Education and Capitalism Jeff Bale, Sarah Knopp, 2012-04-17 Educators examine the state of public schooling confront the anti union stance of policymakers and offer a bold new direction in this essay anthology A conservative bipartisan consensus dominates the discussion about what s wrong with our schools and how to fix them It offers solutions that scapegoat teachers vilify unions and impose a market mentality on education In Education and Capitalism teacher activists expose the damaging limitations of this elite consensus and offer an alternative vision of learning for liberation Co editors Sarah Knopp and Jeff Bale presents a powerful defense of public education Other contributors offer historical analysis of school reform with a focus on civil rights and union led movements Arguing that today s schools are designed to serve the needs of capitalism rather than students this volume offers an action plan for positive change

Education and Capitalism Joseph L. Bast, Herbert J. Walberg, 2013-09-01 The authors call on the need to combine education with capitalism Drawing on insights and findings from history psychology sociology political science and economics they show how if our schools were moved from the public sector to the private sector they could once again do a superior job providing K 12 education

Critical Education Against Global Capitalism Paula Allman, 2019-04-09 In today s vernacular Marx outed capitalism well over a century ago however his explanation has been both ignored and misinterpreted by not only his detractors but also by many socialists and even a considerable number of Marxists as well Today we are

experiencing the full impact and suffering the repercussions of capitalism's inherent need to grow and become more than ever before a fully internationalized and integrated system of socioeconomic control and domination the global system that many commentators have suddenly remembered Marx and Engels 1848 presciently forecasted in the Communist Manifesto When the Berlin Wall fell in 1989 the victory of capitalism and liberal democracy was triumphantly proclaimed The Cold War was over and we were promised a lasting peace As we entered the third millennium the promise of peace was brutally dashed and humanity now appears to have entered a state of permanent war We have just witnessed the near total collapse of the global financial system and are continuing to experience as we will for years to come the collateral damage this crisis has caused Problems we were facing before the current crisis will be exacerbated escalating social and economic divisions jobless growth injustice and oppression together with an environment in varying stages of degradation Daily on television news we are bombarded by the schizoid media images of capitalism's extremes the ravaged faces and wasted bodies of some of the thousands suffering famine or the millions living in the world's slums followed within a blink of the eye by the gleaming yet vacuous smile and sumptuously adorned figure of some extravagant wealthy individual who is one of the select members of the global upper class Are we becoming conditioned to accept such contrasts and regard them as normal and inevitable at a time when we have the potential to eliminate scarcity and eradicate human deprivation The author argues that revolutionary critical education is needed to inform and form a social movement capable of challenging and then transforming capitalism She also offers an accessible account of Marx's dialectical critique and exposés of capitalism clearly demonstrating the real enemy that should be the focus of anti capitalist and anti globalization struggles This is an account that explains why our focus should not be on greedy individual capitalists Wall Street financial institutions particular multinational corporations national governments or even their handmaiden institutions such as the World Bank IMF WTO etc but instead the global network of capitalist socioeconomic relations and consequent habituated human practices in which we are all involved These together with the historically specific form of capitalist wealth are the real enemy the essence of capitalism that must be abolished in order for humanity to have any hope of social and economic justice in the future

Against Capitalist Education Nadim Bakhshov, 2015-12-11 Out there in the so called real world the education system is being crushed by the demands of capitalism and in turn is crushing those who pass through it reducing them diminishing them The dream of the economic functioning unit How do we break this We need alternatives but not just one or two We need the freedom and education to generate a trillion possibilities An education system that is as broad as it is deep that brings back a different type of thinking and a new use of fiction This book signals the return of the dialogue and the conversation as the ground out of which new realities are born the root out of which new alternatives are nurtured and explored Inequality in Education Donald B. Holsinger, W. James Jacob, 2009-05-29 Inequality in Education Comparative and International Perspectives is a compilation of conceptual chapters and national case studies that includes a series of

methods for measuring education inequalities The book provides up to date scholarly research on global trends in the distribution of formal schooling in national populations It also offers a strategic comparative and international education policy statement on recent shifts in education inequality and new approaches to explore develop and improve comparative education and policy research globally Contributing authors examine how education as a process interacts with government finance policy to form patterns of access to education services In addition to case perspectives from 18 countries across six geographic regions the volume includes six conceptual chapters on topics that influence education inequality such as gender disability language and economics and a summary chapter that presents new evidence on the pernicious consequences of inequality in the distribution of education The book offers 1 a better and more holistic understanding of ways to measure education inequalities and 2 strategies for facing the challenge of inequality in education in the processes of policy formation planning and implementation at the local regional national and global levels

The Palgrave International Handbook of Marxism and Education Richard Hall, Inny Accioly, Krystian Szadkowski, 2023-11-07 The Palgrave International Handbook of Marxism and Education is an international and interdisciplinary volume which provides a thorough and precise engagement with emergent developments in Marxist theory in both the global South and North Drawing on the work of authoritative scholars and practitioners the handbook explicitly shows how these developments enable a rich historical and material understanding of the full range of education sectors and contexts The handbook proceeds in a spirit of openness and dialogue within and between various conceptions and traditions of Marxism and brings those conceptions into dialogue with their critics and other anti capitalist traditions As such it contributes to the development of Marxist analyses that push beyond established limits by engaging with fresh perspectives and views that disrupt established perspectives

Education and the Creation of Capital in the Early American Republic Nancy Beadie, 2010-07-30 This book argues that schools were a driving force in the formation of social political and financial capital during the market revolution and capitalist transition of the early republican era Grounded in an intensive study of schooling in the Genesee Valley region of upstate New York it traces early sources of funding and support for education including common schools and various forms of higher schooling to their roots in different social and economic networks and trade and credit relations It then interprets that story in the context of other major developments in early American social political and economic history such as the shift from agricultural to non agricultural production the integration of rural economies into translocal capitalist markets the organization of the Second Great Awakening the transformation of patriarchy the expansion of white male suffrage the emergence of the Secondary American Party System and the formation of the modern liberal state

Education, Science and Knowledge Capitalism Michael A. Peters, 2013 We live in the age of global science but not primarily in the sense of universal knowledge that has characterized the liberal metanarrative of free science and the free society since its early development in the Enlightenment Today an economic logic links science to national economic policy while globalized

multinational science dominates an environment where quality assurance replaces truth as the new regulative ideal This book examines the nature of educational and science based capitalism in its cybernetic knowledge algorithmic and bioinformational forms before turning to the emergence of the global science system and the promise of openness in the growth of international research collaboration the development of the global knowledge commons and the rise of the open science economy Education Science and Knowledge Capitalism explores the nature of cognitive capitalism the emerging mode of social production for public education and science and its promise for the democratization of knowledge

Neoliberalism, Critical Pedagogy and Education Ravi Kumar, 2015-12-22 This volume examines the role of neoliberalism and its impact on education in South Asia It contends that education is in a state of crisis across the world This is reflected not only in the way the state has withdrawn to pave way for private capital but also in the manner in which knowledge and ways of understanding the world are being challenged by manipulation and adverse influences A process of factoryisation is underway as disciplining of human minds and redefinition of the purpose of human existence are being geared to fall in line with the needs of private capital The book brings together incisive contributions from India Sri Lanka Pakistan and Nepal to explore newer possibilities to deal with the educational crisis and looks at a range of critical themes in education pedagogy teacher learner relationship teacher education the state of the university and policy Rich in content critical and insightful this book will be a valuable addition for scholars and researchers of education and education policy sociology public policy and South Asian Studies

The Praeger Handbook of Urban Education Philip M. Anderson, Kecia Hayes, Joe Kincheloe, Karel Rose, 2006-03-30 Maintaining that urban teaching and learning is characterized by many contradictions this work proposes that there is a wide range of social cultural psychological and pedagogical knowledge urban educators must possess in order to engage in effective and transformative practice It is necessary for those teaching in urban schools to be scholar practitioners rather than bureaucrats who can only follow rather than analyze understand and create Ten major sections cover the myriad issues of urban education as it exists today

Learning to Save the Future Alexander J. Means, 2018-04-09 Mainstream economists and Silicon Valley entrepreneurs claim that unfettered capitalism and digital technology can unlock a future of unbounded prosperity create endless high paying jobs and solve the world's vast social and ecological problems Realizing this future of abundance purportedly rests in the transformation of human potential into innovative human capital through new 21st century forms of education In this new book Alex Means challenges this view Stagnating economic growth and runaway inequality have emerged as the normal condition of advanced capitalism Simultaneously there has been a worldwide educational expansion and a growing surplus of college educated workers relative to their demand in the world

economy This surplus is complicated by an emerging digital revolution driven by artificial intelligence and machine learning that generates worker displacing innovations and immaterial forms of labor and valorization Learning to Save the Future argues that rather than fostering mass intellectuality educational development is being constrained by a value structure subordinated to 21st century capitalism and technology Human capabilities from creativity design engineering to communication are conceived narrowly as human capital valued in terms of economic productivity and growth Similarly global problems such as the erosion of employment and climate change are conceived as educational problems to be addressed through business solutions and the digitalization of education This thought provoking account provides a cognitive map of this condition offering alternatives through critical analyses of education and political economy technology and labor creativity and value power and ecology

Education at War Arshad Imtiaz Ali, 2018-04-10 Education at War The Fight for Students of Color in America's Public Schools attempts to shape educational research and practice to more explicitly consider the relationship between education capitalism and war and more specifically its impact on students of color The authors as a whole contend that the contemporary specter of war has become a central way that racism and materialism become manifested and practiced within education In particular this collection asserts that the contemporary neoliberal characterization of education and school based reform is situated within the global political economy that has facilitated a growth in the prison and military industrial complex and simultaneous divestment in education domestically within the U S Education at War attempts to make research relevant by bringing the tensions within young people's lives to the fore The heavy shadow cast by recent U S led wars re organizes the sites of learning and teaching nationally as well as differentially within specific sites and upon particular communities Nonetheless the examination of this context is not enough Rather we consider how such a contemporary context can facilitate educational spaces for communities and youth to grow their vision for a different and hopefully a more humanizing future Thus the book contributors will collectively explore how resistance can produce the opportunity for rich diverse and transformative learning for marginalized students and communities The lives of People of Color are the forefront of Education at War The Fight for Students of Color in America's Public Schools Whereas there are many attempts to theorize about the global implications of war less attention is paid to the ways that war shapes young lives in the U S particularly in an educational context The book addresses the absence of youth centered discussions regarding education during a political context of neoliberalism and war and provides important perspectives on which to ground critical discussions among students and families education scholars and practitioners and policymakers

Côté,2016-06-03 This is the first handbook to cover the sociological approaches to higher education It is timely because of global expansions of mass higher educational systems especially as these systems come under scrutiny by a variety of stakeholders Questions are being raised about the value of traditional pedagogies along with calls for efficiency accountability and cost reduction but above all job training Within this neoliberal context each chapter examines different sociological aspects of and debates about educational institutions as status conferring organizations with myriad positional characteristics experiences and outcomes Many current debates concern the legitimacy of the statuses conferred including the continuing debate regarding the role of universities in legitimating social class reproduction as well as more recent concerns about standards in mass systems This handbook puts these issues and debates in focus in ways that will be of interest to a variety of stakeholders within academia as well as in policy circles
