Cultural Landscape Report Regina M. Bellavia, Gregg Bleam, 1996 Contemporary Architects Ann Lee Morgan, Colin Naylor, 1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day

contributors draw on their wide ranging understanding of modern architecture to reveal the ways in which Wright continues to play an instrumental role in domestic and international spheres making the case for reevaluating his popular and professional reputations Prompted by the transfer of the architect's archive from its home at Taliesin West in Scottsdale Arizona to the Avery Library at Columbia University and the Museum of Modern Art this volume revisits Wright's relevance for a contemporary audience Contributors Barry Bergdoll Columbia University Daniel Bluestone Boston University Jean Louis Cohen New York University Cammie McAtee independent scholar Neil Levine Harvard University Dietrich Neumann Brown University Timothy M Rohan University of Massachusetts Amherst Richard Longstreth George Washington University Jack Quinan University at Buffalo Alice Thomine Berrada cole des Beaux Arts Modern Architecture Alan Colquhoun, 2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re-examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition **Tremaine Houses** Volker M. Welter, 2019-11-19 This volume analyzes the extraordinary patronage of modern architecture that the Tremaine family sustained for nearly four decades in the mid twentieth century From the late 1930s to the early 1970s two brothers Burton G Tremaine and Warren D Tremaine and their respective wives Emily Hall Tremaine and Katharine Williams Tremaine commissioned approximately thirty architecture and design projects Richard Neutra and Oscar Niemeyer designed the best known Tremaine houses Philip Johnson and Frank Lloyd Wright also created designs and buildings for the family that achieved iconic status in the modern movement Focusing on the Tremaines houses and other projects such as a visitor center at the meteor crater in Arizona this volume explores the Tremaines architectural patronage in terms of the family's motivations and values exposing patterns in what may appear as an eclectic collection of modern architecture Architectural historian Volker M Welter argues that the Tremaines patronage was not driven by any single factor rather it stemmed from a network of motives comprising the clients practical requirements their private and public lives and their ideas about architecture and art **Translucent Building Skins** Scott Murray, 2013-05-07 Exploring the design of innovative building enclosure systems or skins in contemporary architecture and their precedents in earlier twentieth century modern architecture this book examines the tectonics the history and the influence of translucency as a defining characteristic in architecture Highly illustrated throughout with drawings and full colour photographs the book shows that translucency has been and continues to be a fertile ground for architectural experimentation Each chapter presents a comparative analysis of two primary buildings a recent project paired with a historical precedent highlighting how architects in different eras have realized the distinctive effects of translucency The included buildings span a variety of

program types ranging from a single family residence to a factory to a synagogue Whether it is Pierre Chareau s glass lens curtain wall at the Maison de Verre Frank Lloyd Wright s wall of stacked glass tubes at the Johnson Wax Research Tower or Peter Zumthor s use of acid etched glass in a double skin envelope at the Kunsthau Bregenz the included projects each offer an exemplary case study of innovations in materiality and fabrication techniques Today among many contemporary architects there is an engagement with new technologies new material assemblies and new priorities such as sustainability and energy efficiency A resurgent interest in translucency as a defining quality in buildings has been an important part of this recent dialogue and this book makes essential reading for any architect looking to incorporate aspects of translucency into their buildings

A Critical History of Contemporary Architecture Asst Prof David Rifkind, Dr Elie G Haddad, 2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects Catalog of the Avery Memorial Architectural Library of Columbia University Avery Library, 1968

University Planning and Architecture Jonathan Coulson, Paul Roberts, Isabelle Taylor, 2015-01-09 The environment of a university what we term a campus is a place with special resonance They have long been the setting for some of history s most exciting experiments in the design of the built environment Christopher Wren at Cambridge Le Corbusier at Harvard and Norman Foster at the Free University Berlin the calibre of practitioners who have shaped the physical realm of academia is superlative Pioneering architecture and innovative planning make for vivid assertions of academic excellence while the physical estate of a university can shape the learning experiences and lasting outlook of its community of students faculty and staff However the mounting list of pressures economic social pedagogical technological currently facing higher education institutions is rendering it increasingly challenging to perpetuate the rich legacy of campus design In this strained context it is more important than ever that effective use is made of these environments and that future development is guided in a manner that will answer to posterity This book is the definitive compendium of the prestigious sphere of campus design envisaged as a tool to help institutional leaders and designers to engage their campus s full potential by revealing the narratives of the world s most successful time honoured and memorable university estates It charts the worldwide evolution of university design from the Middle Ages to the present day uncovering the key episodes and themes that have conditioned the field and through a series of case studies profiles universally acclaimed campuses that through their planning architecture and landscaping have made original influential and striking contributions to the field By understanding this history present and future generations can distil important lessons for the future The second edition includes revised text many new images and new
