

Domestic Politics in EU External Economic Relations: US-EU Competition in Trade

Aukje van Loon

1 Introduction

During the past decade, the world trading system has undergone a profound transformation. On the one hand, the uncertainty surrounding of the conclusion of the Doha Development Agenda (DDA) within the institutional framework of the World Trade Organisation (WTO) has dampened confidence among countries about the multilateral approach to trade liberalisation. On the other hand, free trade agreements (henceforth FTAs)¹ whereby members exchange preferential market commitments are proliferating.² In this “market and competition oriented” environment (Schirm 2002, p. 2; Baccini and Dür 2012, p. 57) with “its emphasis on exports and open markets” (Thiel 1998, p. 61) as hallmarks of the so-called ‘new regionalism’ (Ethier 1998, pp. 1150–1152), FTAs have become the prominent

I am very grateful to Astrid Boening, Yuan-Juhn Chiao, Michael Franke, Jan-Frederik Kremer, Stefan Schirm, Katerina Smejkalova, André van Loon, Vanessa Vaughn and the participants of the ‘Forschungs- und Abschlusskolloquium’ for their helpful input, comments and/or suggestions on earlier drafts of this chapter.

¹ FTAs are defined as legally binding arrangements between two or more countries, through which these countries give each other preferential treatment in trade that eliminates trade protection among members. At the same time, each member keeps its own tariff structure in trade with third countries. Regional Trade Agreements (RTAs), Preferential Trade Agreements (PTAs) or FTAs are often synonymously applied to describe trade liberalisation on a regional or bilateral basis. For the purpose of consistency, the term FTA will be used throughout this chapter.

² Thereby making exemptions to the non-discrimination and most-favoured-nation (MFN) principles of the WTO.

External Economic Relations And Foreign Policy In The European Union:

External Economic Relations and Foreign Policy in the European Union Stefan Griller, Birgit Weidel, 2002-09-16
The challenges of globalisation call for a strong role of the European Union as an international actor. Despite its economic importance, the EU has not been able to assert a corresponding influence on the course of international politics. The artificial distinction between external economic relations as a subject of the supranational first pillar and foreign policy as a subject of the intergovernmental second pillar undermines consistent policy making and significantly weakens the EU's performance on the international scene. This book illustrates the inextricable link between political and economic aspects of external relations and the constitutional dimension of this area. Provided with a thorough analysis of competence and representation issues, the reader will gain a more profound understanding of the complex area of EU external relations.

European Foreign Policy Panos Koutrakos, 2011-01-01
Like early mariners, politicians and officials trying to navigate European foreign policy find themselves in an environment of unpredictable hazards, hidden institutional shoals and legal reefs that can tear the bottom out of a policy. This insightful collection of contrasted studies shines the twin beams of political science and legal analysis into these opaque depths. Practitioners as well as scholars will benefit from the illumination.

Nick Witney, European Council on Foreign Relations and Former Chief Executive of the European Defence Agency, UK.
This collection on EU foreign policy is an attractive one for several reasons: it contains a very nice set of essays on a topic which has loomed large on the European Union agenda for some years, namely the international role of the EU. The chapters are written by a range of interesting and eminent scholars in the field. Most importantly, in terms of its distinctive contribution, the book brings together perspectives from law and from political science. This is done in part by including chapters by authors from different disciplines but also by choosing cross-pillar themes and topics such as the European Neighbourhood Policy, EU policy on Kosovo, security and defence policy as well as more general cross-cutting themes like the idea of coherence, the position of the EU within international organizations and the approach of the EU to the international legal order. Each of the individual chapters is well worth reading and the book as a whole is a useful and interesting contribution to the existing literature.

Grinne de Bree, Harvard Law School, US.
Written by leading experts, this book focuses on central issues of the foreign policy of the European Union. The issues explored include how the EU's judges understand its relationship with the international order, the coherence of the Union's external action, the EU's approach to its neighbours, the Common Security and Defence Policy and the EU's participation in international organisations. By addressing each topic from a legal, political science and international relations standpoint, this relevant book highlights the different perspectives that these disciplines bring to the central issues of the EU's foreign affairs and starts a conversation between the respective communities. Scholars and students in European and international law, politics and international relations will find this book insightful. It will also prove timely for policy.

Foreign Policy in the European Union Ben Soetendorp, 2014-06-11 Ben Soetendorp examines the extent to which individual member states each with their own history special interests and styles of foreign policy making still dominate the common foreign policy making process within the European Union The first part of the book reviews the diverse foreign policy patterns of the individual member states towards European integration describes the various styles of foreign policy and examines the institutional arrangements for joint foreign policy making created by the member states at EU level The second part looks more closely at the reality of foreign policy making in a number of case studies focusing on the diplomatic military and economic dimensions of European Union's foreign policy This structure and approach enable the reader to understand the reality of European foreign policy making to comprehend the relationship between the foreign policies of the member states of the EU and the foreign policy of the EU as a whole and to make a judgement as to the likely scenarios for the future Foreign Policy in the European Union is an important and accessible addition to the textbook literature on European integration that will be essential reading for undergraduate and Masters level courses on European integration within politics international relations European Studies and history degrees

Review of 'External Economic Relations and Foreign Policy in the European Union' Rafael Leal-Arcas, 2011 This is a research project by ten Austrian scientists under the supervision of Stefan Griller and Birgit Weidel The project tackles a complex binomial area of law and international relations i.e the European Union's EU foreign and external economic relations where there is a very vast body of scholarly literature It is presented in two parts The first deals with the topical constitutional question of the EU's division of competences in the field of external relations common positions joint actions and the unique phenomenon of its representation in international organizations In this sense it argues that the current EU system of competence distribution might entail uncertainty and confusion for third countries about the identity and authority of their negotiation partner p 140 The EU is the victim of its own system the accusations of inefficiency inconsistency and democratic deficit are the result of the intra EU inability to find a mechanism to terminate these deficiencies The EU Constitutional Treaty aims at rectifying this but in the light of most recent developments it may never see the light The second part illustrates with nine case studies the complexity of the EU's external relations within the vast gamma of the EU's external action In this sense the EU's dilemma of federalism versus intergovernmentalism is analyzed through various case studies on the economic and monetary union human rights and development Since the thesis of the book is that both the political and economic aspects of the EU's external relations are inseparable as is evidenced in the bananas and hormones disputes the aim is to find a mechanism to enable the conferral of

competences from the national to the supranational federal level filling thereby the current legal vacuum in the EU treaties The book argues that the artificial division of EU policies into pillars which does not correspond to the needs of a modern foreign policy p 10 and which has been traditionally and metaphorically presented to resemble a Greek temple weakens the role the EU has in the international arena We see this in the external political and economic relations of the EU the EU is certainly an economic giant but remains a political gnome This results in a bipolar power asymmetry its representation in some international organizations such as the World Trade Organization WTO and the Food and Agriculture Organization FAO is polycephalous in nature since the European Community and its 25 Member States are members of the WTO and FAO but not of the International Monetary Fund or the World Bank where only countries are allowed for membership p 468 This shows the EU s internal struggle for external presence Most of the book deals with very traditional and somewhat overlapping topics on the EU s external relations However straightforward the overall diagnosis in the book is sepulchral silence remains in relation to the prognosis of the EU s external relations For example in his conclusions Martenczuk criticizes that this distinction between three pillars of the Union and in particular between Community competence and CFSP is becoming increasingly outdated p 415 It is fine to criticize and de construct but it does not suffice it is necessary to propose alternatives and re construct accordingly His proposal limits itself to merely arguing that the coherence and efficiency of the European Union s external action would be increased if all its external activities were brought under one common legal framework p 416 One would have hoped for an intellectually more serious and rigorous prognosis of the EU s external relations than just that the obvious
