seventies he finally achieved his greatest ambition As an fearless young Conservative politician in the seventies and eighties one who witnessed the fall of Heath and the triumph and eventual decline of Thatcher Waldegrave was firmly at the heart of one of the most exciting and tumultuous periods of modern British history However just as his star was in the ascent Waldegrave became embroiled in a scandal which tarnished his reputation but could not dampen his voracious enthusiasm for the political game An unembroidered account of the narcotic effect of politics from one of the most fiercely intellectual governmental figures of the modern age A Different Kind of Weather is a beautifully weighted memoir of political success and failure and the passing of an era A Spectator Book of the Year refreshingly and engagingly candid Jane Ridley

Evolutionary Algorithms in Molecular Design David E. Clark,2008-11-21 When trying to find new methods and problem solving strategies for their research scientists often turn to nature for inspiration An excellent example of this is the application of Darwin s Theory of Evolution particularly the notion of the survival of the fittest in computer programs designed to search for optimal solutions to many kinds of problems These evolutionary algorithms start from a population of possible solutions to a given problem and by applying evolutionary principles evolve successive generations with improved characteristics until an optimal or near optimal solution is obtained This book highlights the versatility of evolutionary algorithms in areas of relevance to molecular design with a particular focus on drug design The authors all of whom are experts in their field discuss the application of these computational methods to a wide range of research problems including conformational analysis chemometrics and quantitative structure activity relationships de novo molecular design chemical structure handling combinatorial library design and the study of protein folding In addition the use of evolutionary algorithms in the determination of structures by X ray crystallography and NMR spectroscopy is also covered These state of the art reviews together with a discussion of new techniques and future developments in the field make this book a truly valuable and highly up to date resource for anyone engaged in the application or development of computer assisted methods in scientific research
