**Environmentally-Friendly Product Development** Eberhard Abele, Reiner Anderl, Herbert Birkhofer, 2007-08-06 Development of environmentally friendly products gains an increasing importance in science and in industry While product development was strongly dedicated to achieve quality cost and time targets environmental issues indirectly had always been under consideration by engineers see Fig 1 Furthermore a methodology for the development of

environmentally sound products was missing. Despite of significant progress in using computer aided tools for product development and design environmental aspects were attended. Computer aided tools typically do not include methods for considering environmental issues enabling the designer to assess a product's environmental effects. Fig 1 Vision of Environment as a key target for product development.

**vi Preface** Product related environmental issues are getting more and more political and public awareness. Development of environmentally friendly products has become an action item for both politics and industry. UNFCCC 1997 Energy consumption is on the agenda and covers pollution and resource saving. Typical topics of directives of the European Union are waste, noise, air pollution, water, nature and biodiversity, soil protection, civil protection and climate change. After the translation into national law the development of environmentally friendly products is a basic approach to contribute to the fulfilment of the topics mentioned above. In the European Community a Communication from the Commission to the Council and the European Parliament on Integrated Product Policy was adopted on the 18 June 2003.

**EC 2003** Problems of Product Design and Development C. Hearn Buck, 2013-10-22 Problems of Product Design and Development provides an elementary introduction to product design and development. Some of the topics discussed include an introduction to the kinds of design and production, initiation of a new product function and use of designed products, design for production and maintenance, coordination of design, job description of a designer and research and legal protection of designs. This book is a good reference for students taking management studies and individuals who want to understand the significance of design and development to the commercial organization.

The Organisation of Integrated Product Development Victor Paashuis, 2013-04-17 In today's industries New Product Development (NPD) is often the focal point of competition. Companies that are able effectively to develop, produce and introduce new products are the key competitors in markets where variety and time to market play an increasingly important role. This examination into the organisation of Integrated Product Development aims to answer the question: Which integration mechanisms lead to effective coordination and overlap of New Product Development activities in which situations? The mechanisms, strategies and goals, knowledge and skills and organisational arrangements are presented and their impact on the results of NPD projects and relationships is discussed. An in-depth understanding of the background and theory is provided using detailed case studies to illustrate both the human and organisational issues in practice.
