Daniel A. Stolz,2018-01-11 An observatory and a lighthouse form the nexus of this major new investigation of science religion  
and the state in late Ottoman Egypt Astronomy imperial bureaucrats traditionally educated Muslim scholars and reformist  
Islamic publications such as The Lighthouse are linked to examine the making of knowledge the performance of piety and the  
operation of political power through scientific practice Contrary to ideas of Islamic scientific decline Muslim scholars in the  
nineteenth century used a dynamic tradition of knowledge to measure time compute calendars and predict planetary  
positions The rise of a new astronomy is revealed to owe much to projects of political and religious reform from the  
strengthening of the multiple empires that exercised power over the Nile Valley to the modernization of Islamic centers of  
learning to the dream of a global Islamic community that would rely on scientific institutions to coordinate the timing of

Egypt s Belle Epoque was a period of incredible extravagance during which the Khedive Ismail s Cairo became the mirror  
image both architecturally and socially of decadent Paris The glamour and hedonism of the era reached its peak during the  
magnificent celebrations for the opening of the Suez Canal in 1869 Kings and emperors artists writers and Europe s most  
sophisticated flocked to the dazzling new Cairo of sumptuous palaces and Parisian gardens where glittering parties were  
held on the banks of the Nile and where Verdi s Aida would later premiere at the new opera house But the splendour was
