

INDIA'S EDUCATION CHALLENGE:

Low Learning Outcomes & Underperforming Higher Education

"Education is the most powerful weapon which you can use to change the world." — Nelson Mandela

INDIA, HOME TO 20 per cent of the world's youth population, stands at the cusp of a demographic dividend set to peak in 2041. This demographic advantage can only transform India's growth if the country's youth population is equipped with the requisite skills to enhance the country's productivity on the global stage. To empower the younger population with a high level of requisite skills, a robust and efficient education system is essential, particularly at the higher education level. In recent years, India has made significant strides in improving its access to basic education, but considerable gaps persist at the higher education level that must be addressed to fully harness this potential.

cent. This low GER at the higher secondary level further contributes to fewer people enrolling in undergraduate and post-graduate programmes, causing the GER at the higher education level to fall to just 28.40 per cent. This worrying trend is underscored by Periodic Labour Force Survey (PLFS) data, which reveals that less than 10 per cent of the population has completed a graduate degree or above. In contrast, 52.4 per cent of the Indian workforce has only primary education, and 37.8 per cent have secondary education. The low attainment of higher-level education consequently leads to most of the population being employed at low-level occupations and less high-skilled activities in the country.

A 2022 Choice Reviews Outstanding Academic Title. *Negotiating Patriarchy and Gender in Africa: Discourses, Practices, and Policies* examines the entrenchment of patriarchy in Africa and its attendant socioeconomic and political consequences on gender relations. The contributors analyze the historical and modern ways in which gender expectations have enabled women in African societies to be systematically abused and marginalized from unpaid labor to poor representation in decision-making areas. Exploring regions such as rural Uganda, the suburbs of Zimbabwe, the Gold Coast, South Africa, and Nigeria, contributors incorporate a wide range of academic theories and disciplines to establish the need for improved policy implementation on gender issues at both the local and national government levels in Africa.
