Effortless Action Wu Wei As Conceptual Metaphor And Spiritual Ideal In Early China:

Effortless Action Edward Slingerland, 2007-05-24 This book presents a systematic account of the role of the personal spiritual ideal of wu wei literally no doing but better rendered as effortless action in early Chinese thought Edward Slingerland's analysis shows that wu wei represents the most general of a set of conceptual metaphors having to do with a state of effortless ease and unself consciousness This concept of effortlessness he contends serves as a common ideal for both Daoist and Confucian thinkers He also argues that this concept contains within itself a conceptual tension that motivates the development of early Chinese thought the so called paradox of wu wei or the question of how one can consciously try not to try Methodologically this book represents a preliminary attempt to apply the contemporary theory of conceptual metaphor to the study of early Chinese thought Although the focus is upon early China both the subject matter and methodology have wider implications The subject of wu wei is relevant to anyone interested in later East Asian religious thought or in the so called virtue ethics tradition in the West Moreover the technique of conceptual metaphor analysis along with the principle of embodied realism upon which it is based provides an exciting new theoretical framework and methodological tool for the study of comparative thought comparative religion intellectual history and even the humanities in general Part of the purpose of this work is thus to help introduce scholars in the humanities and social sciences to this methodology and provide an example of how it may be applied to a particular sub field Dao Companion to Contemporary Confucian Philosophy David Elstein, 2020-12-17 This edited volume presents a comprehensive examination of contemporary Confucian philosophy from its roots in the late 19th century to the present day It provides a thorough introduction to the major philosophers and topics in contemporary Confucian philosophy The individual chapters study the central figures in 20th century Confucian philosophy in China Taiwan and Hong Kong as well as the important influences on recent Confucian philosophy In addition topical chapters focus on contemporary Confucian theory of knowledge ethics politics aesthetics and views of human nature The volume brings together scholars from around the world to provide a sound overview of the philosophy of the period and illustrate the important current debates Confucian philosophy has been undergoing a revival in China for more than three decades and this book presents the most significant work of the past century and more By giving a detailed account of the philosophical positions involved explaining the terminology of contemporary Confucian philosophy and situating the views in their historical context this volume enables the reader to understand what is at stake and evaluate the arguments Transcendence and Non-Naturalism in Early Chinese Thought Alexis McLeod, Joshua R. Brown, 2020-09-03 Contemporary scholars of Chinese philosophy often presuppose that early China possessed a naturalistic worldview devoid of any non natural concepts such as transcendence Challenging this presupposition head on Joshua R. Brown and Alexis McLeod argue that non naturalism and transcendence have a robust and significant place in early Chinese thought This book reveals that non naturalist positions can be found in early Chinese texts in topics including conceptions of

the divine cosmogony and apophatic philosophy Moreover by closely examining a range of early Chinese texts and providing comparative readings of a number of Western texts and thinkers the book offers a way of reading early Chinese Philosophy as consistent with the religious philosophy of the East and West including the Abrahamic and the Brahmanistic religions Co written by a philosopher and theologian this book draws out unique insights into early Chinese thought highlighting in particular new ways to consider a range of Chinese concepts including tian dao li and you wu Asian Philosophies and the Idea of Religion Sonia Sikka, Ashwani Peetush, 2020-09-28 With a focus on Asian traditions this book examines varieties of thought and self transformative practice that do not fit neatly on one side or another of the standard Western division between philosophy and religion It contains chapters by experts on Buddhist Confucian Taoist Hindu and Jain philosophies as well as ancient Greek philosophy and recent contemplative and spiritual movements The volume also problematizes the notion of a Western philosophical canon distinguished by rationality in contrast to a religious Eastern other These original essays creatively lay the groundwork needed to rethink dominant historical and conceptual categories from a wider perspective to arrive at a deeper more plural and global understanding of the diverse nature of both philosophy and religion The volume will be of keen interest to scholars and students in the Philosophy of Religion Asian and Comparative Philosophy and Religious Studies Origins of Moral-Political Philosophy in Early China Tao Jiang, 2021-08-27 This book offers a new narrative and interpretative framework about the origins of moral political philosophy that tracks how the three core normative values humaneness justice and personal freedom were formulated reformulated and contested by early Chinese philosophers in their effort to negotiate the relationship among three distinct domains the personal the familial and the political Such efforts took place as those thinkers were reimagining a new moral political order debating its guiding norms and exploring possible sources within the context of an evolving understanding of Heaven and its relationship with the humans Tao Jiang s philosophical inquiries and reassessment of core values embedded and developed in the classical Chinese Masters texts will prove crucial to the ongoing scholarly discussion about philosophy religion and China *The ^AEmotions in Early Chinese Philosophy* Curie Virág, 2017-02-13 In China the debate over the moral status of emotions began around the fourth century BCE when early philosophers first began to invoke psychological categories such as the mind xin human nature xing and emotions qing to explain the sources of ethical authority and the foundations of knowledge about the world Although some thinkers during this period proposed that human emotions and desires were temporary physiological disturbances in the mind caused by the impact of things in the world this was not the account that would eventually gain currency The consensus among those thinkers who would come to be recognized as the foundational figures of the Confucian and Daoist philosophical traditions was that the emotions represented the underlying dispositional constitution of a person and that they embodied the patterned workings of the cosmos itself Curie Vir g sets out to explain why the emotions were such a central preoccupation among early thinkers situating the entire debate within developments in conceptions of the self

the cosmos and the political order She shows that the mainstream account of emotions as patterned reality emerged as part of a major conceptual shift towards the recognition of natural reality as intelligible orderly and coherent The mainstream account of emotions helped to summon the very idea of the human being as a universal category and to establish the cognitive and practical agency of human beings This book the first intensive study of the subject traces the genealogy of these early Chinese philosophical conceptions and examines their crucial role in the formation of ethical political and cultural values in China

After Confucius Paul R. Goldin, 2017-04-01 After Confucius is a collection of eight studies of Chinese philosophy from the time of Confucius to the formation of the empire in the second and third centuries B C E As detailed in a masterful introduction each essay serves as a concrete example of thick description an approach invented by philosopher Gilbert Ryle which aims to reveal the logic that informs an observable exchange among members of a community or society To grasp the significance of such exchanges it is necessary to investigate the networks of meaning on which they rely Paul R Goldin argues that the character of ancient Chinese philosophy can be appreciated only if we recognize the cultural codes underlying the circulation of ideas in that world Thick description is the best preliminary method to determine how Chinese thinkers conceived of their own enterprise Who were the ancient Chinese philosophers What was their intended audience What were they arguing about How did they respond to earlier thinkers and to each other Why did those in power wish to hear from them and what did they claim to offer in return for patronage Goldin addresses these questions as he looks at several topics including rhetorical conventions of Chinese philosophical literature the value of recently excavated manuscripts for the interpretation of the more familiar received literature and the duty of translators to convey the world of concerns of the original texts Each of the cases investigated in this wide ranging volume exemplifies the central conviction behind Goldin's plea for thick description We do not do justice to classical Chinese philosophy unless we engage squarely the complex and ancient culture that engendered it

The Right to Resist Mario Wenning, Thomas Byrne, 2023-01-12 While the idea of total revolution seems anachronistic today there is increasing consensus about the importance of new forms of political ethical and aesthetic resistance In the past resistance was often motivated as a form of protest against specific institutions Increasingly dissent has become integrated into the fabric of modern life This volume addresses new forms of

resistance at a level that combines a rootedness in the philosophical tradition and a sensitivity to rethinking the possibility of emancipation in today's age. The work focuses on contemporary social and political philosophy from a perspective informed by critical theory. The text specifically addresses three challenges:

1. Critical theorists need to investigate in which ways resistance, conformism and oppression oppose and constitute each other.
2. The relationship between the theory and the practice of resistance needs to be posed anew given recent protest movements and media of protest.
3. It needs to be shown in which ways different areas of society such as the arts, religion and social media establish divergent practices of resistance.

The chapters are written by scholars from Asia, Europe and North America. These experts in resistance discourse focus on practices of dissent ranging from traditional forms of civil disobedience to more recent practices such as guerrilla protest art and resistance in digital networks including social media. What unites them is a shared concern for the dimensions of political acts of resistance in an age that is characterized by a tendency to integrate and thereby neutralize those very acts.

Dao Companion to the Philosophy of the Zhuangzi Kim-chong Chong, 2022-09-21. This comprehensive collection brings out the rich and deep philosophical resources of the Zhuangzi. It covers textual, linguistic, hermeneutical, ethical, social, political and philosophical issues with the latter including epistemological, metaphysical, phenomenological and cross-cultural. Chinese and Western aspects. The volume starts out with the textual history of the Zhuangzi and then examines how language is used in the text. It explores this unique characteristic of the Zhuangzi in terms of its metaphorical forms, its use of humour in deriding and parodying the Confucians and paradoxically making Confucius the spokesman for Zhuangzi's own point of view. The volume discusses questions such as: Why does Zhuangzi use language in this way and how does it work? Why does he not use straightforward propositional language? Why is language said to be inadequate to capture the dao and what is the nature of this dao? The volume puts Zhuangzi in the philosophical context of his times and discusses how he relates to other philosophers such as Laozi, Xunzi and the Logicians.

The Making of the Global Yijing in the Modern World Benjamin Wai-ming Ng, 2021-02-26. This book represents an ambitious effort to bring leading Yijing scholars together to examine the globalisation and localisation of the Book of Changes from cross-cultural and comparative perspectives. It focuses on how the Yijing has been used to support ideologies, converted into knowledge and assimilated into global cultures in the modern period, transported from the Sinosphere to British, American and French cultural traditions, travelling from East Asia to Europe and the United States. The book provides conceptualised narratives and cross-cultural analyses of the global popularisation and local assimilation of the Yijing, highlighting the transformation and application of the Yijing in different cultural traditions and demonstrating how it acquired different meanings and took on different roles in the context of a global setting. In presenting a novel contribution to understandings of the multifaceted nature of the Yijing, this book is essential reading for scholars and students interested in the Classic of Changes. It is also a useful reference for those studying Chinese culture, Asian philosophy, East Asian studies and translation studies.

Zhuangzi's Critique of the Confucians Kim-chong

Chong,2016-10-24 The Daoist Zhuangzi has often been read as a mystical philosopher But there is another tradition beginning with the Han dynasty historian Sima Qian which sees him as a critic of the Confucians Kim chong Chong analyzes the Inner Chapters of the Zhuangzi demonstrating how Zhuangzi criticized the pre Qin Confucians through metaphorical inversion and parody This is indicated by the subtitle Blinded by the Human which is an inversion of the Confucian philosopher Xunzi s remark that Zhuangzi was blinded by heaven and did not know the human Chong compares Zhuangzi s Daoist thought to Confucianism as exemplified by Confucius Mencius and Xunzi By analyzing and comparing the different implications of concepts such as heaven heart mind and transformation Chong shows how Zhuangzi can be said to provide the resources for a more pluralistic and liberal philosophy than the Confucians *Technical Arts in the Han Histories* Mark Csikszentmihalyi,Michael Nylan,2021-11-01 While cultural literacy in early China was grounded in learning the Classics basic competence in official life was generally predicated on acquiring several forms of technical knowledge Recent archaeological finds have brought renewed attention to the use of technical manuals and mantic techniques within a huge range of discrete contexts pushing historians to move beyond the generalities offered by past scholarship To explore these uses *Technical Arts in the Han Histories* delves deeply into the rarely studied Treatises and Tables compiled for the first two standard histories the Shiji Historical Records and Hanshu History of Han important supplements to the better known biographical chapters and models for the inclusion of technical subjects in the twenty three later Standard Histories of imperial China Indeed for a great many aspects of life in early imperial society they constitute our best primary sources for understanding complex realities and perceptions The essays in this volume seek to explain how different social groups thought of disseminated and withheld technical knowledge relating to the body body politic and cosmos in the process of detailing the preoccupations of successive courts from Qin through Eastern Han in administering the localities the frontier zones and their numerous subjects at the time roughly one quarter of the world s population
