revived interest in economic scholarship from a historical perspective The most in depth studies of the relationship between economics and history can be found in the work of the so called German Historical School GHS The influence of the GHS in the USA and Britain has been well documented but far less has been written on the rest of Europe This volume studies the interconnection between economic thought and economic policy from the mid nineteenth century to the interwar period It examines how the School s ideas spread and was interpreted in different European countries between 1850 and 1930 analysing its legacies in these countries In doing so the book is able to trace the interconnection between economic thought and economic policy adding new voices to the debate on the diffusion of ideas and flow of knowledge This book identifies issues related to topics such as nationalism and cosmopolitanism in the history of ideas and clarifies themes in policy making that are still currently debated These include monetary policy and benefits of free trade for all parties involved in international exchanges This book will be of a great interest to those who study history of economic thought economic theory and political economy      Education and Economic Development Daniela-Mihaela Neamtu,2023-03-30 This book explores how education influences economic and social development With a particular focus on the role of higher education and universities policies that promote education are analysed to highlight how economic development can be encouraged and hindered through policymaking Comparative trends within Europe and Romania are examined to provide insight into the different ways in which education has evolved across the continent The relationship between levels of education and employability personal development and professional development is also discussed This book aims to examine how education policies can maximise economic growth and social development It will be relevant to students and researchers interested in economic development and education economics      The Economic Thought of Friedrich List Harald Hagemann,Stephan Seiter,Eugen Wendler,2018-11-08 As the world grapples with increased globalization and technological change Friedrich List s work appears more relevant than ever before His theory of productive powers and his argument for protecting infant industries give us a valuable way of looking at innovation systems winners and losers in international trade and the current shift towards economic and political nationalism Comprising fifteen specially commissioned chapters from a range of international scholars this book explores many aspects of List s economic thought including industrial development political economy the economics of education infrastructure and catching up processes in Asian economies This volume will be illuminating reading for advanced students and researchers in the history of economic thought economic history economic policy and international trade      **A New Education for a New Economy: From Human Capital to Human Flourishing** Tal Gilead,2024-06-03 Providing an in depth novel analysis of education s role in today s economy by scrutinizing its theoretical underpinnings this volume critiques the suitability of the current dominant economic framework for education and for shaping educational policymaking worldwide Critically examining the history and philosophy that underpin our present societal understanding of the link between economics and education the book argues for an urgent redefining of

education's role in the economy based on intellectual foundations that significantly differ from our current dominant conceptions. Across seven chapters the book posits that the adoption of a new philosophical framework, the reshaping of economic and educational aims and the adjustment of our educational system are each necessary to better promote human flourishing. Ultimately providing a platform to entirely reconsider the idea that the primary aim of education is to serve the economic system, in particular economic growth, this book will appeal to scholars, researchers and postgraduate students studying educational policy, the philosophy of education and the history of education more broadly. Spring, 2015-03-27. In this timely, cogent analysis of trends and powerful forces shaping global educational policy today, Joel Spring focuses on how economization is making economic growth and increased productivity the main goals of schools and the ways these goals are achieved, including measuring educational policies by their costs and economic benefits, shaping family life to ensure productive workers and high-achieving students, introducing entrepreneurship education into curricula from preschool through higher education, and increasing the involvement of economists in educational policy analysis. Close attention is given to the Organization for Economic Cooperation and Development (OECD), the World Bank, the World Economic Forum, and multinational corporations, which as advocates of economization want schools to focus on teaching hard and soft skills needed by the global labor market. Economization raises questions about the effects of economically driven agendas for schools. Will education policies advocated by global organizations and multinational businesses corporatize and standardize human personalities and families? What type of global worker is being sought by global organizations and multinational corporations? What education programs are supported to educate the ideal global worker? What is the ideal family life for economic growth and development? Detailing and analyzing the politics and motivations driving economization, the book concludes with an assessment of the impacts of the confluence of business interests, economic theories, governments, and educators. *Economic Thought Since Keynes* Michel Beaud, Gilles Dostaler, 2005-09-27.
