Eileen Gray and the Design of Sapphic Modernity Jasmine Rault, 2017-07-05 The first book length feminist analysis of Eileen Gray's work Eileen Gray and the Design of Sapphic Modernity Staying In argues that Gray's unusual architecture and design as well as its history of abuse and neglect emerged from her involvement with cultures of sapphic modernism Bringing together a range of theoretical and historical sources from architecture and design communication and media to gender and sexuality studies Jasmine Rault shows that Gray shared with many of her female contemporaries a commitment to designing spaces for sexually dissident modernity This volume examines Gray's early lacquer work and Romaine Brooks' earliest nude paintings Gray's first built house E 1027 in relation to Radclyffe Hall and her novel The Well of Loneliness and Gray's private house Tempe nbsp Pailla with Djuna Barnes Nightwood While both female sexual dissidence and modernist architecture were reduced to rigid identities through mass media women such as Gray Brooks Hall and Barnes resisted the clarity of such identities with opaque non communicative aesthetics Rault demonstrates that by defying the modern imperative to publicity clarity and identity Gray helped design a sapphic modernity that cultivated the dynamism of uncertain bodies and unfixed pleasures which depended on staying in rather than coming out

Designing for Diversity Kathryn H. Anthony,2021-08-18 A powerful statement about the repercussions of discrimination and the benefits of diversity in architecture Providing hard data for trends that many perceive only vaguely and some deny altogether Designing for Diversity reveals a profession rife with gender and racial discrimination and examines the aspects of architectural practice that hinder or support the full participation of women and persons of color Drawing on interviews and surveys of hundreds of architects Kathryn H Anthony outlines some of the forms of discrimination that recur most frequently in architecture being offered added responsibility without a commensurate rise

in position salary or credit not being allowed to engage in client contact field experience or construction supervision and being confined to certain kinds of positions typically interior design for women government work for African Americans and computer aided design for Asian American architects Anthony discusses the profession's attitude toward flexible schedules part time contracts and the demands of family and identifies strategies that have helped underrepresented individuals advance in the profession especially establishing a strong relationship with a mentor She also observes a strong tendency for underrepresented architects to leave mainstream practice either establishing their own firms going into government or corporate work or abandoning the field altogether Given the traditional mismatch between diverse consumers and predominantly white male producers of the built environment plus the shifting population balance toward communities of color Anthony contends that the architectural profession staves off true diversity at its own peril Designing for Diversity argues convincingly that improving the climate for nontraditional architects will do much to strengthen architecture as a profession Practicing architects managers of firms and educators will learn how to create conditions more welcoming to a diversity of users as well as designers of the built environment **Women's Places** Brenda Martin,Penny

Sparke,2003-09-02 What was different about the environments that women created as architects designers and clients at a time when they were gaining increasing political and social status in a male world Through a series of case studies Women's Places Architecture and Design 1860 1960 examines in detail the professional and domestic spaces created by women who had money and the opportunity to achieve their ideal Set against a background of accepted notions of modernity relating to design and architecture of the late 19th and early 20th centuries this book provides a fascinating insight into women's social aspirations and identities It offers new information and new interpretations in the study of gender material culture and the built environment in the period 1860 1960 Architect's Drawings Kendra Schank Smith,2006-08-11 The sketch is a

window into the architect's mind As creative designers architects are interested in how other architects particularly successful ones think through the use of drawings to approach their work Historically designers have sought inspiration for their own work through an insight into the minds and workings of people they often regard as geniuses This collection of sketches aims to provide this insight Here for the first time a wide range of world famous architects sketches from the Renaissance to the present day can be seen in a single volume The sketches have been selected to represent the concepts or philosophies of the key movements in architecture in order to develop an overall picture of the role of the sketch in the development of architecture The book illustrates the work of designers as diverse as Andrea Palladio Erich Mendelsohn Sir Edwin Lutyens Gianlorenzo Bernini Le Corbusier Michelangelo Alvar Aalto Sir John Soane Francesco Borromini Walter Gropius and contemporary architects Tadao Ando Zaha Hadid and Frank Gehry to name but a few Each chronologically placed sketch is accompanied by text providing details about the architect's life a look at the sketch in context and the connection to specific buildings where appropriate Style media and meaning are also discussed developing an explanation of

the architect's thinking and intentions. As creative designers themselves, architects are interested in how other architects, particularly successful ones, think and draw and approach their work. Historically, designers have sought inspiration for their own work through an insight into the minds and workings of people they often regard as geniuses. This collection of sketches aims to provide this insight. Listed chronologically, each sketch will be accompanied by a text which provides a short synopsis, history of the architect's life, a look at the sketch in this context, the connection to a specific building where appropriate, techniques of the sketch style and media, meaning what the sketch shows about the architect's thinking and intentions, followed by a select bibliography for each section.

"Fashion, Interior Design and the Contours of Modern Identity" Alla Myzelev, 2017-07-05

Challenging the notion that fashion and furniture were or are separate enterprises and distinct material aesthetic traditions, this collection focuses on three material and conceptual links central to understanding the relationship between interior design and fashion: the body, fabric and space. The volume considers the changing visual material and spatial character, methodological challenges posed by, and formal, political and historiographical significance of a wide range of British, European and North American case studies since the eighteenth century. The volume's eleven case studies allow the reader to understand connecting notions behind the formation of interiors and fashionable clothing. The essays combine a wide range of significant and challenging new examples alongside powerful revisionary analyses of the various periods, artists, designers and their best and significant objects. *Fashion, Interior Design and the Contours of Modern Identity* is concerned not only with fabric but also with the body and the implications of embodiment in the practices of both design domains, which are equally invested in the comfort, aesthetic pleasure, extension and support of the body in different and yet seemingly identical ways.
