De-Extinction Rebecca E. Hirsch, 2017-01-01 In the twenty first century because of climate change and other human activities many animal species have become extinct and many others are at risk of extinction Once they are gone we cannot bring them back or can we With techniques such as cloning scientists want to reverse extinction and return lost species to the wild Some scientists want to create clones of recently extinct animals while others want to make new hybrid animals Many people are opposed to de extinction Some critics say that the work diverts attention from efforts to save species that are endangered Others say that de extinction amounts to scientists playing God Explore the pros and cons of de extinction and the cutting edge science that makes it possible      **Lost Species** Jess French, 2019-10-03 Step into an incredible lost world and marvel at the strange and magnificent creatures that once roamed our Earth From the awe inspiring woolly mammoth and the ferocious Spinosaurus to the shy Chinese river dolphin and incredibly rare Pinta Island tortoise Lonesome George meet 35 extinct species and discover how these creatures came under threat Featuring additional information on Lazarus species animals declared extinct but which amazingly have been rediscovered in the wild and mass extinction events including the part we are playing in endangering our wildlife the book shows young readers that extinction is not simply a part of ancient history it is happening right now across the planet but that if we all make some small changes to our lifestyles our wonderful species can be saved With beautiful and vibrant illustrations throughout this stunning large format compendium is a reminder of the remarkable animals we have lost as well as a celebration of those that have returned from the brink of extinction      *The Road to Extinction* Richard Fitter, Maisie Fitter, 1987      **Zoo Conservation Biology** John E. Fa, Stephan M. Funk, Donnamarie O'Connell, 2011-08-18 In the face of ever declining biodiversity zoos have a major role to play in species conservation Written by professionals involved in in situ conservation and restoration projects internationally this is a critical assessment of the contribution of zoos to species conservation through evidence amassed from a wide range of sources The first part outlines the biodiversity context within which zoos should operate introducing the origins and global spread of zoos and exploring animal collection composition The second part focuses on the basic elements of keeping viable captive animal populations It considers the consequences of captivity on animals the genetics of captive populations and the performance of zoos in captive breeding The final part examines ways in which zoos can make a significant difference to conservation now and in the future Bridging the gap between pure science and applied conservation this is an ideal resource for both conservation biologists and zoo professionals      **Biogeography of the West Indies** Charles A. Woods, Florence E. Sergile, 2001-06-27 As a review of the status of biogeography in the West Indies in the 1980s the first edition of Biogeography of the West Indies Past Present and Future provided a synthesis of our current knowledge of the systematics and distribution of major plant and animal groups in the Caribbean basin The totally new and revised Second Edition Biogeography
