The title of this book has two meanings One meaning expresses a sense of relief that during the last several years post secondary institutions have begun to pay serious attention to the enhancement of instruction on their campuses There has been an emergence of new organisations associations conferences seminars and workshops a proliferation of books journals and articles an expansion of research and investigative inquiry and a growth of interest among post secondary faculty members and administrators all of which are devoted to various aspects of the improvement of both teaching and learning at the undergraduate level These initiatives have combined to furnish undeniable evidence attesting to the pursuit of better teaching and learning in higher education Increasing numbers of post secondary educators students and tax payers at large not only welcome wholeheartedly this new emphasis and as suggested by the last clause in the title they feel it has been long overdue A second interpretation of the title and the one which is a key theme of this book emphasises the substantive concept of the use and management of time and timing as an integral component of effective instruction From the Introduction      The Principalship Frederick C. Lunenburg,Beverly J. Irby,2022-08-04

Today's emphasis on student learning outcomes coupled with federal legislation to that end has placed more demands on the role of the principal than ever before in our nation's history To address the heightened demands for greater accountability for student learning The Principalship uses a learning centered approach one that emphasizes the role of the principal as the steward of the school's vision learning for all The critical aspects of the teaching learning process are addressed here including student motivation individual differences classroom management assessing student learning and developing maintaining and changing school culture In addition several topics not found in other principalship texts are addressed including school safety special education gifted education bilingual education nontraditional organizational structures gender inclusive theories diversity ethics political and policy context human resource management legal issues and collective bargaining The book is documented extensively throughout and grounded in the latest research and theory with suggestions for applying theory to practice reflecting cutting edge research and topical issues facing principals in schools today
