Formation and Applications of the Sedimentary Record in Arc Collision Zones Amy E. Draut,Peter D. Clift,David W. Scholl,2008-01-01 Inspired by a GSA Penrose Conference held in 2005 cosponsored by the International Association of Sedimentologists and the British Sedimentological Research Group the 17 papers in this volume explore sedimentary environments in arc collision zones and their utility in recording the evolution of modern and ancient convergent margins The first set of papers in the collection focuses on formation and evolution of the sedimentary record in arc settings and arc collision zones concentrating on modern intra oceanic examples Papers include studies of flexural modeling and factors that affect development of siliciclastic and carbonate deposits around modern arcs The second half of the volume presents new applications of arc sedimentary records These relate primarily to constraining tectonic events in the evolution of arc systems but also concern the links among tectonic uplift collision and geomorphic and climatic feedback mechanisms in arc collision zones Publisher s website **Geology of México** Susana A. Alaniz-Álvarez,Ángel F. Nieto-Samaniego,Sociedad Geológica Mexicana,2007-01-01 **The Ópatas** David Yetman,2010-11-15 In 1600 they were the largest most technologically

advanced indigenous group in northwest Mexico but today though their descendants presumably live on in Sonora almost no one claims descent from the patas. The patas seem to have disappeared as an ethnic group, their languages forgotten except for the names of the towns, plants, and geography of the Opatan area where they lived. Why did the patas disappear from the historical record while their neighbors survived? David Yetman, a leading ethnobotanist who has traveled extensively in Sonora, consulted more than two hundred archival sources to answer this question. The result is an accessible ethnohistory of the patas, one that embraces historical complexity with an eye toward Opatan strategies of resistance and assimilation. Yetman's account takes us through the Opatans' initial encounters with the conquistadors, their resettlement in Jesuit missions, clashes with Apaches, their recruitment as miners, and several failed rebellions, and ultimately arrives at an explanation for their disappearance. Yetman's account is bolstered by conversations with present-day residents of the Opatan area and includes a valuable appendix on the languages of the Opatan area by linguistic anthropologist David Shaul. One of the few studies devoted exclusively to this indigenous group, *The Patas: In Search of a Sonoran People* marks a significant contribution to the literature on the history of the greater Southwest.

Celebration of the Career of William R. Dickinson Raymond V. Ingersoll, Timothy F. Lawton, Stephan A. Graham, 2017-12-28. Through a remarkable combination of intellect, self-confidence, engaging humility, and prodigious output of published work, William R. Dickinson influenced and challenged three generations of sedimentary geologists, igneous petrologists, tectonicists, sandstone petrologists, archaeologists, and other geoscientists. A key figure in the plate tectonic revolution of the 1960s and 1970s, he explained how the distribution of sediments on Earth's surface could be traced to tectonic processes and is widely recognized as a founder of modern sedimentary basin analysis. This volume consists of 31 chapters related to Dickinson's research interests; many of the authors are his former students, their students, and their students, demonstrating his continuing profound influence. The papers in this volume are an impressive tribute to the depth and breadth of Bill Dickinson's contributions to the geosciences.

MINERIA Y CAPITAL TRANSNACIONAL SOBRE UN TERRITORIO EN RIESGO Moisés Gámez, 2024-04-15. En este libro se abordan diversas aristas presentes en la problemática entorno a la presencia de la minería de capital transnacional de origen canadiense en el territorio del Sitio Sagrado Natural de Wirikuta, que comprende parte de siete municipios actuales del norte potosino: Catorce, Cedral, Charcas, Matehuala, Vanegas, Villa de Guadalupe y Villa de la Paz, en Real de Catorce, San Luis Potosí.

Southwestern Desert Resources William L. Halvorson, Cecil R. Schwalbe, Charles van Riper, 2023-01-10. The southwestern deserts stretch from southeastern California to west Texas and then south to central Mexico. The landscape of this region is known as basin and range topography, featuring sky islands of forest rising from the desert lowlands, which creates a uniquely diverse ecology. The region is further complicated by an international border where

governments have caused difficulties for many animal populations This book puts a spotlight on individual research projects which are specific examples of work being done in the area and when they are all brought together to shed a general light of understanding the biological and cultural resources of this vast region so that those same resources can be managed as effectively and efficiently as possible The intent is to show that collaborative efforts among federal state agency university and private sector researchers working with land managers provides better science and better management than when scientists and land managers work independently
