While these voices are often accessed through research, it is rare they are seeking to lead the conversation. This book seeks to reset this balance. Drawing on themes such as discretion, respect, relationships, and legitimacy, it offers recommendations for best practices in developing a rehabilitative culture in prison. The Correctional Officer Inside Prisons Steven Herberts, 1998. Six five is a general warning to all inmates that an officer has just entered the area, so beware. Concealed behind tons of concrete bricks and steel lies a truly bizarre world, a world neither known or understood by most people. This world is called prison. Unlike the police, whose duties and responsibilities are widely understood by the community which they protect, the correction officer is seldom thought of. Both professions share many of the same problems, though the police are forever in the public eye, keeping their community well informed of the services they provide. However, the same is not true in regards to the duties performed by a correction officer, who for many years has dealt with poor public relations, unfair media coverage, and the out of sight, out of mind feeling from the public. But enclosed within the thick walls of the prison, the job is no less dangerous, as the same risks to personal safety are taken. This insightful book traces prison life through the eyes of the correction officers, the unsung heroes of the criminal justice system.

Promoting Wellness and Resiliency in Correctional Officers Hayden P. Smith, 2022-12-26. Correctional officers face considerable stress, risk, and danger that lead to poor physical and mental health outcomes. In fact, their life expectancy is 15 years shorter than the national average. Public perception and media portrayals of correctional officers tend to reinforce stereotypes of brutish, improper, and uncontrolled behavior. Yet the reality is that correctional officers are operating a default public and mental health system for a sizeable portion of our society, a responsibility that exposes them to considerable risk. These negative effects have been compounded by an international staffing crisis that has made our jails and prisons far less safe for working officers. To address this situation, this book features an examination of a combined 11,313 correctional officers and 42 of their family members in the United States, Canada, and Europe. It explores proactive strategies that can reduce rates of posttraumatic stress disorder (PTSD) in correctional officers, which currently surpasses those found in returning military veterans who experienced combat. It then delves into the dynamics of correctional officer suicide, featuring the perspectives of their families. This book highlights innovative approaches that can build on existing strengths, including the role of international exchange programs. It presents universal themes that impact the safety, wellbeing, and resiliency of correctional officers, along with positive outcomes related to evidence-based programs that maximize health in the correctional workplace. This book will be of interest to researchers and advanced students of criminology, mental health, public policy, social work, and sociology. The chapters in this book were

stifle meaningful reform and then goes on to tell how at least some of these policies can be altered. The book concludes with a chapter devoted to a discussion of impediments to change that should be required reading for all serious students of penology. Choice Hawkins has added a much needed down to earth analysis of prison. This is not a pessimistic book. It is a realistic book.
