaching and learning where two teachers who differ in fundamental ways engage in collegial teaching with students they have in common Collegial teaching is described in its particularity based on the authors experiences at an unusual liberal arts college The Evergreen State College They find that the changed dynamics of equality and the altered structure of authority created by collegial teaching is rewarding for both teachers and students and may be a way out of the paradox of pedagogy to intellectual freedom

reexamines African American empirical methodological and theoretical contributions to knowledge making teaching and learning and American education from the nineteenth through the twenty first century the most dynamic period of African American educational thought and activism African American thought and activism regarding education burgeoned from traditional academic disciplines such as philosophy and art mathematics and the natural sciences and history and psychology from the Black church as well as from grassroot political social cultural and educational activism with the desire to assess the stake of African Americans in modernity **Educating for Democracy** Alan M. Olson, David M. Steiner, Irina S.

Tuuli, 2004-08-04 The central conflicts of the world today are closely related to cultural traditional and religious differences between nations As we move to a globalized world these differences often become magnified entrenched and the cause of bloody conflict Growing out of a conference of distinguished scholars from the Middle East Europe and the United States this volume is a singular contribution to mutual understanding and cooperative efforts on behalf of peace The term *paideia* drawn from Greek philosophy has to do with responsible education for citizenship as a necessary precondition for effective democracy The problems discussed here are crucial but not simple How can we find shared ethical principles on which to build international consensus How can religious tolerance make inroads in societies accustomed to restrictive fundamentalism What might bring about the de dogmatization of education in the Middle East as a necessary condition for free and rational inquiry and the broader vistas required by democracy All of these issues highlight the underlying question What is education really for Finally the volume confronts the promises and perils of economic globalization Noting that one third of the world's population lives in abject poverty business has become a battlefield where ethics and trust are clearly at stake

American Book Publishing Record ,2005 *Bridging Educational Leadership, Curriculum Theory and Didaktik* Michael Uljens,Rose M. Ylimaki,2017-10-04 This book is open access under a CC BY 4 0 license This volume argues for the need of a common ground that bridges leadership studies curriculum theory and Didaktik It proposes a non affirmative education theory and its core concepts along with discursive institutionalism as an analytical tool to bridge these fields It concludes with implications of its coherent theoretical framing for future empirical research Recent neoliberal policies and transnational governance practices point toward new tensions in nation state education These challenges affect governance leadership and curriculum involving changes in aims and values that demand coherence Yet the traditionally disparate fields of educational leadership curriculum theory and Didaktik have developed separately both in terms of approaches to theory and theorizing in USA Europe and Asia and in the ways in which these theoretical traditions have informed empirical studies over time An additional aspect is that modern education theory was developed in relation to nation state education which in the meantime has become more complicated due to issues of globopolitanism This volume examines the current state of affairs and addresses the issues involved In doing so it opens up a space for a renewed and thoughtful dialogue to rethink and re theorize these traditions with non affirmative education theory moving beyond social reproduction and social transformation perspectives

Remixing the Classroom Randall Everett Allsup,2016-06-27 In a delightfully self conscious philosophical mash up Randall Everett Allsup provides alternatives for the traditional master apprentice teaching model that has characterized music education By providing examples across the arts and humanities Allsup promotes a vision of education that is open changing and adventurous at heart He contends that the imperative of

growth at the core of all teaching and learning relationships is made richer though less certain when it is fused with a student's self-initiated quest. In this way the formal study of music turns from an education in teacher-directed craft and moves into much larger and more complicated fields of exploration. Through vivid stories and evocative prose, Randall Everett Allsup advocates for an open quest-driven teaching model that has repercussions for music education and the humanities more generally.

Paulo Freire Peter Leonard, Peter McLaren, 2002-11-01 Paulo Freire is one of the century's great thinkers on education and the politics of liberation. Known mostly for his literacy campaigns in Latin America and Africa and for his seminal work *Pedagogy of the Oppressed*, his thinking continues to be rediscovered by generations of teachers, scholars, community activists, and cultural workers in Europe and North America. While his name is synonymous with the practice of Critical Literacy and *A Pedagogy of Liberation*, his work has been appropriated in many diverse fields of discipline and site-based projects of social reform. This volume represents a pathfinding analysis of Freire's work and in many cases it offers an extension of his thinking in order to make it more applicable to first world contexts. Peter McLaren and Peter Leonard have brought together a divergent group of scholars widely recognized for their contributions to critical theory and critical pedagogy. Themes addressed include Freire's relation to feminist critique, his philosophical roots, and an evaluation of his ideas from postmodernist and postcolonialist perspectives. The collection will be essential reading for anyone interested in the radical sociology of education and the politics of liberation.
