Smellosophy A. S. Barwich, 2020-07-14. An NRC Handelsblad Book of the Year. Offers rich discussions of olfactory perception, the conscious and subconscious impacts of smell on behavior and emotion. Science: Decades of cognition research have shown that external stimuli spark neural patterns in particular regions of the brain. We think of the brain as a space we can map; here it responds to faces, there it perceives a sensation. But the sense of smell only recently attracting broader attention in neuroscience doesn't work this way. So what does the nose tell the brain, and how does the brain understand it? A. S. Barwich turned to experts in neuroscience, psychology, chemistry, and perfumery in an effort to understand the mechanics and meaning of odors. She discovered that scents are often fickle and do not line up with well-defined neural regions. Upending existing theories of perception, Smellosophy offers a new model for understanding how the brain senses and processes odors. A beguiling analysis of olfactory experience that is fast becoming a core reference work in the field. Irish Times: Lively, authoritative. Aims to rehabilitate smell's neglected and marginalized status. Wall Street Journal: This is a special book. It teaches readers a lot about olfaction. It teaches us even more about what philosophy can be. Times Literary Supplement: Essentials of Cognitive Neuroscience Bradley R. Postle, 2015-01-08. *Essentials of Cognitive Neuroscience* guides undergraduate and early-stage graduate students with no previous neuroscientific background through the fundamental principles and themes in a concise, organized, and engaging manner. Provides students with the foundation to understand primary literature, recognize current controversies in the field, and engage in discussions on cognitive neuroscience and its future. Introduces important experimental methods and techniques integrated throughout the text.

Assists student comprehension through four color images and thorough pedagogical resources throughout the text Accompanied by a robust website with multiple choice questions experiment videos fMRI data web links and video narratives from a global group of leading scientists for students For Instructors there are sample syllabi and exam questions
