2

## WATERFALL TECHNIQUE

3

## AGILE PROJECT MANAGEMENT

It follows a value-centered approach. Under this technique, the project managers carry out the project in short-sprint forms. It goes like planning, implementation of the plan, and improvement.

4

## SCRUM

It also uses sprints like the agile project technique. Under this, milestones are set by the project manager, and they take regular updates on it. On every delivery of the milestone, they take feedback from the clients. This method works best for in-house teams. It is because of its flexibility, real-time communication, and transparency in operations.

5

## RATIONAL UNIFIED PROCESS (RUP)

This project management framework focuses on the end-satisfaction of the user. Under this, an iterative process is carried out under which regular feedback is taken after every step of implementation.

6

Several areas and businesses use this technique. The US navy developed this technique for efficient project management. Under this, they carry out detailed and complex planning. Following which, visual tracking takes place through PERT charts.

7

## CRITICAL PATH TECHNIQUE

This technique of project management works on algorithms. It is usually used by integrating with the PERT method. Under this, they detect the longest path of the project. Following this, the critical tasks are also detected. The critical functions are those who need extreme control and attention.

8

## CRITICAL CHAIN TECHNIQUE

They derive it from the critical path and PERT project management techniques. It does not aim its primary focus on scheduling. It preferably has more flexibility in planning resources and using the time.

9

## EXTREME PROJECT MANAGEMENT

Under this project management technique, they follow an open approach. It involves flexibility in planning and deterministic management. They use it for complex, unpredictable, and complex projects.

10
