

The background of the entire image is a solid, vibrant red. Overlaid on this background is a dark, almost black, silhouette of a monkey. The monkey is positioned in the upper right quadrant, facing left, and appears to be sitting or clinging to a thick, gnarled tree branch that extends from the bottom left towards the center. Several thinner, leafless branches crisscross the scene, some with small, dark, oval-shaped leaves. In the top left corner, there is a small, yellow, textured object that looks like a piece of fruit or a small animal's head. The overall style is graphic and minimalist.

Valerio, 2025-02-28 Mapping Diversity in Latin America offers ample critical coverage of recent approaches to the historical study of race and ethnicity in Latin America since the arrival of Spanish and Portuguese colonizers to the present Bringing together the work of leading scholars this volume presents readers with a thorough and updated examination of the formation and evolution of ideas surrounding race and ethnicity social movements and political processes in Latin America that provides multiple routes for future research on the topic The book s nineteen chapters establish the basis for a productive comparative analysis of racial developments in the whole continent to allow for a combination of diachronic and synchronic study of regional processes Both the scope of the book and the historical and geocultural coverage on these topics are unique in the field of Latin American Studies Taking an interdisciplinary approach to understanding issues of collective identity otherness alterity and the like Mapping Diversity in Latin America sheds light on histories that have been traditionally overlooked in texts on race in Latin America such as the rich history of diasporic Asian Syrian Lebanese and Jewish communities and the more recent emergence of Latinx populations in the United States The book includes a critical examination of fundamental concepts such as mestizaje mulataje creolization negritud and blanquitud as well as critical and theoretical approaches to the study of these issues in postcolonial societies

Alternative Orientalisms in Latin America and Beyond Ignacio López-Calvo, 2007 Orientalism is widely known as the study of Eastern cultures by Western intellectuals Yet most people would associate this term with scholars from France England Germany and the United States This book presents along with new essays dealing with the United States the Islamic world and the Far East alternative views on Orientalism this time also coming from Latin America and other regions While still dealing in some cases with interpretations of the East by Western outsiders the fact that the cultural production analyzed as well as many of the critics comes from an area Latin America that

has also been affected by European and U S imperialism and colonialism brings new light to the traditionally negative connotations ascribed to the term These essays reveal that though prejudice and racism are still prevalent in many Orientalist aesthetic practices coming from Latin America and other world regions the perspective can also be radically different From this perspective rather than constructing the Orient as the West TM s alien and inferior other the mirror image that appears in this book constitutes an attempt at understanding the Asian within us within the Western world The postcolonial approach of many of these essays is the theoretical framework that prevents or at least tries to prevent paternalistic or hegemonic representations of the Asian subject As a result the emphasis is often placed on transculturation hybridity liminality double consciousness and cultural identity *Bowker's Complete Video Directory, 1999 ,1999*
