Expropriation In The Americas A Comparative Law Study:

Expropriation in the Americas Andreas F. Lowenfeld, 1971 **Re-Politicising International Investment Law in Latin America through the Duty to Regulate Paradigm** María José Luque Macías, 2021-05-22 This book offers insights into how international investment law IIL has frustrated states protection of human rights in Latin America and IIL has generally abstained from dealing with inter regime frictions In these circumstances this study not only argues that IIL should be an object of contention and debate politicisation It also contends that Latin American countries have traditionally been the frontrunners in the politicisation of international legal instruments protecting foreign investment questioning whether the paradigms informing their claims articulation are adequate to frame this debate It demonstrates that the so called right to regulate is the paradigm now prevalently used to challenge IIL but that it is inadequate from a human rights perspective Hence the book calls for a re politicisation of IIL in Latin America through a re conceptualization of how states regulation of foreign investment is understood under international human rights law which entails viewing it as an international duty After determining what the duty to regulate constitutes in relation to the right to water and indigenous peoples right to lands based on human rights doctrine the book analyses the extent to which Latin American countries are currently re politicising IIL through an articulation of this international duty and arbitral tribunals responses to their argumentative strategies Based on these findings the book not only proposes investment treaties reform to anchor the duty to regulate paradigm in IIL and in the process to induce tribunals engagement with human rights arguments when they come to underpin respondent states defences in investor state dispute settlement ISDS In addition drawing upon the now likely defunct idea of creating a regional ISDS tribunal the book briefly reflects on options available to such a tribunal in terms of dealing with troubling normative institutional interactions between regimes during ISDS proceedings [Handbook Of Research On The International Relations Of Latin America And The Caribbean](#) G. Pope Atkins, 2018-02-12 The study of Latin American and Caribbean international relations has a long evolution both within the development of international relations as a general academic undertaking and in terms of the particular characteristics that distinguish the approaches taken by scholars in the field This handbook provides a thorough multidisciplinary reference guide to the literature on the various elements of the international relations of Latin America and the Caribbean Citing over 1600 sources that date from the nineteenth century to the present with emphasis on recent decades the volume s analytic essays trace the evolution of research in terms of concepts issues and themes The Handbook is a companion volume to Atkins Latin America and the Caribbean in the International System Fourth Edition but also serves as an invaluable stand alone reference volume for students scholars researchers journalists and practitioners both official and private **International litigation and the quest for reasonableness** Académie de Droit International de la Ha, 1995-05-15 The Academy is an institution for the study and teaching of public and private international law and related subjects Its purpose is to encourage a thorough and impartial

examination of the problems arising from international relations in the field of law The courses deal with the theoretical and practical aspects of the subject including legislation and case law All courses at the Academy are in principle published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law This volume contains International Litigation and the Quest for Reasonableness General Course on Private International Law by A F LOWENFELD Professor at New York University Souverainete etatique et protection internationale des minorite part Y BEN ACHOUR professeur a l Universite de Tunis To access the abstract texts for this volume please click here

Legal Protection of Foreign Direct Investment. A Critical Assessment with Focus on South Africa and Zimbabwe Talkmore Chidede, 2016-09 This study undertakes a critical assessment of the legal protection of foreign direct investments FDI in South Africa and Zimbabwe by determining their compliance with the international minimum standards norms and or best practices on the legal protection of FDI by host states Firstly the study argues that foreign investment is much needed in South Africa and Zimbabwe to improve economic growth and development to create jobs and to increase their competitiveness However these benefits are not accrued automatically but rather host states need to create an enabling environment to receive such benefits Thus host states need to put an investment scheme into operation to guarantee the legal protection of foreign investments South Africa and Zimbabwe have at large crafted and implemented investment laws and related policies which tend to be hostile towards foreign investments Therefore similar investment laws and related policies in both jurisdictions are analysed This study will also offer recommendations for a legal investment which is not only flexible friendly and favourable to foreign investment in South Africa and Zimbabwe but also advances their local economic policies

International Economic Law Andreas F. Lowenfeld, 2008 As conflict and cooperation among states turn to an ever greater extent on economic issues this fully updated and expanded second edition presents a comprehensive exploration of the legal foundations of the international economy It not only examines the current status of the law but also explores the origins political tensions and development of outcomes that are often difficult to comprehend Lowenfeld examines the major elements of economic law in the international arena including the World Trade Organization and its antecedents dumping subsidies and other devices that alter the market the International Monetary System including the collapse of the Bretton Woods system the debt of developing countries the law of foreign direct investment including changing perceptions of the rights of host states and multinational enterprises and economic sanctions The book also contains chapters on competition law environmental law and new chapters on intellectual property and the various forms of arbitration demonstrating how these subjects fit into the framework of international economic law Professor Lowenfeld brings to his task a lifetime of practice and teaching experience to produce a book that will be of use to international lawyers and non specialists alike

Nationalization, Natural Resources and International Investment Law Junji Nakagawa, 2017-07-06 Nationalization disputes in natural resources development are among the most

disputed issues of international investment law This book offers a fresh insight into the nature of nationalization disputes in natural resources development and the rules of international investment law governing them by systematically analyzing 1 the content of investment contracts in natural resources development and 2 the results of nationalization disputes in natural resources development from the perspective of dynamic bargaining theory Based on the comprehensive and systematic empirical analyses the book sheds new light on contractual renegotiation and renewal as a hardly known but practically normal solution of nationalization disputes and presents a set of soft law rules governing contractual renegotiation and renewal

particular value to the debate on these issues **External Research** United States. Department of State. External Research Division, Resource Nationalism in International Investment Law Sangwani Patrick Ng'ambi, 2015-11-06 Foreign direct investment in the natural resource industries is fostered through the signing of concession agreements between the host State and the investor However such concessions are susceptible to alteration by the host State meaning that many investors now require the insertion of stabilization clauses These are provisions that require the host State to agree that they will not take any administrative or legislative action that would adversely affect the rights of the investor Arguing that it is necessary to have some form of flexibility in concession agreements while still offering protection of the legitimate expectations of the investor Resource Nationalism in International Investment Law proposes the insertion of renegotiation clauses in order to foster flexible relationships between the investor and the host State Such clauses bind the parties to renegotiate the terms of the contract in good faith when prevailing circumstances change However these clauses can also prove problematic for both State and investor due to their rigidity Using Zambia as a case study it highlights the limitations of the efficient breach theory to emphasise the need for contractual flexibility *Research on International Affairs* United States Department of State.
