Education And Culture In The Barbarian West Sixth Through Eighth Centuries:

Education and Culture in the Barbarian West Pierre Riché,1978 *Education and Culture in the Barbarian West* Pierre Riché,1978 **Education and Culture in the Barbarian West** Pierre Riché,1978 *Education and Culture in the Barbarian West* Pierre Riche,2006-02-01 **The Political Thought of King Alfred the Great** David Pratt,2007-05-31 This book is a comprehensive study of political thought at the court of King Alfred the Great 871 99 It explains the extraordinary burst of royal learned activity focused on inventive translations from Latin into Old English attributed to Alfred s own authorship A full exploration of context establishes these texts as part of a single discourse which placed Alfred himself at the heart of all rightful power and authority A major theme is the relevance of Frankish and other European experiences as sources of expertise and shared concerns and for important contrasts with Alfredian thought and behaviour Part I assesses Alfred s rule against West Saxon structures showing the centrality of the royal household in the operation of power Part II offers an intimate analysis of the royal texts developing far reaching implications for Alfredian kingship communication and court culture Comparative in approach the book places Alfred s reign at the forefront of wider European trends in aristocratic life **Christendom and Christianity in the Middle Ages** Adriaan Bredero,1994 This is a print on demand book and is therefore non returnable Though buffeted on all sides by rapid and at times cataclysmic social political and economic change the medieval church was able to make adjustments that kept it from becoming simply a fossil from the past rather than an enduring institution of salvation The dynamic interaction between the medieval church and society gives form to this compelling and well informed study by Adriaan Bredero By considering medieval Christianity in full relation to its historical context Bredero elucidates complex medieval realities many of which run counter to common modern notions about the Middle Ages Bredero moves beyond the usual treatment of history by framing his overall discussion in terms of a fascinating and relevant question To what extent is Christianity today still molded by medieval society The book begins with an overview of religion and the church in medieval society from the early Christianization of Western Europe through the fifteenth century Bredero counters earlier romanticized assessments of the Middle Ages as a thoroughly Christian period by arriving at a definition of Christendom not in its original sense as the empire of Charlemagne but rather as the countries people and matters which stood under the influence of Christ *The Medieval Military Engineer* Peter Fraser Purton,2018 Sheds light on the skills and techniques of the medieval military engineer over a thousand year sweep The results of medieval engineering still surround us cathedrals castles stone bridges irrigation systems However the siege artillery siege towers temporary bridges earthwork emplacements and underground mines used for war have left little trace behind them and there is even less of the engineers themselves the people behind the military engineering achievements The evidence for this neglected group is studied here The author begins by considering the evolution of military technology across centuries and the impact of new technologies in the context of the economic and social developments which made them possible He looks

at how military engineers obtained their skills and the possible link with scholastic scientific awareness With the increased survival of government records from the middle ages engineers acquire names and individuals can be identified And the fifteenth century the age of polymaths such as Leonardo da Vinci saw a new type of literate military engineer part of a recognized profession but with its roots in a thousand years of historical development PETER PURTON D Phil Oxon FSA has written extensively on medieval fortifications and siege warfare his publications include the comprehensive two volume history of the medieval siege Boydell 2010

Early Carolingian Warfare Bernard S. Bachrach, 2011-03-08 Without the complex military machine that his forebears had built up over the course of the eighth century it would have been impossible for Charlemagne to revive the Roman empire in the West Early Carolingian Warfare is the first book length study of how the Frankish dynasty beginning with Pippin II established its power and cultivated its military expertise in order to reestablish the regnum Francorum a geographical area of the late Roman period that includes much of present day France and western Germany Bernard Bachrach has thoroughly examined contemporary sources including court chronicles military handbooks and late Roman histories and manuals to establish how the early Carolingians used their legacy of political and military techniques and strategies forged in imperial Rome to regain control in the West Pippin II and his successors were not diverted by opportunities for financial enrichment in the short term through raids and campaigns outside of the regnum Francorum they focused on conquest with sagacious sensibilities preferring bloodless diplomatic solutions to unnecessarily destructive warfare and disdained military glory for its own sake But when they had to deploy their military forces their operations were brutal and efficient Their training was exceptionally well developed and their techniques included hand to hand combat regimented troop movements fighting on horseback with specialized mounted soldiers and the execution of lengthy sieges employing artillery In order to sustain their long term strategy the early Carolingians relied on a late Roman model whereby soldiers were recruited from among the militarized population who were required by law to serve outside their immediate communities The ability to mass and train large armies from among farmers and urban dwellers gave the Carolingians the necessary power to lay siege to the old Roman fortress cities that dominated the military topography of the West Bachrach includes fresh accounts of Charles Martel's defeat of the Muslims at Poitiers in 732 and Pippin's successful siege of Bourges

in 762 demonstrating that in the matter of warfare there never was a western European Dark Age that ultimately was enlightened by some later Renaissance The early Carolingians built upon surviving military institutions adopted late antique technology and effectively utilized their classical intellectual inheritance to prepare the way militarily for Charlemagne's empire *A History of Christian Thought Volume II* Dr. Justo L. Gonzalez, 2010-09-01 A treatment of the evolution of Christian thought from the birth of Christ to the Apostles to the early church to the great flowering of Christianity across the world Beginning with Augustine Volume 2 covers the flowering of Christian thought that characterized both the Latin West and the Byzantine East during the Middle Ages *A History of Christian Thought* Justo L. González, 1987 In this first of a three part series designed to display the rich variety and complexity in Christian thought both theological students and lay readers can benefit from Dr Gonzalez broad ecumenical scope and theological understanding Publisher **RB 1980: The Rule of St. Benedict**, 2016-12-19 For fifteen centuries Benedictine monasticism has been governed by a Rule that is at once strong enough to instill order and yet flexible enough to have relevance fifteen hundred years later Unabridged Edition

Queens, Consorts, Concubines: Gregory of Tours and Women of the Merovingian Elite E. T. Dailey, 2015-04-14 Gregory of Tours hoped to inspire the believers in sixth century Gaul with examples of righteous and wicked deeds and their consequences Critiquing his own society Gregory contrasted vengeful queens rebellious nuns and conniving witches with pious widows humble abbesses and tearful saints By examining his thematic treatment of topics including widowhood marriage sanctity authority and political agency *Queens Consorts Concubines* reassesses the material shaped by such concerns including e.g. Gregory's accounts of Brunhild Fredegund Radegund and other important elite women Merovingian political policies marital alliances ecclesiastical intrigue even assassinations and seemingly unrelated topics such as Hermenegild's rebellion and the career of Empress Sophia The result a new interpretation of an important witness to the transformations of Late Antiquity **Ethical Life** Harry Redner, 2001 Australian philosopher of science Redner argues that cultural life consists of three fundamental aspects representation ethos and technics This is the second of four volumes setting out a comprehensive theory of human culture The first is *A New Science of Representation* the third and companion to the second will be *Aesthetic Life* and the third will be *The Triumph of Technics* His conclusion at the end of the series is that the contemporary global culture is a triumph of technics over representation and ethos c Book News Inc **Learning as Shared Practice in Monastic Communities, 1070-1180** Micol Long, 2021-10-11 In this study Micol Long looks at Latin letters written in Western Europe between 1070 and 1180 to reconstruct how monks and nuns learned from each other in a continuous informal and reciprocal way during their daily communal life The book challenges the common understanding of education as the transmission of knowledge via a hierarchical master disciple learning model and shows how knowledge was also shared exchanged jointly processed and developed Long presents a new and more complicated picture of reciprocal knowledge exchanges which could be horizontal and bottom up as well as vertical and where the same individuals could

assume different educational roles depending on the specific circumstances and on the learning contents See inside the book

Re-Envisioning Past Musical Cultures Peter Jeffery, 1992 Studying Gregorian chant presents many problems to the researcher because its most important stages of development were not recorded in writing From the sixth to the tenth century this form of music existed only in song as medieval musicians relied on their memories and voices to pass each verse from one generation to the next Peter Jeffery offers an innovative new approach for understanding how these melodies were created memorized performed and modified Drawing on a variety of disciplines including anthropology and ethnomusicology he identifies characteristics of Gregorian chant that closely resemble other oral traditions in non Western cultures and demonstrates ways music historians can take into account the social cultural and anthropological contexts of chant s development
