Extending Families The Social Networks Of Parents And Their Children:

Extending Families Moncrieff Cochran, Mary Larner, David Riley, Lars Gunnarsson, Charles R. Henderson, Jr, 1990-06-29
How do personal networks evolve and what roles do they play for parents and for the development of children Can these ties with relatives neighbors and friends provide stability for family members during periods of disruption caused by divorce unemployment geographic dislocation or serious illness How do networks change over time To what extent are network members interchangeable can unrelated friends take the place of close relatives These are among the questions addressed in *Extending Families* a ground breaking study about how personal networks evolve and what roles they play for parents and for the development of children The volume is an outgrowth of a ten year cooperative research effort carried out by the authors as part of the Comparative Ecology of Human Development Project at Cornell University The authors document and compare the roles of network member players the ways that networks change over time and the impact of different network resources on developing individuals The impacts on parent network participation in a community based family support program are examined and a more general discussion of how public policies might strengthen access to informal social supporters is also provided

Family-Peer Relationships Ross D. Parke, Gary W. Ladd, 2016-03-10 Originally published in 1992 this volume provided an up to date overview of recent research concerning the links between family and peer systems Considerable work in the past had focused on family issues or peer relationships but these systems had typically been considered separately This volume bridges the gap across these two important socialization contexts and provides insights into the processes that account for the links across the systems the ways in which the relationships between these systems shift across development In addition the variations in the links between family and peers are illustrated by cross cultural work studies of abused children and research on the impact of maternal depression In short the volume provides not only a convenient overview of recent progress at the time but lays out an agenda for future research

The Cambridge Handbook of Environment in Human Development Linda Mayes, Michael Lewis, 2012-08-27
Families communities and societies influence children s learning and development in many ways This is the first handbook devoted to the understanding of the nature of environments in child development Utilizing Urie Bronfenbrenner s idea of embedded environments this volume looks at environments from the immediate environment of the family including fathers siblings grandparents and day care personnel to the larger environment including schools neighborhoods geographic regions

countries and cultures Understanding these embedded environments and the ways in which they interact is necessary to understand development

Children and Families in the Social Environment James Garbarino, 2017-07-12 The first edition of this volume successfully applied Bronfenbrenner's micro systems taxonomy to childrearing and family life Emphasizing how forces in the environment influence children's behavior Garbarino has staked out an intermediate position between the psychoanalytic and the systems approach to human development Taking cognizance of new research and of changes in American society Garbarino has once again carefully analyzed the importance of children's social relationships For this wholly revised second edition he has incorporated a greater emphasis on ethnic cultural and racial issues

Parenting Tom Luster, Lynn Okagaki, 2006-04-21 This is an update of their 1993 book with us This volume will focus on factors that influence parental behavior New additions to this volume include fathers gender of parent children with special needs ethnicity and socioeconomic status and parent e

Developmental Psychopathology, Risk, Resilience, and Intervention Dante Cicchetti, 2016-02-29 Examine the latest research merging nature and nurture in pathological development Developmental Psychopathology is a four volume compendium of the most complete and current research on every aspect of the field Volume Four Genes and Environment

focuses on the interplay between nature and nurture throughout the life stages and the ways in which a child's environment can influence his or her physical and mental health as an adult. The discussion explores relationships with family, friends, and the community; environmental factors like poverty, violence, and social support; the development of coping mechanisms; and more, including the impact of these factors on physical brain development. This new third edition has been fully updated to incorporate the latest advances and to better reflect the increasingly multilevel and interdisciplinary nature of the field and the growing importance of translational research. The relevance of classification in a developmental context is also addressed, including DSM-5 criteria and definitions. Advances in developmental psychopathology are occurring increasingly quickly as expanding theoretical and empirical work brings about dramatic gains in the multiple domains of child and adult development. This book brings you up to date on the latest developments surrounding genetics and environmental influence, including their intersection in experience-dependent brain development. Understand the impact of childhood adversity on adulthood health. Gauge the effects of violence, poverty, interparental conflict, and more. Learn how peer, family, and community relationships drive development. Examine developments in prevention science and future research priorities. Developmental psychopathology is necessarily interdisciplinary as development arises from a dynamic interplay between psychological, genetic, social, cognitive, emotional, and cultural factors. **Developmental Psychopathology: Volume Four: Genes and Environment** brings this diverse research together to give you a cohesive picture of the state of knowledge in the field. **The Routledge**

Handbook of Family Communication Anita L. Vangelisti, 2012-11-27. With a synthesis of research on issues key to understanding family interaction as well as an analysis of many theoretical and methodological choices made by researchers studying family communication, the Handbook serves to advance the field by reframing old questions and stimulating new ones. The contents are comprised of chapters covering theoretical and methodological issues influencing current conceptions of family research and theory, centering around the family life course, communication occurring in a variety of family forms: individual family members and their relationships; dynamic communication processes taking place in families; family communication embedded in social, cultural, and physical contexts. Key changes to the second edition include updates throughout, providing a thorough and up-to-date overview of research and theory; new topics reflecting the growth of the discipline, including chapters on singles as family members, emerging adults, and physiology and physical health. Highlighting the work of scholars across disciplines: communication, social psychology, clinical psychology, sociology, family studies, and others, this volume captures the breadth and depth of research on family communication and family relationships. The well-known contributors approach family interaction from a variety of theoretical perspectives and focus on topics ranging from the influence of structural characteristics on family relationships to the importance of specific communication processes.

LGBT-Parent Families Abbie E. Goldberg, Katherine R. Allen, 2012-10-12. **LGBT Parent Families** is the first handbook to provide a comprehensive examination of this underserved area. Reflecting the nature of this issue, the volume is notably

interdisciplinary with contributions from scholars in psychology sociology human development family studies gender studies sexuality studies legal studies social work and anthropology Additionally scholarship from regions beyond the U S including England Australia Canada and South Africa is presented In addition to gender and sexuality all contributors address issues of social class race and ethnicity in their chapters

Parenting in Poor Environments Deborah Ghate,Neal Hazel,Policy Research Bureau (Great Britain),2002 A study of the effect of poor environments on parenting The authors explore what professionals and policy makers can do to assist families living in poverty

Parent-child Relations Throughout Life Karl Pillemer,Kathleen McCartney,2013-09-05 The study of parent child relationships has long been of interest to behavioral scientists both for its theoretical importance and for its practice and policy implications There are however certain limitations to the knowledge in this area First research on parents and children is spread throughout a number of disciplines and as a consequence is not well integrated Further there has been little dialogue among researchers concerned with parents of young children and those interested in middle aged and elderly parents and their offspring The present volume predicates the notion that there is considerable similarity in the issues explored by researchers on different points of the life course Contributions by leading scholars in psychology sociology and anthropology are organized into four sections each of which contains a treatment of at least two stages in the life course The sections cover attachment in early childhood and in later life life course transitions relationships within families and the influence of social structural factors on parent child relations Although the chapters make important contributions to basic research and theory many also deal with issues of public concern such as day care maternal employment gay and lesbian relationships and care of the elderly

Examining Stereotypes and Parenting Behaviours of South Asian Heritage Parents: Discourse and Case Studies Bhandari, Renu, 2024-06-17 In the field of academic scholarship the study of parenting has been extensive yet it has often been unable to capture the full essence of this complex endeavor The existing literature has often confined itself to the boundaries of individual disciplines This limitation has hindered our understanding of the intricate interplay between these aspects and the values and beliefs that guide parenting Furthermore in the context of South Asian parents in the UK the existing research has typically focused on parents from East and Southeast Asia often leaving the unique experiences of South Asian parents overlooked Examining Stereotypes and Parenting Behaviors of Asian Heritage Parents Discourse and Case Studies offers a pioneering solution to this problem It represents a groundbreaking initiative to break free from the constraints of traditional research methodologies and provide an unfiltered in depth look at the real narratives of South Asian parents in the UK By weaving together the psychological emotional social and cultural dimensions of parenting this book uncovers a holistic view of this complex journey one that transcends the limitations of sociology psychology or cultural studies It does not aim to solve problems but rather seeks to capture authentic family stories and parenting experiences directly from the voices of the parents themselves
