

Extreme Sites : the 'Greening' of Brownfield

Extreme Sites The Greening Of Brownfield

Maggie Roe, Ken Taylor

Extreme Sites The Greening Of Brownfield:

Extreme Sites Deborah Gans, Claire Weisz, 2004-05-21 Tackling a hot green architectural topic brownfield sites this title asks the essential question how should urban and post industrial sites best be rehabilitated to balance ecological and human needs This issue of AD is devoted to what planners refer to as brownfields These are often sites made toxic through a recipe of urbanism and industry from our great water thoroughfares to our landfills They are often the only sites available to us for planning consideration The book examines the conflict between the demands of ecology and development when reclaiming such sites for re development bringing together multiple viewpoints from different disciplines Includes the internationally renowned Andy Goldsworthy Glenn Murcutt and Renzo Piano It will recast the topic in a fresh and current light that will interest a wide audience from students to practitioners Aerial photographs maps and photo essays will give the visuals a richness and breadth of appeal Green is an architectural buzzword and is viewed as the new parameter for good practice

Green Scenarios: Mining Industry Responses to Environmental Challenges of the Anthropocene Epoch Artur Dyczko, Andrzej M. Jagodziński, Gabriela Woźniak, 2022-05-24 This book aims to present an alternative based on natural processes and an environmental approach to post excavation site management e g post coal mining heaps These sites are places where various mineral excavation by products are collected Nevertheless some post mineral excavation sites are oligotrophic terrestrial wetland and water habitat islands providing unique biodiversity enrichment in the landscape These oligotrophic mineral habitats are essential in over fertilized eutrophic agricultural and urban industry surroundings Some post mineral excavation sites are places where the wildlife can develop and support the functional processes of novel ecosystems Implementing the newest biogeochemical and comprehensive knowledge into urban industry landscape management will help to establish the ecosystem s processes and environmental functioning There are several post industrial sites in Europe where the wildlife areas developed due to natural processes are becoming wildlife hotspots in densely populated urban industry areas In this respect many of the oligotrophic mineral terrestrial wetland and water habitats of anthropogenic origin should not be categorized as environmentally dangerous and undergo economic utility focused reclamation Facing the actual environmental constraints of the Anthropocene Epoch the book s chapters presenting the natural basics and perquisites of the environmental ecosystem mosaics will be interesting for a broad range of environmentalists scientists and students miners economists and sociologists

Structures and Architecture. A Viable Urban Perspective? Marie Frier Hvejsel, Paulo J.S. Cruz, 2022-07-08 Structures and Architecture A Viable Urban Perspective contains extended abstracts of the research papers and prototype submissions presented at the Fifth International Conference on Structures and Architecture ICSA2022 Aalborg Denmark 6 8 July 2022 The book 578 pages also includes a USB with the full texts of the papers 1448 pages The contributions on creative and scientific aspects in the conception and construction of structures as architecture and on the role of advanced digital industrial and craft based technologies in this

matter represent a critical blend of scientific technical and practical novelties in both fields Hence as part of the proceedings series Structures and Architecture the volume adds to a continuous exploration and development of the synergetic potentials of the fields of Structures and Architecture With each volume further challenging the conditions problems and potentials related to the art practice and theory of teaching researching designing and building structures as vehicles towards a viable architecture of the urban environment The volumes of the series appear once every three years in tandem with the conferences organized by the International Association of Structures and Architecture and are intended for a global readership of researchers practitioners and students including architects structural and construction engineers builders and building consultants constructors material suppliers planners urban designers anthropologists economists sociologists artists product manufacturers and other professionals involved in the design and realization of architectural structural and infrastructural projects

New Cultural Landscapes Maggie Roe, Ken Taylor, 2014-01-21 While historical and protected landscapes have been well studied for years the cultural significance of ordinary landscapes is now increasingly recognised This groundbreaking book discusses how contemporary cultural landscapes can be and are created and recognised The book challenges common concepts of cultural landscapes as protected or special landscapes that include significant buildings or features Using case studies from around the world it questions the usual measures of judgement related to cultural landscapes and instead focuses on landscapes that are created planned or simply evolve as a result of changing human cultures management policy and practice Each contribution analyses the geographical and human background of the landscape and policies and management strategies that impact upon it and defines the meanings of cultural landscape in its particular context Taken together they establish a new paradigm in the study of landscapes in all forms

New Orleans Under Reconstruction Michael Sorkin, Carol McMichael Reese, Anthony Fontenot, 2014-05-20 When the levee system protecting New Orleans failed and was overtopped in August 2005 following the arrival of Hurricane Katrina 80 percent of the city was flooded with a loss of 103 000 homes in the metropolitan area At least 986 Louisiana residents died The devastation hit vulnerable communities the hardest the elderly the poor and African Americans The disaster exposed shocking inequalities in the city In response numerous urban plans and myriad architectural projects were proposed Nearly nine years later debates about planning and design for recovery renewal and resilience continue This bold challenging and informed book gathers together a panorama of responses from writers architects planners historians and activists including Mike Davis Rebecca Solnit Naomi Klein Denise Scott Brown and M Christine Boyer and searches for answers to one of the most important questions of our age How can we plan for the urban future creating more environmentally sustainable economically robust and socially equitable places to live A 2014 grant from the Graham Foundation for Advanced Studies in the Fine Arts supported in part the publication of this book

Concurrent Urbanities Miodrag Mitrasinovic, 2015-10-14 Design has been employed as an agent of social and political change and a catalyst for spatial and urban transformations in

cities across the world Concurrent Urbanities argues for the centrality of designing in the conceptualization and production of inclusive and participatory urban space by bringing together civic and urban activists urbanists designers and architects committed to exploring designing as a socio spatial praxis concerned with the reorganization of urban socio economic systems and relations of power The blend of first hand experiences and reflections of the urban practitioners featured reframes design practice beyond the design of physical objects and public amenities to the design of social protocols processes and infrastructures for radically reframing practices of socio spatial inclusion on the ground Through illustrated examples this book features the work of Stalker and Stealth who employ design to negotiate new social contracts Teddy Cruz s design of urban political and economic processes models of urban pedagogy by the Center for Urban Pedagogy Cohabitation Strategies work on designing urban social cooperatives and others Concurrent Urbanities presents a compendium of the emerging models of design driven urban practice that offers important new insights to professional urban practitioners as well as to students of urbanism architecture urban design and urban and spatial planning

Ken Smith Landscape Architects Urban Projects Ken Smith,2006 Ken Smith is unquestionably one of the most interesting voices in landscape architecture his works reflect the intensity and energy of their surroundings and challenge the distinction between landscape and art form Ken Smith Landscape Architects Urban Projects focuses on three prominent works in New York City his East River Project his work for P S 19 and his MoMA rooftop garden Through Smith s colorful playful drawings and photographs the book reveals how each project explores new expressions of landscape design in the city Ken Smith Landscape Architects Urban Projects is part of the Source Books in Landscape Architecture series sponsored by Ohio State University These books present sketches drawings models renderings working drawings and photographs Each book focuses on a recent important work or works at a level of detail that allows thorough study of the project from its conception to the completion of design and construction

Sustainable Brownfield Regeneration Tim Dixon,Mike Raco,Philip Catney,David N. Lerner,2008-04-15 Sustainable Brownfield Regeneration presents a comprehensive account of UK policies processes and practices in brownfield regeneration and takes an integrated and theoretically grounded approach to highlight best practice Brownfield regeneration has become a major policy driver in developed countries It is estimated that there are 64 000 hectares of brownfield land in England much of which presents severe environmental challenges and lies alongside some of the most deprived communities in the country Bringing such land back into active use has taken on a new urgency among policymakers developers and other stakeholders in the development process Frequently however policy thinking and practice has been underpinned by silo mentalities in which integrated and multidisciplinary approaches to problem solving have been limited The book has two principal aims The first is to examine the ways in which science and social science research disciplines can be brought together to help solve important brownfield regeneration issues with a focus on the UK The second is to assess the efficiency and effectiveness of different types of regeneration policy and practice and to show

how liveable spaces can be produced from problem places The Thames Gateway in the south of England and Greater Manchester in the North of England are shown as examples of how brownfield regeneration projects are developing in an era where sustainability is high on the policy agenda From the Foreword by Paul Syms National Brownfield Advisor English Partnerships Ensuring the effective and efficient reuse of brownfield land is an essential part of the British Government's land use policies in support of sustainable communities This book recognises that reusing brownfield land is not just about overcoming technical issues to remove contamination or other physical problems with the ground It highlights the importance of engaging with the many different stakeholders whose opinions and concerns need to be taken into account if sustainable outcomes are to be achieved The authors also recognise that brownfield land reuse is not just about building new homes or places of employment the creation of new green spaces can be just as important **exlibris** Giovanni Corbellini, 2022-05-18 Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices for an ultimate legitimisation In the growing mass of the publishing offer these keywords try to highlight recurrent issues tracking synthetic paths of orientation between different critical positions with particular attention to what happens in the neighbouring fields of the arts and sciences Brownfields Redevelopment and the Quest for Sustainability Christopher de Sousa, 2008-03-03 Examines the role that brownfields redevelopment is playing and can play in our quest for sustainability focusing on efforts in the US and Canada This book looks at how brownfields are used as spaces for developing an array of residential recreational and employment oriented projects that have breathed new life into the urban environment **The Green Belt, Housing Crises and Planning Systems** Charles Edward Goode, 2025-03-31 This book evaluates the effectiveness of the Green Belt planning policy in England It is one of the most well known strategies internationally with similar growth restraint policies having been adopted in a diverse range of cities around the world such as Portland Medellin and Bangkok Despite this it is often argued that Green Belts contribute to wider inequitable outcomes in society Focusing on the Green Belt in England the book critically analyses the extent to which these policies and planning systems contribute to housing crises and examines how far they need to be reformed With the central role of community engagement in many of the debates about housing crises the book investigates the characteristics of popular and campaigner opposition to housebuilding alongside investigating the power relations and politics of planning systems This timely research taps into important current policy debates in the UK surrounding urban nature green infrastructure and building on the grey belt The book is therefore of relevance and benefit to policymakers and politicians to academics and students internationally from a range of fields interested in housing community engagement green infrastructure strategic planning power and politics and conservation **Urban Design Update**, 2000 **The Routledge Companion to Ecological Design Thinking** Mitra Kanaani, 2022-08-31 This companion investigates the ways in which designers architects and planners address ecology through the built environment by

integrating ecological ideas and ecological thinking into discussions of urbanism society culture and design Exploring the innovation of materials habitats landscapes and infrastructures it furthers novel ecotopian ideas and ways of living including human made settings on water in outer space and in extreme environments and climatic conditions Chapters of this extensive collection on ecotopian design are grouped under five different ecological perspectives design manifestos and ecological theories anthropocentric transformative design concepts design connectivity climatic design and social design Contributors provide plausible sustainable design ideas that promote resiliency health and well being for all living things while taking our changing lifestyles into consideration This volume encourages creative thinking in the face of ongoing environmental damage with a view to making design decisions in the interest of the planet and its inhabitants With contributions from over 79 expert practitioners educators scientists researchers and theoreticians as well as planners architects and engineers from the U S Canada Europe and Asia this book engages theory history technology engineering and science as well as the human aspects of ecotopian design thinking and its implications for the outlook of the planet *Green Business* Nevin Cohen,2011-06-28 Annotation Presenting 150 signed entries this book provides an overview of key principles approaches strategies and tools businesses have used to reduce environmental impacts and contribute to sustainability *Brownfields Revitalization and Environmental Restoration Act of 2001* United States. Congress. Senate. Committee on Environment and Public Works,2001

Green Gentrification and Environmental Injustice Heather E. Campbell,Adam Eckerd,Yushim Kim,2024-09-13 This book argues that given the complex nature of the urban environment we cannot find one optimal solution to reducing environmental injustice in part because there is no singular cause Environmental injustice emerges in particular settings because of the combined and interdependent effects of a variety of different policy and community characteristics The authors argue that addressing these interlinked problems requires an understanding of the clusters of community and contextual factors that combine in a variety of ways to both create problems and imply policy approaches to managing them They argue for the use of complexity informed methods to assist in making public policy choices such as Qualitative Comparative Analysis QCA and Agent based Modeling ABM to enable us to better identify plausible solutions for specific contexts This volume offers a new perspective for strategically managing urban policy that considers the risk of gentrification and gentrification related displacement with the ultimate goal of improving social justice Environmental injustice pollution remediation gentrification and displacement are interlinked problems all of which impinge on social justice in US cities However public policy research and often practice as well has tended to separately consider urban policy issues such as environmental injustice brownfields and other pollution remediation how to redevelop neighborhoods and how to contend with gentrification and displacement In this book the authors take a new perspective to such intertwined urban policy issues using complexity thinking and more importantly complex adaptive systems approaches in order to develop context sensitive policy approaches to managing these ongoing problems Pastoral Cosmopolitanism in Edith Wharton's Fiction Margarida

Cadima,2023-07-11 American novelist Edith Wharton 1862 1937 is best known today for her tales of the city and the experiences of patrician New Yorkers in the Gilded Age This book pushes against the grain of critical orthodoxy by prioritizing other species of spaces in Wharton s work For example how do Wharton s narratives represent the organic profusion of external nature Does the current scholarly fascination with the environmental humanities reveal previously unexamined or overlooked facets of Wharton s craft I propose that what is most striking about her narrative practice is how she utilizes adapts and translates pastoral tropes conventions and concerns to twentieth century American actualities It is no accident that Wharton portrays characters returning to or exploring various natural localities such as private gardens public parks chic mountain resorts monumental ruins or country estate follies Such encounters and adventures prompt us to imagine new relationships with various geographies and the lifeforms that can be found there The book addresses a knowledge gap in Wharton and the environmental humanities especially recent debates in ecocriticism The excavation of Wharton s words and the background of her narratives with an eye to offering an ecocritical reading of her work is what the book focuses on

Environmental Aspects of Real Estate and Commercial Transactions James B. Witkin,2004 Rev ed of Environmental aspects of real estate transactions from brownfields to green buildings Green Roof Ecosystems Richard K. Sutton,2015-06-04 This book provides an up to date coverage of green vegetated roof research design and management from an ecosystem perspective It reviews explains and poses questions about monitoring substrate living components and the abiotic biotic and cultural aspects connecting green roofs to the fields of community landscape and urban ecology The work contains examples of green roof venues that demonstrate the focus level of detail and techniques needed to understand the structure function and impact of these novel ecosystems Representing a seminal compilation of research and technical knowledge about green roof ecology and how functional attributes can be enhanced it delves to explore the next wave of evolution in green technology and defines potential paths for technological advancement and research Handbook on Shrinking Cities Pallagst, Karina,Bontje, Marco,Cunningham Sabot, Emmanuèle,Fleschurz, René,2022-10-18 Compelling and engaging this Handbook on Shrinking Cities addresses the fundamentals of shrinkage exploring its causal factors the ways in which planning strategies and policies are steered and innovative solutions for revitalising shrinking cities Chapters cover topics of governance greening and right sizing and regrowth laying the relevant groundwork for the Handbook s proposals for dealing with shrinkage in the age of COVID 19 and beyond
