Masters of War Carl Boggs, 2013-10-11 Few United States citizens conceive of their country as an empire but as the contributors to *Masters of War* convincingly argue the U S legacy of military power runs long and deep Often mobilized in the name of spreading democracy maintaining international order and creating the conditions for economic self determination constantly expanding global U S military power is difficult to characterize as anything but an imperialism bent on global domination However at the same time that the U S government hawks rhetoric of human rights and national sovereignty its dominion has begun breeding widespread resistance and opposition likely to make the twenty first century an era marked by sustained and generally unanticipated blowback Presenting a wide range of essays by some of the anti war movement s most vocal and incisive critics *Masters of War* reminds us that worldwide economic and military dominance has its price both globally and domestically

Cultural Encounters Charles Burdett, Derek Duncan, 2002 The 1930s were one of the most important decades in defining the history of the twentieth century It saw the rise of right wing nationalism the challenge to established democracies and the full force of imperialist aggression *Cultural Encounters* makes an important contribution to our understanding of the ideological and cultural forces which were active in defining notions of national identity in the 1930s By examining the work of writers and journalists from a range of European countries who used the medium of travel writing to articulate perceptions of their own and other cultures the book gives a comprehensive account of the complex intellectual climate of the 1930s

Education and the Spirit of Time , 2006-01-01 The aim of this book is to raise current social political and moral issues in social theory by taking a critical stance towards historical global and educational themes in the context of culture politics and technology All the contributors have written their texts in the spirit of critical Zeitgeist analysis which they believe is a highly needed genre in social theory Thus the focus of the book is critical Zeitgeist analysis and its potential in addressing various social maladies of the present era Methodologically critical Zeitgeist analysis is argued to be of value in demonstrating how to both utilize and expand the possibilities of writing normative social theory The key idea of critical Zeitgeist analysis is to reflect critically on the state of the present world In this task it entwines analytical political and moral languages as well as the languages of critique and hope In critical Zeitgeist analysis it is not only possible but also necessary to ask who we are and what states of affairs prevail in our tragic times The themes of the book are global and it can be used as a course book in several fields of social science like cultural studies education and political science as well as in sociology

Old Spain and New Spain David Henn, 2004 This is the first book length study of the six travel narratives published by the 1989 winner of the Nobel Prize for Literature Preliminary chapters focus on technical and thematic aspects of travel writing and on the author s approach to the genre Cela s travel works which appeared between 1948 and 1986 are examined in turn with a focus on the construction of the narratives and also on the themes that are developed in each of them There is an assessment of the author s treatment of topographical cultural

historical and social material in his accounts of the journeys he made through various areas and regions of Spain as well as a consideration of the way in which these narratives reflect changes taking place in Spain during the Franco regime and in the decade following the dictator's death David Henn teaches modern Spanish fiction drama and travel literature at University College London
