Parallel Lives Karl Baughman, Brook Poston, 2022-06-01 This book compares selected Romans of the late Republic with American Founders in the style of Plutarch encouraging readers to rethink how we view heroes and villains and their conceptions of republicanism Through entertaining yet informative short comparisons this volume demonstrates the humanity of heroes and villains from different times and places through their often idiosyncratic similarities and differences Readers gain not only a fuller understanding of the late Roman and early American Republics and their leaders but also an appreciation for comparative biography in its ability to make connections across the human experience The book provides a way to connect two different areas of study focusing on how republicanism shaped both Romans and American Founders and providing a previously unexplored contribution to a growing trend of broadening historical exposure In doing so Baughman and Poston demonstrate the continued need for connecting different fields of history while also helping students understand

their connection to the ancient past This book is suitable for students and scholars interested in the late Roman and the early American Republics and also appeals to readers of varied interests across historical times and places particularly those studying the connections between the classical past and modern world

Tamim, Karen Karp, 2016-10-14 Accreditation of teacher education programs is increasingly embraced internationally and is being modeled after the American experience despite criticisms from some in the field of teacher education in the United States This book examines the transformation of accreditation and the interest and perception of nations and regions choosing to use the model in their own culture including the Middle East and Gulf Region South America and the United Kingdom Its distinctive edge is the juxtaposition of three sectors quality assurance accreditation teacher preparation and global international experiences The authors address how the adoption of a universal requirement for accreditation embraces a particular view of what teacher quality means The emphasis on the development of teacher preparation in concert with accreditation is of academic interest to scholars in the United States and abroad The experiences and voices of teacher educators as international colleagues in a global climate of accountability brings a fresh perspective on shared challenges
